

- The United Nations could provide greater assistance, advice and technical expertise to negotiators in the regional arms control and disarmament process with a view to combining international mechanisms with regional measures for verification (e.g., the control system of the Treaty of Tlatelolco, which utilizes safeguards from the International Atomic Energy Agency (IAEA) as well as the control measures provided by the Agency for the Prohibition of Nuclear Weapons in Latin America (OPANAL)).
  
- On a responsive basis, the United Nations might involve itself in the formulation and execution of verification provisions within agreements. Where a need exists, the United Nations should be prepared to help bring together verification expertise and encourage states to develop procedures through which this expertise can be applied in actual agreements.
  
- Given the appropriate flexibility, the United Nations could secure a stronger role in future regional arms limitation agreements. Should one or more arms limitation agreements be developed in any one region for which a space-based remote sensing
