A Bret Harte Joke.

Sam Davis of Nevada once made a wager that he could successfully imitate the style of any living or dead poet and do it so thoroughly that the difference was not discernible and that the public, the press and the critics would not detect the fraud. As a result he wrote "Binley and 46," to which he signed F. Bret Harte's name. The fake was put out in a publication known as the Open Letter. It described an engineer who took his train through a snowstorm in the Sierras, dying at his post. From the Atlantic to the Pacific the poem was copied. "Binley and 46" was given a full page in Leslie's Weekly, with a portrait of Bret Harte, and described as "the best short poem of the decade." It was many years before Mr. Harte denied its authorship. The poem has since been incorporated in several books of popular recitations, notwithstanding Binley freezes to death beside a roaring locomotive furnace, with 150 pounds of steam up and two cords of wood within reach.

No Surprises In Dreams No one is ever surprised in a dream. 'A man dreaming is at one moment bathing in the sea and at the next moment soaring in a balloon, but the sudden and inexplicable change does not surprise him, nor is he surprised to meet in the flesh friends long dead, nor is he surprised to find himself doing deeds that really are beyond him. The reason is that dreamers have no memory. In real life to be pursued through the streets by a lion would be astonishing, but this accident would be accepted in a dream as horrible, but quite commonplace, the memory not being there to say that it it is unheard of for lions to pursue one in cities. In the same way, in dreams, men are not surprised to find themselves ballooning because they don't remember that they were never up in a balloon before, and they are not surprised to find themselves conversing with dead people be-cause they don't remember that these people are dead.

How He Remembered It.

When they met on Chestnut street after some months in which they hadn't seen each other the one chap told the other he had taken a little house in Germantown and was there with his lares, penates and coal bill. "Come up and see me some evening-any evening. We're rarely out, you know and, then, we have a telephone, so you can let us know when you're coming."

"I suppose your name is in the telephone directory?" queried the other. "Well, no, not yet, as we've just got the telephone, but our number is-isreally it's funny, but just this minute I can't—it's something like— Ding it all, it's strange I forget that number. for just on purpose I multiplied it by two and divided the result by four, so as to enable me to remember it, and I can't recall the first thing about it. Ever know the like? I'll write you the

S. E. THOMPSON.

BY-LAW NO. 2, 1906.

A Ry-law to repair the drain from lot 12, in Township of Warwick, westward to out-let, along the Boundary line between the Township of Brooke and Warwick, in the

County of Lambton.

Whereas complaint has been made to the Municipal Council of the Township of Warwick by residents of said Township that the ditch or drain along the Boundary line between said Township and the Township of Brooke is out of repair.

And whereas said ditch or drain was originally constructed and improved partly by funds of both Townships interested, and partly by statute labor and subscriptions from parties benefitted.

And whereas the said Council of the Township of Warwick acting under Section 76 of the Municipal Drainage Act, has procured an examination to be made by C. A. Jones, Esq., D. L. S., being a person competent for such purpose of the ditch or drain proposed to be repaired and of the lands and roads liable to assessment under the "Municipal Drainage Act" and has also procured plans, specifications and estimates of the drainage work to be made by the said C. A. Jones, Esq., and an assessment to be made by him of the lands and roads to be benefitted by such drainage work and of other lands and roads to be benefitted by such drainage work and of other lands and roads liable for contribution be benefited by such drainage work and of other lands and roads liable for contribution thereto, stating as nearly as he can the proportion of benefit, outlet liability and injuring liability, which in his opinion will be derived or incurred in consequence of injuring liability, which in his opinion will be derived or incurred in consequence of such drawage work by every road and lot or portion of lot the said assessment so made being the assessment hereinafter by this By law enacted to be assessed and levied upon the roads and lots or parts of lots hereinafter in that behalf specially set forth and described and the report of the said C. A. Jones, Eq., in respect thereof and of the said drainage work being as follows:

To the Municipal Council, Township of War-

Petrolea, Jan. 16th., 1006.

as to enable me to remember it, and I can't recall the first thing about ft. Ever know the like? I'll write you the number."

Clothes and Conduct.

Every man and every woman feels the influence of clothes and appearance upon conduct. You have heard of the lonely man in the Australian bush who always put on evening dress for dinner so that he might remember he was a gentleman. Addison could not write his best unless he was well dressed. Put a naughty girl into her best Sunday clothes, and she will behave quite nicely; put a blackguard into khait, and he will be a hero; put an omnibus conductor into uniform, and he will live up to his clothes. Indeed, in a millennium of free clothes of the latest fashion we shall all be archangels.—London Chronicle.

Diagnosis of Headache.

"There are more than fifty kinds of headache," said a physician, "and said, ferers from the more common forms may cure themselves by locating the cause and treating themselves accordingly. The more frequent forms are a dull pain across the foreshead, due to dyspepsia; a pain us the back of the head, due to the liver; a bursting pain in both temples, due to mainutrition, an ache on the top of the bead, ach only a weight pressed on the skull, due to overwork; an ache between the brows just above the base of the nose, due to eye strain."

Stale Bratin.

