

A Story In Chapters

I.

Furnace properly and carefully installed.

II.

With great ease water is placed in water-pan, drafts opened and coal fire started. Fire soon burns up brightly, drafts are closed and check-

draft opened. Immediately heat-power begins to penetrate dome and radiator surrounding dome. The incoming cold air immediately receives the energy of this heat-power, and by natural law ascends up the hot-air pipes, thence to rooms. No gas escapes into cellar or rooms because there is an automatic gas damper providing for its escape up the chimney.

III.

In the morning a gentle rocking of the lever removes all ashes from grates. No dust in operator's face, for he first opened damper into dust-pipe leading from ash-pit, then direct draft at smoke-pipe entrance, and all dust passed up dust-pipe to dome, then out chimney.

IV.

No need to shovel any ashes away. All nicely settled in ash pan ready to be quickly and easily removed from pit. On coming upstairs operator finds that he requires no whisking off, and his wife don't scold him for "making everything white."

IV.

Operator is delighted. When asked the name of his furnace, he proudly said,

Sunshine
