GERMANS RELEASE

DR. LIEBKNECHT

Paris, Aug. 11.—Dr. Karl Liebknecht, socialist leader in the German Reichstag, who was arrested in connection with the May Day demonstrations in Berlin in 1916, was liberated a fortnight ago by the German Government, through fear that he might die in prison. He is said to be suffering from tuberculosis, weighing only 84 pounds.

The authenticity of the above seems certain, says the Temps, Geneva correspondent, although the German newspapers in obedience to orders, kept silent regarding it.

The news says the correspondent, was brought here by a Hollander who had just arrived from Germany. He says the trades union organizations brought pressure upon the Government for the release of Dr. Liebknecht who is now in a private hospital and is not expected to recover, suffering in addition to lung malady, from mental depression, the result of imprisonment while in prison.