Of course there is no future for stale brains or for a man who stands still and ceases to grow. He is old who thinks he is old and useless who th

where it enters the Main Drain at station 113½ on same where, as above mentioned, it crosses from the south to the north side of the highway. This makes a total of 1292 rods in both.

The culverts across the townline at stations 53½ and 113½ are both in good condition and being comparatively new ones and of sufficient size will not require any work done on them, the one opposite the 6-7 side road of Warwick is in very fair condition and wide enough, but the covering is about a foot too low and will require to be raised.

In my estimate of the cost of the proposed work, I have not included the construction or repair of any of the culverts or bridges over the drain leading from the private land to the high way as all the parties, either prefer or are agreeable to build-or repair their own bridge or culvert and I have kept this fact in view in making my assessment on the lands affected for the cost of the work. There should, however, be a certain uniformity in these bridges or culverts and I would recommend that where they are built with posts and stringers they conform 40 the following regulations, viz:—

St. 0 to 52 they be at least 5 ft. wide [and 3½ ft

St. o to 52 they be at least 5 ft. wide and 31/2 ft high in clear.

St 210 14 they be at least 6 ft wide and 3½ ft high in clear.

St 114 to 154 they be at least 7 ft wide and 3½ ft high in clear.

St 154 to 756 they be at least 8 ft wide and 3½ ft high in clear.

St 154 to 276 they be at least 8 ft wide and 3½ ft high in clear.

Should they be built with long stringers resting on the ground at the edge of the drain, the ends of the stringers should project at least 2 ft beyond the edge of the drain and the underside of the stringers be at least 3f 9 in above the bottom of the drain.

Many of the present bridges I find are even larger than the minimum I have specified particularly in the lower portron while some of them at the upper end are smaller, but where they are new they might be left for a time to test whether or not they are capable of carrying the water. The one at st. 179 opposite the west ½ lot 6 is a comparatively new one but is about a foet too low and should be raised and the one at st. 1792 opposite the east ½ lot 5 is also too low and if not replaced with a new one should at least be raised to the required height.

I have prepared plans, profiles and specifications of the proposed work and schedule of assessment on the lands affected all in duplicate, one copy being for service on the Township of Brooke and all of which I herewith submit.

SCHEDULE OF ASSESSMENT.

SCHEDULE OF ASSESSMENT.

Total Assessment, Brooke and Warwick \$1018.00 SPECIFICATIONS, The drain is to be dug to the depths and dimensions shown and figured on the accompanying profile with sides sloped 1 horizontal to a vertical and the bottom an even grade between stations.

stations.

The finished depth of the ditch is to be measured from the ground beside the stake on the side next the drain.

Should any error appear in the figured depth at any stake the grade of the bottom is to be made to conform with that shown on the profile. From st to 276 on the Main Drain and o, to 3s on the Branch, all the earth is to be cast between the drain and the fence and evenly spread, at least 3 ft clear of the edge of the drain when practicable. From st 276 to 282 on the Main Drain the earth is to be cast about equally on each side of the drain and from 28z to 28z tis to be placed in the lowest ground, filling the old channel where it is abandoned by the new course of the drain.

channel where it is adaptation of the drain.

The covering of the bridge or culvert opposite the 6-7 sideroad of Warwick is to be raised 1 foot and made perfectly solid again.

All the work to be done to the entire satisfaction of the Commissioner in charge of the work.

I have the honor to remain,
Your obedient servant,
C. A. JONES, O. L. S. & C. F.

And whereas the said Council are of opinion that the repair of the said drain is necessary and desir-

And whereas the aaid Council are of opinion thas the repair of the said dunicipal Council of the said Township of Warwick pursuant to the provisions of the Municipal Trainage Act enact as follows:

1. The said report, plans, specifications, assessments and cestimates are hereby a topted and the drainage work as therein indicated and set forthshall be made and constructed in accordance therewith.

2. The Reeve of the said Municipality may borrow on the credit of the Corporation of the said Township of Warwick the sum of 150 dollars being the Municipality' proportion of the funds necessary for the work, and may issue debentures of the Corporation to that amount in sums of not less than 50 dollars each and payable within five years from the date thereof with interest at the rate of 4 per centum per annum, that is to say, in 5 annual payments such debentures to be payable at the office of the Township Treasurer and to have attached to them coupons for the payment of interest.

3. For paying the sum of \$179.25, the amount charged against the said lands for benefit and the sum of \$90.475, the amount charged against said lands as Outlet Liability, apart from lands and roads belonging to or controlled by the Municipality and for covering interest thereon for 5 years at the rate of 4 per centum per annum the following total special rates over and above all other rates, chall be assessed, levied and collected (in the same manner and at the same time as other taxes are collected) upon and from the undermentioned lots and parts of lots and the amount of the said total special rates over and above all other rates, shall be assessed, levied and collected (in the same manner and at the same time as other taxes are collected) upon and from the undermentioned lots and parts of lots and the amount of the said total special rates over and above all other rates, shall be assessed, levied and collected in the said safered and interest against each lot or part of let respectively lyshall be divided into five equal parts and one such part shall be assessed, levied and collected as afo said in each year for 5 years after the final pass of this By-law during which the said debentu
