Change To Early Morning Delivery on APRIL 1st

OUR Daylight delivery which has been in force during the winter months has proved itself a decided

success. It was a source of satisfaction to our numerous patrons. It was a convenience to them and to our salesmen.

Conditions which made daylight delivery necessary during the winter cease to exist now that the warm days of spring and summer are upon us. In the Spring and Summer other conditions arise which make a reversion to early morning delivery desirable. The early mornings are cool and the milk will be fresh when you take it in for breakfast. There will be no need for you to keep a supply of milk through the night. Then incidentally, our salesmen and their horses will benefit by delivering in the cool of the morning instead of the heat of the day.

You should find no inconvenience in the change. All you need do is to put out the bottles and tickets on Saturday night, March 31st, ready for the salesman when he calls in the morning.

Perhaps you have not yet enjoyed the convenience of The Farmers' Dairy service and The Farmers' Dairy quality.
