

Farming.

A PAPER FOR FARMERS AND STOCKMEN.

Managing Director, D. T. McAINSH.
Editor, J. W. WHEATON.

Farming is a paper for farmers and stockmen, published weekly, with illustrations. The subscription price is one dollar a year, payable in advance.

Postage is prepaid by the publishers for all subscriptions in Canada and the United States. For all other countries in the Postal Union add fifty cents for postage.

Change of Address.—When a change of address is ordered, both the new and the old address must be given. The notice should be sent one week before the change is to take effect.

Receipts are only sent upon request. The date opposite the name on the address label indicates the time up to which the subscription is paid, and the change of date is sufficient acknowledgment of payment. When this change is not made promptly notify us.

Discontinuances.—Following the general desire of our readers, no subscriber's copy of **FARMING** is discontinued until notice to that effect is given. All arrears must be paid.

How to Remit.—Remittances should be sent by cheque, draft, express order, postal note, or money order, payable to order of **FARMING**. Cash should be sent in registered letter.

Advertising Rates on application.

Letters should be addressed:
FARMING,
CONFEDERATION LIFE BUILDING,
TORONTO.

Stock Notes.

A FINE POULTRY EXHIBIT.—Mr. Will Secker, of Dunbarton, Ont., who claims the distinction of having the largest poultry yards in Canada at the present time, made a very fine exhibit at the Industrial this year. The varieties bred by him include White Wyandottes, Buff Leghorns, White Indian Games, Rhode Island Reds, Brown Leghorns, Anconas and Buff Plymouth Rocks. The Rhode Island Reds are a new breed in Canada, though well known in some parts of the States. They are a beautiful color, of good size, are a grand table bird, good winter layers, the eggs being large and brown in color. These fowls develop very early, and Mr. Secker shows a five-months-old pullet which is laying regularly. The excellence of Mr. Secker's stock may be estimated by the fact that out of twelve entries he was awarded no less than ten prizes.

Publishers' Desk.

Wild Razor-Back Hogs.—The wild hogs, from Indian Territory, U.S., shown by the American Steel and Wire Co., of Chicago, are one of the features of the fence exhibits at this year's fairs. Their appearance indicates an ability to go through or over anything less effective than the kind of fence this company supplies.

R. A. Lister & Co.'s Exhibit.—There was no exhibit at the Industrial this year which attracted more attention or created more interest than that of Messrs. R. A. Lister & Co., Limited, of Montreal. They showed a complete line of dairy supplies, including the "Alexandra" and "Melotte" Cream Separators, Milk Scalders and Raisers, Lister's New Turbine Pasteurizer, and Pasteurizing Plant, Lister's Cylindrical Refrigerators and Coolers, the "Facile" Hand Babcock Tester and Improved Iron Frame Steam Turbine Babcock Tester, a new and improved combined Churn and Butter Worker, the Alexandra Cream Turbine Separating Plant, the "Dairy Farmer" Creamery Pump, the New Lister Creamery Pump, etc. The machines which appeared to create the greatest interest amongst the farmers were the cream separators. The consensus of opinion seemed to be that the "Melotte" Separator was the handsomest and most perfect piece of mechanism ever exhibited at a Canadian Exposition. The firm claim that this machine has beaten all other competitors in public working trials eight times, and many experts consider that it

Reference—Mr. W. H. Dempsey, Bay of Quinte Apple Experimental Station, Trenton, and many others.

The Ashes of Wheat

Are 76 per cent. Phosphates

By far the greatest portion of which is Phosphate of Magnesia. The requirements of an acre of average crop of clover are 25 per cent. more phosphate than wheat or other grains and 75 per cent. more magnesia, and an acre of turnips requires over 50 per cent. more Phosphate than the grains.

Thomas-Phosphate Powder

(REGISTERED)

is the safest manure to meet these demands, as it supplies Phosphate of Magnesia as well as Phosphate of Lime and of Iron. Faithful experiment has shown that Thomas-Phosphate increased the yield of mutton by 175 per cent., whereas the hay yield has only increased 50 per cent. Turnips properly phosphated have also shown greatly increased feeding value.
