

Kola-Cardinette

“It Props the Heart Nicely.”

A physician speaks in this unique way of one of the therapeutic properties of **Kola-Cardinette**.

“The stimulant effect of this preparation upon the cardiac muscle is well marked. Unlike many heart stimulants, however, **Kola-Cardinette** does not induce a subsequent reactionary depression. While it is a prompt and reliable stimulant it is also a permanent systemic and nerve tonic. The Cereal Phosphates with which the Kola is combined, serve to fortify the muscular and nervous system and in this way retain the heart-strength which the Kola induces.”
