

She passed within an inch of it several times, but seemed not to see it. After a minute or two one of the other combatants (as I suppose) alighted and resumed the fight, but soon left again. At this time, as I feared that the last one was about to leave also, I captured her. Whether the hole was of her own making in the first place, or belonged to one of the other contestants, or to none of them, I had no means of ascertaining; but there was evidently a bold attempt at robbery somewhere in the incident.

Brookings, So. Dak.

EXCURSION.

The entomologists of New York, Brooklyn, Newark, Philadelphia and localities near these cities are invited to attend the second annual field meeting to be held under the auspices of the Entomological Societies of the cities at Jamesburgh, N. J., on July 4th, next. Jamesburgh is on the Amboy Division of the Pennsylvania R.R., and may be reached from N. Y., *via* Monmouth Junction, at 7.20 a. m.; Newark, 7.50 a. m.; Philadelphia, Broad St., 6.50 a. m.; Camden, 7.00 a. m. Later trains leave N. Y. *via* Rahway and Philadelphia, on the Long Branch Division, but it is urged that the early train be used, as this will bring the party into Jamesburgh at the same time. All those desiring or expecting to attend will please notify one of the members of the committee, from whom also further information can be obtained. The notification is important, in order that proper arrangements may be made at Jamesburgh. Committee:—C. P. Machesney, 65 Broadway, N. Y.; Dr. Hy. Skinner, Amer. Ent. Soc., Logan Sq., Philadelphia; Prof. J. B. Smith, New Brunswick, N. J.; H. W. Wenzel, 1117 Moore St., Philadelphia, Pa.

A CANNIBAL CRICKET.

On September 11th, 1889, I observed, on a grassy slope, a short distance north of this city, a large ♀ black cricket, *Gryllus neglectus*, feeding on a recently killed ♂. I observed her carefully for a few minutes. There was a large wound on the side of the abdomen of the ♂, and she was greedily eating the semifluid and soft parts. She was not easily alarmed, being very intent on her meal; but, when I disturbed her with the handle of my net, she seized hold of her gentleman friend and lugged him away several inches and again resumed her meal. On the same slope, a few yards away, I observed another ♀ gnawing at the thorax of what most likely was a ♂.
