FIFTY AIRMEN LOST

Body of Commander Found Floating in Sicilian Waters,

A despatch from Paris says :- The body found floating in the Mediterranean by a Silician fisherman is the first positive indication that France has lost fifty of her most courageous and experienced airmen and her gigantic airship Dixmude-formerly Ger-many's greatest Zeppelin, taken from her after the armistice and not yet fully stripped of its construction secrets by France.

The body has been formally identified as that of Commander of the Dixmude, Lieutenant Du Plessis de Grenadan, who would be the last to leave the ship.

For days with his crew of airmen he fought with the Mediterranean Africa to its base in the south of France-nowhere else could it be landed without risking a smash-up. The wind was blowing in different distarvation. But they doggedly re- title of Royal Highness. mained in the air and soon they

SERIOUSLY CEIPPLE TRADE WITH SPAIN

Products of Dominion Must Pay First Column Rate of Duty.

A despatch from Madrid says :----The Spanish Government has sent instructions that all goods of Canadian origin must pay the first column rate of duty. This is a serious impediment to the sale of Canadian goods to Spain. Last year Canada did not give her adherence to the treaty of commerce and navigation between Britain and Spain, but signified her intention to negotiate a separate treaty. For several reasons these negotiations have not yet begun since Canada does not now apply the most favored nation treatment to Spanish goods, but levies the higher duties of the general tariff,

and the heavy rates of the first column become operative. It is hoped the negotiations with Canada will begin soon. Meanwhile business with Spain in agricultural machinery, iron and other articles will

probably come to a standstill. **British Peers Getting Rid**

of Their Estates

A despatch from London says :--- In-nowever, ending thus:
 "The discovery of radium was made under precarious conditions, and the barn where it took place is now found romantic. But to us these romantic elements were not advantages. They used up our strength and delayed our results. Under better conditions we might have reduced our first five years' work to two. This lesson should not be lost for the future."

come down in parachutes. At the same time in the Mediterranean French, Italian and British warships have executed sweeping patrols.

The French public was stirred to feverish interest and continued to hope despite forebodings of the official aerial experts. The disappointment at Friday's catastrophic news is correspondingly heightened.

The commander of the Dixmude intended to make only a three-day trip, starting December 18 across the Mediterranean to outpost of the Sahara Desert and back again to Southern France. The purpose was to reconnoitre a route for the proposed trans-Sahara railway, and also to give some naval staff officers, who were passengers, opportunity to study the possi-bility of using dirigible airships for coast defence. The French Marine Ministry has declared the airship the out to help in clearing the tracks.
