The uprearing green branches of a tall elm shaded him from the heat of the exposed sun, and the scene all round was a picture of quiet repose broken only by the twittering of the birds and the murmuring of the brooklet that ran alongside th path. The man was resting on his elbow with his head in his hand, and his eyes were open.

Presently, he bowed his head and closed his eyes-not in sleep, but as one does in fervent prayer or deep thought. Then he slowly opened them, as though his mind was following some train

of though that was stretching away into the next world, a mental operation over which he seemed to have no control. His gaze was riveted on a stone lying close to his elbow—a flat stone with a smooth surface. He had called himself back from the other world of dreams, and was again alive to his surroundings. The eye of the tramp plainly

discerned upon the face of the stone the configurations of a human-like head beginning to wiggle and dance itself into form and shape-first the chin and Around that heart and scathe mouth, then the staring eyes then the full contour of the face -this being followed by a detailed and finished design of a perfect head that seemed to be animated with life.

The man was not one bit perturbed by the strangeness of this apparition on the stone. On the contrary, he became quantly curious, and thrust his reclining head forward a little to scrutinize the object more closely, and as he did so, what seemed to him like a red spot appeared in the middle of the forehead of the phantom head. Compelled by a of which he could not clearly divine, he bent his head down still further and revently kissed Dear sympathy, expressed with this red mark. In a confused sort of way he thought he re-

YDAST

TO MAKE GOOD BREAD

You must have Good Yeast

YOOD BREAD is, without question, the most important article of food in the catalog of man's diet; surely, it is the "staff of life." Good bread is obtainable only by using the Best Yeast, the best flour, and adopting the best method of combining the two. Compressed Yeast is in all respects the best commercial Yeast yet discovered, and Fleischmann's Yeast is indisputably the most successful and best leaven known to the world. It is uniform in quality and strength. It saves time and labor, and relieves the housewife of the vexation and worriment she secessarily suffers from the use of an inferior or unreliable leaven. It is, moreover, a fact that with the use of Fleischmann's Yeast, more loaves of bread of the same weight can be produced from a gven quantity of flour than can be produced with the use of any other kind of Yeast.

This is explained by the more thorough fermentation and expansion which the minute particles of flour undergo, thereby increasing the size of the mass and at the same time adding to the nutritive properties of the bread. This fact may be clearly and easily demonstrated by any who doubt that there is economy in using

If you have never used this Yeast give it a trial.
