PRICE OF SILVER

Bar silver in New York, 53%c oz. Bar silver in London, 24%d oz. Mexican dollars, 44c.

Considerable attention was paid to Timiskaming on the afternoon board, and the shares rose to \$2 1-2, a gain of nearly five points from the opening figures. There was no news to account for the advance other than a flood of buying orders which came into the market, and as there was little stock on offer, prices advanced rapidly.

At the close values were around the top for the session, and sentiment was undeniably bullish. The spurts which have been made in the specialties among the cheaper issues have justified the opinion that the list is in good shape for a quick recovery, and there is a well-founded idea in speculative circles that this will soon be realized.

A GOOD MARKET

The COBALT MARKET continues brisk and the leading stocks are gradually strengthening in price. Holders will not sell their stocks at anything near present prices and continued public buying must cause big advances all along the line. We are strongly uiging the purchase of many of the Cobait securities at to-day's prices.
