

Protection against the elements.

Government statistics show that many million dollars' worth of property is lost every year due to the neglect of painting. Rain and storms of all kinds wear out unprotected buildings in 20 years, which, if painted at regular intervals, would last 50 years. Is your property protected with good paint? You can double the life of your building by covering it every three or four years with a good paint. You must be sure, however, to get a paint that you know is reliable. Cheap paint in the long run is expensive, for it will not protect the surface; it soon powders or peels off. Good paint is economical, it covers more surface, looks better and lasts longer than cheap and shoddy paint. There is an S-W Paint and Varnish for every use. Ask your dealer for color cards and full information.—*The Little Paint Man.*

OWNERS KNOW THE REASONS WHY IHC CREAM HARVESTERS PAY BEST

LET IHC owners tell you about IHC Cream Harvesters. They know IHC superiority by actual experience. The local dealer will give you the names of some owners near you. Learn from them why IHC Cream Harvesters skim closest, are most durable, easiest to clean, and easiest running. Let them tell you about the many profit-advantages of

IHC Cream Harvesters

Look over the IHC separators they are using every day. Then consider these facts:

The wearing out of parts and many other cream separator troubles are largely due to dust and milk getting into the gears. IHC Cream Harvesters are the only separators with dust and milk proof gears which are easily accessible. A glance at an IHC will show you this great feature. IHC Cream Harvesters are protected against wear at all points by phosphor bronze bushings—not cast iron or brass bushings. IHC Cream Harvesters are constructed with larger spindles, shafts and bearings than any other separator. The IHC bowl is free from slots or minute crevices, which make it remarkably easy to clean. There are many other advantages which any IHC owner or the local dealer will point out and prove to you. IHC Cream Harvesters are made in two styles—Dairymaid—a chain drive machine, and Bluebell—a gear drive separator—each in four sizes. In justice to yourself, see an IHC owner or the local dealer before you decide on any separator. If you prefer, write for catalogues and all information to nearest branch house.
