

COME SOBER TO COUNCIL.

That is the Rule Laid Down by the Mayor.

He Will Draw the Line Closely Henceforth.

H. W. & G. R. By-law to be Considered Next Friday.

There are some of the members of this year's Council who will walk straight from now until the end of the year, if I can make them do it," declared Mayor Stewart very emphatically after last night's farce. The spectacle of drunken aldermen appearing at committee and Council meetings, making the proceedings even more ridiculous, if that were possible, met with the severe condemnation of a group of men, who make an earnest effort to transact civic matters in a business-like way. "It is a disgrace, and should be exposed," they said, as they expressed their disgust. "The ratcatchers should know the kind of men that are looking after their interests." In municipal circles to-day it was generally prophesied that there would be a house-cleaning in January. To judge by the opinions expressed by the aldermen after the meeting last night, it will not be unexpected.

Some of the aldermen made a request that the matter should not be mentioned in the papers. They did not think that such things should be printed, and considered it a trifling matter anyway. That was not Mayor Stewart's view of it. He thought an exposure in the newspapers might have a beneficial effect. "When men come around to the Council meetings drunk, it is going too far," he said.

A joint meeting of the Finance Committee and Parks Board will be held on Friday evening to take up the Hamilton, Waterloo & Guelph Railway by-law. It is practically the same as the old by-law, with some minor changes and of course the new route.

The Hospital Board will meet at 4 o'clock to-morrow afternoon to deal with the Southern Home for advanced cases of consumption. Mr. Southam will be present, and it is the intention to make arrangements for the work to proceed at once.

City Engineer Barrow announced to-day that the work of fixing the roads at the north and south ends of the filtering basins would be proceeded with this week.

The Police Commissioners will meet at noon to-morrow.

LATE SPORTING NEWS

London, Sept. 11.—At the Doncaster race meeting to-day the St. Leger Stakes of 25 sovereigns each for three-year-olds, about one mile six furlongs, were won by Woolwinder. Ballyglass was second and claim was third. Twelve horses started. The St. Leger was run in the finest possible weather, and in the presence of a large crowd of people, including King Edward, Woolwinder, who ran second in the race for the Derby Stakes, was the favorite in the betting at 11 to 10 against.

There will be a full practice to-morrow night at the Y. M. C. A. as soon after 6 o'clock as possible. All last year's players of the O. R. F. U. and city teams and any one else who would like to get out are asked to come in uniform ready for practice. It is important that the players be on time as the evening is getting short. A team will be picked out to play Waterdown on Saturday. The first game of the O. R. F. U. series will likely be on the 29th. The time left is very short to get into good shape. They will be all the time before them to get in good form. Don't forget, Thursday night as soon after 6 o'clock as possible at the Y. M. C. A., James street south.

JAIL ETIQUETTE.

Question of Social Superiority Comes Up in the San Francisco Jail.

Chicago Tribune: A delicate question of etiquette has arisen in the San Francisco jail; a question which, it seems, cannot be decided officially for the reason that every man convicted of a crime in a social law unto himself, with proper and natural restrictions which a benign State Government throws around his movements. The problem, which must be solved purely along academic lines, is this: Is the bribe-giver or the bribe-taker the most classy?

When a social multi-millionaire, under sentence of five years for purchasing a choice collection of supervisors, entered the bastille he refused to shake hands with Eugene E. Schmitz, former Mayor, who had delivered the supervisors according to contract.

Also, he refused to eat at the same table with Schmitz and has arranged to have his meals served at a private table. Schmitz, being a labor leader and one of the proletariat himself, eats in the common dining room and doesn't put on any airs.

He is much more popular with his colleagues than is Glass and if it were left to a vote of inmates he would no doubt be re-elected Mayor, after the commonwealth gets through with him. Unfortunately for his political future jailbirds cannot vote for him, although it is an open secret that in many persons who ought to have been in jail voted for him when he ran before.

DUNDAS MAN WAS SPEAKER

At Evangelical Meeting at the Peterboro' Y. M. C. A. on Sunday.

Peterboro, Sept. 11.—Mr. W. A. Davidson, treasurer of the Grafton Company, of Dundas, was the speaker at the Y. M. C. A. on Sunday afternoon, there being a good attendance of men.

Mr. Davidson spoke from the theme, "I will arise and go to my Father." The address was the plain, common sense deliverance of a business man, and the impression made was most effective.

Mr. Fred Freeland sang "Nearer, My God, to Thee" in excellent voice, being accompanied by Mrs. Greenslade.

ANOTHER POLAR RAILROAD.

Civil Engineer Knorr, one of the largest contractors for public works in Russia, has obtained the concession for building the Polar-Ural railroad, the project that was recently approved by the Russian Commission on New Railroads.

He has been over the entire route and says that it is perfectly practicable, with an easy grade over the Ural Mountains.

This road is intended to help the development of agricultural western Siberia. It will be the outlet and inlet for the splendid water freight routes of the Yenesei and Ob Rivers, and of the Irish, the great tributary of the Ob. It will more than double their importance, because it will do away with the difficult, dangerous and uncertain navigation of that part of the Arctic Ocean called the Kara Sea.

Within the last twenty years many trading steamers have crossed the Kara Sea to the Ob and Yenesei, but since 1901 no commerce carrier has made this voyage. In 1905 a number of vessels in the service of the Russian Ministry of Commerce and Industry, loaded with rails for the Siberian railroad, made the voyage in safety from Hamburg to the Yenesei, but the difficulties of the journey, the uncertainty of completing it and the high rates of marine insurance have entirely discouraged enterprise in this direction. The attempts to utilize the Kara Sea as a commercial highway have been definitely abandoned.

The railroad that will now be built will start from Otdorsk on the Ob River at the Polar Circle, and extend north-west across the tundra to Bolnansk Bay, the southern part of Pechora Bay, about 206 miles. As compared with the Kara Sea route the railroad will shorten the distance between the Siberian rivers and the ports of western Europe by about 1,000 miles, as by the route now used vessels have to travel far north to circumvent the Jalmal Peninsula.

Pechora Bay is open for commerce more than four months in the year, and the navigation season on the great rivers of western Siberia is still longer, while in the great grain region of the south-west on the upper Ob and the Irish it is six and a half months. All the large trade centres of the southwest, as Tobolsk, Pavlodar, Semipalatinsk, Tomsk and Barnaul are on the Ob and Irish highways leading direct to the railroad, whence the journey will be safe and easy to all the leading ports of north-western Europe.

Barnaul is about 1,500 miles by river from the railroad terminus at Otdorsk, and it will illustrate what this new enterprise means to southwestern Siberia to say that it will give to Barnaul a safe

Freak of a Tornado.

Attending the story of every cyclone there is something of the nature of a freak to be related. During the small twister in the Highland district recently the most incredible happened. Two men must believe the story, for it was told by faithful men. Between two corn-croppers of a barn (Mr. Rutbruff's barn, we believe) the feathers and perhaps the foot of a chicken protruded. The stones were intact and showed no signs of ever having been disturbed by man or the power of the elements. But the chicken was blown in between those large stones by the fury of the storm in some manner. It was a chicken without doubt, though pressed as thin as an onion peel. How did it get there? The theory shared by nearly all who witnessed the phenomenon is that during the storm and a sudden gust of wind the barn and top stone were lifted sufficiently high to allow the chicken to be blown into the crevice and before the fowl could get out the barn settled down.—From the White City, (Kan.) Register.
