

THE T. EATON CO.,
(LIMITED)
190 Yonge-street, July 6, 1895.
Store closes to-day at 2 o'clock—first of this Summer's half-holidays.

A Constant Procession

Some buyers in England are on the Continent; others outward bound; orders being sent by cable; new goods coming to us on every steamer—a constant round of activity, with ceaseless vigilance the watchword and greater usefulness the goal of all our ambition. We're not tied down to any maker or importer—can buy when and where we please, with a sole regard to your interests. The business is bigger than it was—stronger, better every way, and success continues to grow with what it feeds upon.

Shopping by Mail:

Immediately after stock-taking prices on many kinds of goods are usually reduced. The idea is to prevent a possible surplus in any stock and to keep assortments on an even average. That makes this an elegant time to do shopping, and out-to-do customers are entitled to all the benefits as much as though they shopped in person. Here are some of the goods we're selling most of:

- Heavy Jean Corsets, 14 inches length in front, fine corded, 5 hook, 2 side steel, tan colors, Special **35c** PAIR
- Children's Fine Print Pinafores, Mother Hubbard style, with full of print, 5 sizes **35c** EACH
- Ladies' American Shirt Waists, laundried front, cuffs and collar, pink, blue, mauve, colors and black and white stripes, Special **50c** EACH
- Woven wire camp cot, spring top, 6 feet long, 2 1/2 feet wide, folding legs and head rest, Special **1.25**
- Folding Camp Chairs, hardwood, oil finish, seat and back, Special **35c**
- Ladies' Leghorn Flop Hats, Special **19c**
- Ladies' White Chip Sun Hats, Special **10c**
- Boys' Black Ribbed Cotton Hose, fast black, in washing and wearing, all sizes, Special **10c** PAIR
- Ladies' Black Cotton Hose, fancy rib, warranted fast colors and stainless, with extra special heel, Special-Three pairs for . . . **50c**

Mail orders filled promptly and absolute satisfaction guaranteed. This store isn't unknown to you. Thousands and thousands of country people send to us for the goods they need, and city people stopping at summer resorts will be equally interested in shopping by mail. Watch this column regularly. We shall have news to print next week uncommonly worth your reading.

The special Dress Goods clearing on Monday next promises to be an interesting event. Three hundred pieces of the choicest goods in the market just arrived from Europe, all 42 and 46 inches wide. To be thrown on the dress counters Monday morning at 26c a yard. Many of these goods are usually sold at 60c. First comers get the first pick in these goods. Shoppers by mail who will leave their selection to our choice will be well suited.

The Canadian Office and School Furniture Company, Limited.
Preston, Ont., Nov. 26, 1894.
Dear Sir—It is now about three months ago since I first noticed that a cure of my rupture was being effected by the use of one of your Wilkinson Trusses, and now I am fully convinced that the cure is both complete and effectual. I have on several occasions within the last few weeks taken long walks without truss or support of any kind, and have every confidence that my rupture, which, as you are aware, was of a very severe description, is now permanently healed, and I can assure you that I feel deeply thankful for the beneficial results. I have already recommended your appliances to several of my friends similarly affected. Yours very sincerely,
J. H. MCKENZIE, Esq.

THE BLOOMER CONTROVERSY.

The use of the bicycle by women ought to be generally encouraged. The father should teach his girls to ride the wheel, because it affords them a pleasant way of taking the physical exercise that is so essential to healthy womanhood. The husband should spend his first surplus money in the purchase of a wheel for his wife. A daily spin of an hour or two will prove an admirable tonic for her nerves and be the means of reducing the family doctor bill. The amusement and pleasure afforded by the bicycle are superior to those derived from any other form of outdoor recreation. It is a tonic for both mind and body, and a tonic, too, that is followed by no injurious reaction. The bicycle is destined to become an integral part of the human individual. The modern artist will soon produce the picture of a veritable wheelman, after the idea of the centaur of the ancients. The wheel and the man will become so closely identified that the artist will find it difficult to create a man without the wheel, and by a touch of genius will blend the two into one creation, making it difficult to say where the man leaves off and the wheel begins.

THE GRASSHOPPER CROP.

