This is perhaps explained by quite an amusing story, which would lead one to think that the affable police surgeon has more to do with the force than look after What the Aldermen Think About It.

The appointment of Officer Jenkins to the captiancy of the Northern division has evidently put the common council on its mettle. Most of the aldermen had been led to believe that matters in this direction would have taken a different turn, but they were more forcibly impressed than ever with the fact that their wishes are not taken into account when matters pertaining to the make up of the police force are under consideration.

The board of public safety signified its intention Wednesday afternoon of acting in precisely the same spirit in regard to the chief of police when it was considering police matters. His wishes would be ignored by the aldermen as theirs had been by him.

PROGRESS has no room this week to infavor of granting this latter request, if the chief wanted the glass case for himself, and one alderman was willing to second a motion to that effect on condition that he be given the key to the innovation. If the "colonel" would don his full uniform and go on exhibition he might be converted into quite a source of revenue.

The object of many of these "improvements" was said to be a desire tor privacy for the part of the chief. As things are at present what is said in his office might be heard in the guard room. This plausible reason provoked a smile even from Chair of rif it is found that sixteen pages will not on the will one and some one of the colone of reason provoked a smile even from Chair-

The clause relating to the chief's excursions out of town, also came in for some remark. One alderman drew attention to the fact that on New Year's day, when the police were most likely to be needed in the city, the chief was out driving on the Marsh

road. Ald. Kelly explained this by saying that he was on the lookout for smash-

The apparent quietness in police circles of late had led many to believe that the council had tired of its endeavor to have something to say about the police force; that it had thrown up the sponge in disgust, and that the chief was conducting the department according to his own sweet will.

And so he has been. Things assumed a different aspect, however, when the board of satety met Wednesday afternoon. The police committee had held a meeting a few minutes before, and had drawn up a report, in which was embodied the views of every member, with the exception of Alderman Kelly. He did not agree even saying seven saying even saying eve

Ald. Chesley had something to say about that part of the report referring to the captains and detectives. The chief was always crying out for more men to do patrol duty, while there were a lot of men paid by the third the report referring to the captains and detectives.
