SPOILED BY BAD WEATHER. BIG BLAZE AT LITTLE YORK. The Grand Trunk Railway Station Burned to the Ground. Four miles east of Toronto on the main line

f the Grand Trunk Railway is the village of Little York, a busy centre of railway work for that great undertaking. The passenger with walting room, ticket office and facilities as are afforded at the village

h facilities as are afforded at the village ions along the company's lines. Setween 2 and 3 o'clock yoetserday after-in there was nothing unusual at this quiet t, but shortly after there was general alarm in the village i the company's workshops. Singke, ra-iy followed by Hames, issued from waiting-room and office, and although all what they could in the awk-d circumstance is was seen from the that the wooden structure was doomed lestruction. Some books and papers were used but others proyed food to the flames. -1 1-16 miles, swee is and upward, \$1000 added. Kingsto alle D'Or 2, Carroll 3. Time 1,154. race-11 miles, handlcap sweepstakes

ward circumstance it was seen from the first that the wooden structure was doomed to destruction. Some books and papers were rescued but others proved food to the flames. The fire shot up and attracted a large number of persons to the spot. The work of the fire field was brief but conclusive and was not stayed till the station was burned down to the platform.
There is no fire brigade at the thriving village of Little York, nor at adjoining East Toronto, the nearest being the Bolton-avenue fire hall, three miles distant. To summon this section of the Toronto Fire Brigade was seen to be useless and nothing was left but to let the flames do their work.
Unfortunately the Grand Trunk Railway Company has no fire brigade of its own amonget the large number of workinen here employed. Probably yesterday's conflagration and the side on the instance of the other the station. Another desideratum will also doubtless be supplied—the erection of the solved to-day when the fire and more convenience would be a boon.
It is not definitely known how the fire arose, but the silve line work a moliget a session of the tooled or its a bound. Nor was the amount of the Grand Trunk Railway room the silve at the station which shall, Phoenix-like, inflammable station of the solved to-day when the Grand Trunk Railway yeas the solved to-day when the Grand Trunk Railway the silve of the other integer on the solved to-day when the Grand Trunk Railway was unable to throw any light on the circumstances attending the fire. One of the latest novelties in the applica-tion of electricity consists of an electricit read-ing-lamp, which is being fitted to the car riages on the main lune of the Southeastern Railway. It is on the principle of the "put-a-penny-in-the-slot" automatic machines. The apparatus is situated immediately over the passenger's head, and under the rack, and is contained in a small box 5 inches by 3. The light is of five-candle power, and is obtained by the introduction of a penny at the top of the box, and by a subsequent pressure of a knob, and will last for half an hour, ex-tinguishing itself at the end of that time au-tomatically. If the light be required for an indefinite period a penny every half-hour will suffice. The light can be extinguished at any moment by means of a second button provided for the purpose. account, in a pint of water. When a fresh laid egg is placed in this solution it will is descend to the bottom of the vessel, while one that has been laid on the day previous will not quite reach the bottom. If the egg be three days old it will swim in the liquid; if is is more than three days old it will float on the surface, and project above the latter more and more as they are older.

Uncle Sam's Pension Baiders, (From The Buffaio Coarier.) The most unconscionable birds That proy upon the Nation Are the Congressmen who advocate This pension legislation. To insure a re-election They work for pension grants For the voters and their sisters And their cousies and their sunts.

There Are Microbes in Cider. Dr. Oliver of Havre, France, advises people to be careful in driuking cider. It is made, as a rule, with stagaant water, the microbes of which do not perish during fer-mentation. On the contrary, the fever germs thrive upon the juice of the apple.

To thoroughly appreciate an article it is

To thoroughly appreciate an article it is necessary to compare it with others. Not until the "Athlete" made its appearance in the market were cigarette smokers enabled to judge of the vast difference that exists in to-baccos. Result—the "Athlete" in a very abort time proved its superiority by outselling the oldees and most extensively advertised brands of cigarettes in the market, notwith-standing the prizes (?) that ware offered as bast to those suffamiliar with this brand. Our sales are simply enormous and constantly in-creasing. The only inducement we offer smokers is a superior article at a fair price. D. Ritchie & Co., the largest oigarette manu-fasturers in Or 12
