Mr. Borden Tells Large Gath-Election Without Redistribution Can be Avoided

WINNIPEG, July 6,-R. L. Borden spoke to a large gathering tonight at Neepawa in the hotbed of the grain growers, at the rink, which was splen-didly decorated. He referred to the ing carried on by the Liberal press of Canada regarding a general election before redistribution. It was found also that the organized farmers were putting in a note of warning about the electi-The Conservatives had no direct control of parliament, which could only be dissolved by the governor-general on advice of the ministers of the crown at the

"We are not ministers of the crown" said Mr. Borden, "though it is highly probable we will be at an early date. The governor-general cannot take any advice from us while we are in the op-

position." Continuing, the Conservative leader said he had gone to Sir Wilfrid some months ago, and urged that as Canada had gone along without reciprocity for forty years, it could possibly struggle along without it for a few months more. He suggested that the census should be hurried, a redistribution bill introduced, which would give to the west the representation it was entitled to, and then the question of reciprocity should be submitted to the people.

The question could be fought out, and the verdict of the electors accepted Why should the government fear if it was satisfied the pact was in the interest of Canada, to give the country a chance to pronounce upon it?

Speaking of the Dominion govern ment's absolute lack of information when conducting the reciprocity negotiations, Mr. Borden said the United States had a business government at Washington, while an incapable government was

He dealt with the question of reciprocity from an economic point, dwelling particularly on the effect of the agrement so far as American trusts are concerned. He argued that if the agree-ment goes into force, the people of Canada will be paying tribute to American cities, and he asked if that was the kind of reciprocity that Canada

Will Endeavor to Locate Cause of Explosion in Magazines of Battleship Maine-Unwatering Takes Much Time

WASHINGTON, July 6 .- A board of aval officers, experts in explosives, is being selected by the navy department to study the hull of the battleship Maine, in Havana harbor, as the water is pumped from the cofferdam now surrounding the wreck.

Because of the necessarily slow progress of the work, weeks will probably elapse before the experts will be able to inspect the keel of the former warship, but the board will go to Havana as soon as its personnel is made known and will remain with the work until it is finished. The navy department officers are confident that the examination will prove the correctness of the Sampson board, which decided that the explosion which sank the Maine was caused by a torpedo or mine; that the explosion of the ship's magazines followed.

In view of the renewed interest attruction of the Maine, General W. H. Bixby, chief of engineers, who has just returned from Havana, today issued the following signed statement: "The work of unwatering the Maine so far proves nothing as to the origin of the ex-

UNREST IN CUBA

Attacks Made on President Gomez by Hostile Newspaper-Rumors of Uprising

HAVANA, July 6.-Attacks recently made on President Gomez by a newspaper which has shown much opposition to the administration apparently are beginning to assume importance Congressman Andrus, director of the newspaper El Dia, charged the president with the accumulation of a huge fortune during the two years of his administration.

The president has issued a statement giving an inventory of his estate, which shows it to be only of moderate dimensions, acquired prior to his assuming office. This action is deplored by his friends as weak and undignified and denounced by his enemies as an attempt to cover culpability.

The result of the controversy was shown today in a host of disquieting a brief but very heavy shower, rumors. The executive committee of which sent the thermometer scooting the Conservatives discussed the matdownward to 75 degrees.
