PINANCIAL AND COMMERCIAL.

PRODUCE. The gast week has been a very dull period in flour and grain. There have been few orders for anything in the market, and receipts seem to have been on the increase. Prices, however, show little change, nave in barley, though the general feeling has been weak. Prospects seem to be in favour of agietude nere until an advance shall occur eutside, or such an grain on the market to bring prices further down; but as far as we can learn the latter is improbable, as farmers do not like to sell at present prices, and so long as the present large supplies continue to be ed in the English markets the former is qually se. Stocks show a considerable increase during the week; and stood on Monday morning as follows:—Plour, 7,630 bbls; fall wheat, 41,948 shels; spring wheat, 75,914 bushels; oats, 12,000 bushels; barley, 126,136 bushels; peas, 17,453 bushels, and zye, nil bushels. Outside markets have generally been inactive. English quotations show a fall of 4d on club wheat and of 5d on peas during the week. The supply, though showing a slight decrease, has continued to be in excess of the consumption; that for the week ending on the 14th inst., including me-grown and foreign wheat and foreign wheat ur was equal to 465,000 to 493,125 qrs of wheat, from American Atlantic ports; also 49,000 grs of Sea and the Danube, and nil grs from America. Further cable advices to the 17th inst., report a continuance of sharp frost with little doing in sowing wheat either in England or Northern France. The quality crease their stocks, and that distress in the manufacturing districts along with the financial distrust prevalent, checked sales. It was thought that any coniderable advance in wheat was improbable; the prospect of a severe winter being the only allay known on the "bull" side.

the only allay known on the "bull" side.
Mail advices to the 9th inst. state that in France,
sowing continued to be delayed by the wet weather
and condition of the fields; country markets were
fairly well supplied in spite of the weather; but the
milling demand was light and prices were quoted
dearer in 10, cheaper in 26 and unchanged in 43 out
of the 38 markets whence reports had been received.
The general time of trade was steady. At Marseilles
