Fax: (519) 452-3032

**Contact:** John Gallant  
President

### Products/Services

Manual infant resuscitator

### Company Summary

NeoMed Company Inc. was established in 1988 to develop and manufacture innovative respiratory products for the international market, with emphasis on the neonatal and infant segment. Patented in North America, the NeoVO<sub>2</sub>R is the world's first volume controlled resuscitator that also reduces hyperventilation and mean airway pressure. Completely portable and easy to clean, it allows complete standardization of manual resuscitation for neonates and infants. Product studies conducted at the Children's Hospital, University of Western Ontario and several other major medical centres have shown the device to be safe and effective.

### Products/Services

Cervical collars • Ankle, knee, neck and wrist braces

### Company Summary

Established in 1986, Newcross International Ltd. specializes in the development, manufacture and distribution of orthopedic braces for preventive or post-injury care. The company's research and development department has introduced several innovative products, such as coloured cervical collars and a bracing system used in manufacturing plants to reduce repetitive motion injuries. All products are available for over-the-counter use and are designed for ease of comfort and minimal care.

### Products/Services

Radioisotopes • Radioactive sources • Research irradiators • Cobalt-60 • Radiopharmaceuticals • Gamma radiation sterilizers

### Current Export Markets

U.S.A., Europe, Asia, Latin America, Africa

### Company Summary

Founded in 1952, Nordion International Inc. (formerly AECL Radiochemical Company, a subsidiary of Atomic Energy of Canada Ltd.) is a leading international supplier of nuclear-based industrial and medical products, serving the radiation processing and nuclear medicine markets. Approximately 93 per cent of the company's sales are exported to more than 100 countries. Nordion produces about half of the world's gamma radiation processing equipment and supplies most of the world's cobalt-60. For its hardware products the company offers complete turnkey systems from consultation and design, to manufacturing, installation and training. Nordion employs 400 people in three Canadian locations (including the Canadian Irradiation Centre in Laval, Quebec).