3000 Bushels a Day Harvested by the Hop Machine.
St. Paul, Minn., July 5.—Prof. Otto Langner, State Entomologist, called at the Governor's office yesterday and made a report on the grasshopper killing in Chicago County with the hopper dozers. They have over 400 of these machines at work, and are gathering in 8000 bushels of grasshoppers daily. Thus far the hoppers have not invaded the grain fields. The frequent rains have kept the grass green and tender, and they have contented themselves feeding on this.

The Laborer Makes Good Time

The following official time of two Montreal steamers will be of interest. The Labrador left Quebec on Sunday, June 24, at 10 a.m., and passed the Rock light on Tuesday, June 25, at 8 a.m., while the Royal Mail steamship Laurentian, which left Quebec on Saturday, June 15, at 3 p.m., passed the Rock light on Wednesday, June 26, at 6.30 a.m. The Labrador made the trip in 8 days 23 hours and 30 minutes from Quebec to Liverpool, and the Laurentian in 10 days 15 hours, from Quebec to Liverpool, making a day 15 hours and 30 minutes in favor of the Labrador.

New Books.

"The Ladies' Juggernaut," by Archibald Clavering Gutter, just issued by the Toronto News Company, is one of the most interesting and amusing stories of an American social life, that has appeared for some time. The author, Archibald Gutter, is a native of the United States, and his book is a different way of an old bluffer and Scraphia. The book is good from first to last.

Long-Distance Identification

New York, July 5.—German Consul A. Engel, with the assistance of Detective Sergeant McElroy, of the New York City Police, has succeeded in identifying a man arrested in Frankfurt-on-the-Main two months ago as Horace Horan, alias "Lit-Horace," one of the greatest bank robbers in the world.

THE ICE CONTROVERSY.

There is a good deal to be said both for and against the free and indiscriminate use by the public of ice taken from any source whatever. If we allow ice to be harvested indiscriminately, we render it so cheap that people ought to be able to use it for cooling purposes in an indirect way, that is by not allowing it to come in contact with the article that is to be consumed. The Medical Health Officer has permitted certain dealers to use the ice from the ice making ice cream. We understand the ice is not brought into contact with the constituents of the cream and that it makes no matter whether pure or impure ice is used. If this is the case it would appear reasonable that no restriction should be placed on the ice cream manufacturer in regard to the ice he may wish to use. On the other hand, however, if we allow all kinds of ice to be sold, there will always be the danger of careless people mixing the ice directly with water, or putting it in contact with edibles and thereby contaminating these articles. Some saloons are still in the habit of cracking ice and putting it in the decanters for their thirsty patrons. The same thing is done with people who sell milk and other beverages. While the practice in this city is to allow ice of a suspicious quality to be used, everyone should insist on having any drink that may be served him, cooled indirectly by having the glass or bottle in which the drink is contained placed upon the ice. This is the safest plan of all, and if the public would adhere to this practice it would allow us to use ice taken from any source, and consequently render it cheap.

THE ISLAND WATER SYSTEM.

It appears that no waterworks system will be established on the Island this summer, at least, and if it were to be established it is some years yet before such a system will be erected. We do not put much faith in their statement, however, that the residents of the city will not use the water if it is furnished them. The cost of procuring water by windmill, which is the method used by many of the Islanders, is considerably greater than the cost of procuring water by windmill. The water furnished by the mill is obtained near the shore, and is always liable to be contaminated by the presence of dead fish and floating debris. We do not believe a proper business like canvass of the Island was made, because the people who have money enough to pass the summer on the Island are not a rule, the class of people who would not think twice about spending \$5 to secure water of undoubted purity. However, the Island residents have not much to complain of, because they can secure

the service if they exert themselves a little. As soon as they get the authorities to a considerable number of them are willing to pay for the service, we have no doubt the works will be established. We know that many private corporations will be only too glad to secure the privilege of supplying water to the Island people. If such a company could make money out of it, there is no reason why the city should not embark in the business. Over and above this consideration, there is the fact that thousands of citizens find themselves on the Island daily in the summer, and these are entitled to secure pure water there as well as on this side of the Bay.

