Dan DeCov has sold his fine driving team for a handsome sum. Master Sherman Boyle, who has had an attack of blood poisoning, we are glad to report, is improving. The Ladies' Aid held a very successful social on Monday evening, May 20th, when Miss Dege was made the recipient of a handsome mantle clock.

On Sunday, May 12th, Mr. W. Rut-

ley sang very acceptably in our church, to a very large congregation, it being Miss Dege's farewell Sunday.

Last Sunday Miss Duffy and Miss Tillson, of Chatham, assisted in the choir, when Miss Duffy rendered a beautiful solo.

Mrs. W. Colman visited Mrs. McGregor on Thursday of last week. Fery, McGregor and friend, B. Blonde, visited at the former's parents on Sunday.

Your Hair At Home?

Or has your comb run away with it? Better look out for what's left of it, and keep it at home on your head, not in the comb. Ayer's Hair Vigor will act as a "keeper." If you have a particle of doubt about using this splendid preparation, let your doctor decide for you. We publish the formulae of all our preparations.

THE FIRST COFFEE.

Accidental Discovery of the Aromatic Beverage.

Near the middle of the fifteenth century a poor Arab was traveling through Abyssinia, and finding himself weary and weak from fatigue, he stopped near a grove. Then, being in want of fuel to cook his rice, he cut down a tree, which happened to be covered with dead berries. His meal being cooked and eaten, the traveler discovered that the half burned berries were very fragrant. He collected a number of them, and on crushing them with a stone he found that their aroma increased to a great extent. While wondering at this he accidentally let fall the substance into the can which contained his scanty supply of water. Lo, what a miracle! The nearly putrid water was almost instantly purified. He raised it to his lips. It was fresh, agreeable, and in a moment the traveler had so far recovered his strength and energy as to be able to resume his journey. The lucky Arab gathered as many berries as he could, and, having arrived at Aden, in Arabia, he informed the mufti of his discovery. That worthy divine was an inveterate opium smoker and had suffered for years from the influence of that poisonous drug. He tried an infusion of the roasted berries and was so delighted at the recovery of his own vigor that in gratitude to the tree he called it "force."

THE CHAMOIS.

Ways of the Shy Animals of the Mountains of Europe.

Exciting sport, the more exciting because of the hardships connected with it, is offered by chamois hunting in the mountains of Europe. The chamois are found everywhere in the highest mountains of Germany, Austria, Switzerland, in Transylvania, in the Carpathians, also in the Alps, and these extremely shy animals are regarded by all true huntsmen as the most desirable of all game. The chamois belongs to the antelope species; but, unlike its kin of the broad plains, it prefers the barren wilds of the high mountains, and, like the mountain sheep, the ibex and the mouflon, it selects in its territory full of chasms and canyons the most inaccessible regions as its lair.

During the summer months the chamois roams in the higher altitudes, but in the winter time it must descend to find its food. After feeding it returns to its old impassable nooks, where it feels secure. As in the case of the deer, the male is called a buck and the female a doe, but, unlike all other animals of this kind, both sexes are antlered, the horns being called "rickelers," but those of the doe are somewhat lighter than those of the buck. The doe brings forth one fawn every year, sometimes two, but very seldom three, which are very dearly loved by the mother and which she protects against all dangers.—Outer's Book.

Male Blushers and Their Cure.
"A good many men bluish," said a physician; "some so faintly that they come to me to be cured. The cure I recommend is an old one. It is the abandonment of overheavy clothing, especially of woollen socks. Amazing it is how many male blushers have a predilection for thick socks of wool. But some blushers wear light enough clothes. To them I can only recommend a nerve treatment. I advise them to make speeches at banquets, to be witnesses in murder trials, to go to teas and dances, to develop, in short, the nerve, as a wrestler develops his muscle. Blushing is a difficult disorder to cure. As a rule, it passes away of itself when the victim reaches his thirty-fifth year."

The Blood is the Life.
Science has never gone beyond the above simple statement of scripture. But it has illuminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad" or impure it is not alone the body which suffers through disease. The brain is also clouded, the mind and judgement are affected, and many an evil deed or impure thought will be directly traced to the impurity of the blood. Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It cures, cures, cures the blood, thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood.

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the "Golden Medical Discovery" has performed the most marvelous cures. It is well to apply to the open ulcer, Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood cleansing constitutional treatment. If your druggist don't happen to have the "All-Healing Salve" in stock, you can easily procure it by enclosing fifty-four cents in postage stamps to Dr. B. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the "Golden Medical Discovery."

You can't afford to accept any medicine of unknown composition as a substitute for the medicine of known composition, having a complete list of ingredients in plain English on its bottle wrapper, the same being attested as correct under oath.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.

Doing good is, perhaps, the only enterprise in which there is positively no element of risk.

Better to fail with manly wounds before thy cruel enemy, than survive thine honor.

He Clinched It.
"My boy, I like you, and I want you to marry my daughter, but have you spoken to her mother about it?"
"No, sir."

FREIGHT HANDLERS QUIT.

Two Thousand Go Out On Strike At Buffalo.

Buffalo, N. Y., May 21.—Two thousand freight handlers on the docks quit work yesterday morning, demanding an increase of wages from 17 1/2 cents to 20 cents an hour. The freight house of the New York Central was the principal one affected.

It is said that the strike affects all the transportation companies having freight houses along the docks, and that the strike was in the nature of a surprise to many of the leading officials of the freight houses.

It has been known for some time that the men were dissatisfied, but it is said that there was a general belief that all difficulties had been smoothed out, and that there would be no strike. The strikers are what are known as inside men, and are mostly Italians. They are said to be well organized.

Neither the longshoremen nor outside freight handlers are involved in the strike. It is stated that the Anchor Line is not affected, as they began some time ago paying the 20-cent scale.

At Erie transfer house all of the men did not strike, while others went out reluctantly. The officials there say they do not believe that the strike will continue long.

Horsehoes New Strike.
Winnipeg, May 21.—City horsehoes to the number of 50 went on strike yesterday for more pay and shorter hours.

The Highest Skyscraper. The tower to be built by the Metropolitan Life on the northwest corner of the block between Twenty-third and Twenty-fourth streets and Fourth and Madison avenues in New York city will be 658 feet above the sidewalk and 690 1/2 feet above its foundation. The clock to be placed between the twenty-first and twenty-third stories will have hands twelve feet long. Offices on the forty-first floor will be the same height as the lookout windows in the top of the Washington monument.

An interesting point is noted by a writer in the Scientific American. The tower, being thirty feet higher than the Montclair hills, will catch the rays of the sun after it has set behind the Orange mountains.
