

STAVES have been high since Summer, and the stock wintering is small, and the price in London and mostly all the English markets very encouraging. We think parties in the West may calculate on prices being remunerative in 1867, as the Stocks are very bare everywhere.

DEALS have been held at extreme prices all the year, and the shipments have been on a very large scale, so large, indeed, as to tell seriously on the London market, which is the great centre of this portion of our export. Notwithstanding this, however, manufacturers are asking very high prices for next year's delivery, occasioned by the active enquiry of the Americans for all kinds of Sawn Timber, both Pine and Spruce.

FREIGHTS have ruled ruinously low all the season.

We tender our thanks to Messrs. Wood, Petry, Poitras & Co., for the use of their tabular statements.

J. BELL FORSYTH & CO.

WE beg to forward Export, and Stock of respectively, an average with Prices Current. the Timber Trade, at price throughout the in the English money year, would have had temporary, and not expected to arrive, price season. During last to the West India I reason for expecting the Spanish Government and the Islands of Cuba, Quebec, and before the States and other foreign nations diminish.

WHITE PINE.—Against 12,426,850, a year, and is superior trifling amount of arrived this year, having during the season. It is important not to the highest value for out of the hands of the board, into the hands market, and we cannot place in our export trade sawn lumber. The Reciprocity Treaty and has proved that upon the consumer who

RED PINE.—The feet last year, two-thirds has been very dull trade with difficulty and at article until our shipment to a great extent displaced

TAMARAC.—The last year, and of Flathead wood has been in fair
