Mrs. T. Johnson One of the Perils of Hunting In Out in Colorado there are a great many Out in Colorado there are a great many rich ores that present the gold in certain chemical combinations which nothing but cyanide will break down and liberate the elemental gold. Under such conditions the prospector has to be somewhat more of a mineralogist than when his search is confined to placer, quartz and gravel gold. In at the back of Pike's peak there was a camp of half a dozen prospectors, for they had found a good line of country rock and were working out in all directions. I regret to say that very many of these adventurous miners are heavy ge to work. The only remedy the dome is Dr. Coderre's Red Pill cannot praise too highly." Mrs. T. Johnson, 16th Bound Street, Saginaw, Mich tions. I regret to say that very many of these adventurous miners are heavy drinkers, and the men in this camp were no exception. What is worse, they had an abundant supply of the stuff, and ev-ery night after their exhausting labors above the line of 10,000 feet of altitude they give a close imitation of a debauch. they gave a close imitation of a debauch All this time they were feeding on bacon and salt pork, and canned goods once in awhile just by way of variety. But one day a member of the party sighted a herd of deer, and the next day he took a day off with his rifle, saying it was about time on with his rule, saying it was about time the camp had some real meat—some of the fresh kind. Well, he brought back a deer that day, and they cooked it and had it reads for dinner when the others got it reats for dinner when the others got back. That venison went just to the right spot, and the camp unanimously agreed to this man's being authorized to keep them supplied with fresh meat. After dinner they brought out the demijohn and filled up all around. It was no difficult thing for that crowd to pour the stuff down—the trouble came immediately afterward. One gagged, another choked until the tears streamed from his eyes—all were in difficulties. The New System of Treatment

Powley's Liquified Ozone Makes Astounding Cures. Germs of Disease.

THE STORY OF ROBT. E. FLEMING, ESQ.

Powley's Liquified Ozone kills disease germs. This is the only natural way to treat sickness, because all sickness is caused by germs. Now this seems very simple, yet it is absolutely to be relied upon. Powley's LIQUIFIED OZONE is liquified oxygen, a standard preparation. It is not a patent medicine. The most responsible people in Canada have endorsed it and are recommending it. You can verify every testimonial published for Powley's Liquified Ozone.

Isn't that a satisfactory guarantee?

Mr. ROBERT E. FLEMING, 227 George Street, Toronto, formerly connected with the S. H. Ewing & Sons Co., of Montreal, cork dealers, has this to say: "Some fifteen months ago a friend spoke to me about Ozone and I have truly thanked him for it ever since. I have suffered all my life from indigestion, weak stomach, bilious headaches and poor, thirr, watery blood. Some years ago, in fact when a young boy, I had bilious headaches once and twice a week, and later on in life always had two severe attacks twice a month. I despaired

of ever getting any relief or permanent cure. Fifteen months ago I had a severe attack of Kidney Trouble, suffering with pains in my back, my blood being in a miserable condition. I was weak, had a poor appetite and found it hard to get a good night's rest, had no pleasure in attending to my daily business, in fact, getting up in the morning was no pleasure; always wanted to lie in bed. So I began taking Ozone four times a day, and after using a few bottles I found a decided improvement, but always thought that I would suffer with bilious headaches and weak stomach for the rest of my natural life. After using four bottles I found I was entirely cured of kidney troubles, and after using a few more bottles I found that my stomach was strong and that my bilious headaches were leaving me, and my blood was pure. I can faithfully say that the present moment I am permanently cured and gaining solid flesh and muscle rapidly. I take the liberty of presenting to you this, my testimonial, that others may see and profit thereby, if suffering as I was. Believe me, very truly yours. (Signed)

R. E. FLEMING, 227 GEORGE ST., TORONTO.

were in difficulties.

"Who's been monkeying with this whis

ky?" said one as soon as he could get his

ky?" said one as soon as he could get his voice.

"First time I ever knew whisky to go back on me." said another.

They decided to give it another trial, but it was no go. When they got it to their lips, they couldn't get it any farther. They not only did not want it, but they had an aversion to it. This went on for several days, getting worse every day, and they were getting so beastly sober that it was like making new acquaintances all around. At last they decided to send one of the party into Colorado Springs to consult a doctor. The way they figured it out was that as they were all afflicted in the same way one patient would be just as good as the bunch, and when the doctor had found out what was the matter with him and given him a prescription, all he would have to do would be to buy six times as much as was ordered, and then there would be enough to go around. Just to be sociable this fellow packed in one of the deer that they had been living on. Well, he came back without much satisfaction, but plenty of medicine of one sort or anotherat any rate, the druggist told him it was a good deal better. In a few days who should come chasing to their camp but the doctor. The upshot of the whole matter was that the doctor had found himself affected the same way, but as he was an eastern man it didn't so much matter in his case. He did some chemistry on the venison that was left him and found

in his case. He did some chemistry on the venison that was left him and found

the meat jammed full of gold chlorides. That made everything plain. Instead of

renison they had been eating a regular "jag" cure, and now they couldn't drink. But the medicine man had plenty of "savey"—a heap more than the prospectors. Under his direction they trafled up

the runway of the deer and finally found the place where they had their licks for you know deer must have something salt

you know deer must have something sait to lick. The prospectors had been looking for sylvanite and the telurides. They had no idea what gold chlorides looked like and they had passed this place a dozen times as not worth so much as the tap of a harmory. The deer had been steadily

of a hammer. The deer had been steadily licking the outcrop until they were fairly charged with the gold in its chemical combination, which passed into the men

who fed upon the venison. Today, I am glad to say, that is one of the best min-

ing properties in the county .- Forest and

The council met Nov. 19th. The mem-bers were all present. The following were

From W. G.
