Cardinal Cavallari was born at Chiogga in 1849\ and was raised to the cardinalate in 1907. He was noted for his simple piety. On various occa-sions he expressed himself volubly against the immodest dress of women and once is said to have stopped a church service in order to make a woman worshipper cover her open vork shirtwaist.

In January of this year he issued an episcopal letter strongly condemn-ing the tango dance, declaring that only "those persons who have lost all moral sense can endure it." He order-ed all the ecclesiastics to deny absolution to those who, having danced the ango, did not promise to discontinue the practice.

Dairying.—Taking the situation generally the dairy industry has been in good condition. Butter appears to be gaining in popularity on cheese in most sections of the province, altho in the St. Lawrence and Ottawa counties and elsewhere in the east cheese is perhaps more than holding its own. The quality of dairy products has been kept well up to the mark, in butter especially, and on the whole prices have been satisfactory. Timely fall rains renewed pastures to a remarkable degree, and the fall flow of milk has been ahead of the average at this season. Holsteins, Durhams, Ayrshires and Jerseys are the favorite dairy cows, the first-named breed being preerred for cheese factories.

What is Your Wife's Salary?

Don't think the question abourd. We see to to emphasize the fact that wives do not get salaries: they just work for their board and clothes. They can't lay aside anything for times of sickness or old age. Their husbands are supposed to do that for them.

It is pretty selfish of a man not to make proper provision for his wife in the event of his sudden death. To be sure the law gives her a definite portion of his estate; but supposing he leaves no estate. Business risks, bad investments, hard times, lumnies—these may leave her penniless.