ELECTRICITY AND STEAM.

The July number of The Street Railway Journal gives etiam it all the most complete statistics ever compiled of the number, miles, equipment and capitalization of street railroads. The most interesting fact shown by them is the extent to which electricity has displaced horse-power, and secondly, it is preferred to all other kinds of power. Of a total number of 13,588 miles of street railroads in the United States, 10,383 are electric and 3,205 are horse-power. 632 are cable and 670 have gas, steam, or other power. Five years ago doubtless these figures would have been very nearly reversed. The Journal also discusses exhaustively the question whether electric power can compete with steam in the operation of the street car in all forms of urban, suburban and local traffic electricity can and will. The triumph of electricity in suburban traffic and in local traffic between cities which are near together is considered equally certain. But the Journal thinks the day is far distant when electricity will displace steam in trunk-line railways, especially in the west.

HE STOLE THE DIAMOND PIN.

Arrested on Queen's Birthday, He Will Now Serve Six Months.
Joseph W. Smith, a native and citizen of Chicago, was convicted before Judge McLaughlin yesterday of the theft of a diamond pin from the person of James Perry.

Smith is the man who was arrested by Detective Black at the Woodbine road on May 24th on suspicion of attempting to steal a diamond scarf pin from Mr. McLaughlin's friend in Chicago. A commission to the Windy City did not assist the defence very materially, as the witnesses were all from Chicago. The pin was positively identified by the witness, who repaired the stone three weeks before it was stolen.

Interest and Pension Payments Will Amount to \$12,000,000

Washington, July 5.—The Treasury figures for the next week or two will show a large excess of expenditures over receipts, and Treasury experts figure that for the month the balance on the wrong side of the ledger will aggregate from \$1,000,000 to \$2,000,000. The excess at the beginning of this month, which will show in the daily statement of receipts and disbursements, is made up of the large payments made during the first few days.

Scandinavian Budget Passed.

Christiania, July 5.—The Storting today, a large majority, decided to reject the budget of Sweden for 1895, and to call for a new one. The estimates would be granted without any conditions. The diplomatic and consular budget of 60 to 45 and 72 to 42 respectively.

Educationists in Convention.

Denver, July 5.—The National Education Association opened its annual convention this morning. The first day of the convention was given to the National Council of Education, and the second day to the most prominent educators of the country.

Great Faith in It.

Dr. Sirs—A lady used Dr. Fowler's Extract of Wild Strawberry for years when required, and think it the best remedy to be had for all kinds of Summer Complaints. It has never failed in our family to cure any Summer Complaint, so we have used it for years. MRS. FRANK STEPHENS, Chatham, Ont.

Had for Smuggling Chinese.

Buffalo, July 5.—The case against Jerry O'Leary, from Toronto, to Niagara, and "Tut" Williams, the negro barber who hailed from the same city, charged with smuggling Chinese into the country, and Quong Sing, charged with harboring illegally entered the country, was concluded in its initial stage, being held without bail.

UNGRATEFUL CIVIC EMPLOYEES.

Charges That They Do Not Support the Trades Council.

At last night's meeting of the Trades and Labor Council the report of the Municipal Committee drew attention to the fact that not only were the carpenters in the employ of the Ontario Government ungrateful to the Council, but numerous bodies of workmen, notably city employees and members of the Fire Department, render no assistance to the Council, but never fail to turn for assistance to it when they desire to secure some benefit.

Charge of Breach of Contract.

The committee further reported that the Tailors' Union had secured evidence that the contractors for fireman's clothing were not living up to their agreement. They had a written declaration of one of the workers on the garments in the effect that who had been paid under contract 70c per pair for making fireman's trousers, whereas the tender called for the payment of \$1.20 per pair.

Other Grievances.

The Legislature's action on the Government buildings at Victoria, B.C., sent outers who had brought from 2000 miles to work were discharged after serving but a day or two.

The Action of the Presbyterian General Assembly in asking that the restriction be taken off the Chinese was completely ignored.

Delegates George W. Dover protested against the printing of the Pan-American Congress having been done in a non-committal way.

HE STOLE THE DIAMOND PIN.
