SEXUAL SCIENCE;

INCLUDING

MANHOOD, WOMANHOOD,

AND

THEIR MUTUAL INTER-RELATIONS;

LOVE, ITS LAWS, POWER, ETC.

By Prof. O. S. Fowler.

"Sexual Science" is simply that great code of natural laws by which the Almighty requires the sexes to be governed in their mutual relations. A knowledge of these laws is of the highest importance, and it is the general ignorance of them which swells the list of diseases and misery in the world, and wrecks so many lives which would otherwise be happy.

THE WORK TREATS OF LOVE-MAKING AND SELECTION, showing how love affairs should be conducted, and revealing the laws which govern male and female attraction and repulsion; what qualities make a good, and a poor, husband or wife, and what giver persons should select and reject; what forms, sizes, etc., may, and must not, intermarry.

OF MARRIAGE, its sacredness and necessity, its laws and rights; of perfect and miserable unions; and of all that it is necessary to know concerning this most important relation in life.

OF BEARING AND NURSING.—This portion being a complete encyclopedia for prospective mothers, showing how to render confinement easy, and manage infants; every young wife requires its instructions as affecting her embryo.

OF SEXUAL RESTORATION.—This is a very important part of the work; because almost all men and women, if not diseased, are run down. The laws of sexual recuperation are here, for the first time, unfolded, and the whole subject thoroughly and scientifically treated; giving the cause and cure of female ailments, seminal losses, sexual impotence, etc.

And Tells how to promote sexual vigor, the prime duty of every man and woman.

How to make a right choice of husband or wife; what persons are suited to each other.

How to judge a man or woman's sexual condition by visible signs.

How young husbands should treat their brides; how to increase their love and avoid shocking them.

How to avoid an improper marriage, and how to avoid female ailments.

How to increase the joys of wedded life, and how to increase female passion.

How to regulate intercourse between man and wife, and how to make it healthy to both; ignorance of this law is the cause of nearly all the woes of marriage.

How to have fine and healthy children, and how to transmit mental and physical qualities to offspring.

How to avoid the evils attending pregnancy, and how to make child-bearing healthy and desirable.

How to prevent self-abuse among the young, and how to recognize the signs of self-abuse and cure it.

How intercourse out of wedlock is injurious; a warning to young men.

How to restore and perpetuate female beauty, and how to promote the growth of the female bust.

How to be virtuous, happy, healthy and useful, by a rigid compliance with the laws of sexual science.

There is scarcely a question concerning the most serious duties of life which is not fully and satisfactorily answered in this book. Such a work has long been needed, and will be found invaluable to every man and woman who has arrived at years of discretion. It should be read especially by the married, and by those who have the care of children, and it will carry happiness with it wherever it goes, by diffusing knowledge on those subjects concerning which it has, until now, been almost impossible to obtain reliable information. The book is pure and elevated in tone; eloquent in its denunciations of vice; and forcible in its warnings against the secret sins which are practiced with impunity even in the family circle.
