

WORK COUNTY

NORTH TORONTO.

NORTH TORONTO, June 16.—(Special.)—Among the members of the town council to-night there is a well founded belief that the visit of the board of control, or at least two members of it, Messrs. Hocken and Church, and the city council has appreciably strengthened the chances for annexation.

Mayor Brown and Councilors Mutton, Reid, Howe, Lawrence, and Patterson, together with Engineer James, were all included in the party, and their enthusiasm for the closer union of the municipalities was manifestly contagious and undoubtedly had a big influence. Not that any of the party were especially committed, but there was little deep-seated opposition to the scheme shown.

The city men were agreeably surprised at the size and character of the town schools, as well as at the air of thrift and refinement everywhere apparent. The urgency of the case in respect to Mount Pleasant Cemetery parallel road was pointed out and the gravity of the situation apparently realized.

Although while all the members of the board of control and the city council do not take advantage of the occasion to see the latest suit for annexation filed, the attitude of Mayor Brown and the other members of council to-night is indicative of the progress of an early consummation of the project.

MARKHAM VILLAGE.

MARKHAM VILLAGE, June 16.—(Special.)—It looks as if all roads will lead to Markham Village on July 12. The meeting of the directors of the Markham Fair a few days ago, is said to have caused a lively breeze and one director quit the meeting after tendering his resignation.

The Ladies' Aid of the Markham Christian Church will hold their next meeting at the home of Mrs. Frank Nickschander, Church-st., on Wednesday afternoon, June 21, at 2 o'clock.

The McLean farm, lot 12, con. 7, between Eglinton and Markham, will be offered for sale to-morrow, Saturday, at the Tremont House, Markham, at 2.30.

SWANSEA.

Rig Smashed, Horse Killed, But Nobody Injured.

SWANSEA, June 16.—(Special.)—While John W. Clarke of Mimico was driving along Lake Shore-rd., last night, his carriage was run into by Frank Burrows of Roncesvalles-ave., the rig demolished and the horse so badly injured that it had to be shot. The fact that an aut., a street car, a heavy wagon and Mr. Clarke's rig all met at once is accountable for the accident. Nobody was seriously hurt.

WYCHWOOD.

WYCHWOOD, June 16.—(Special.)—At a meeting of the members of the local Presbyterian Church, Hugh Ward and John Dunlop were elected elders, and the ordination service will in all probability take place at the close of the Sunday evening service.

VICTORIA SQUARE.

Looks as Tho Today Will See Big Gothering Here.

VICTORIA SQUARE, June 16.—(Special.)—Everything is in readiness to-night for the biggest and best garden party ever held in Victoria Square, and if weather conditions are favorable, and it looks as tho they would be, the village will see the biggest gathering in its history. The party will be held at 8 o'clock, and the presence of the Markham L.O.O.F. Band, Maple Leaf Methodist Church, Choir, and the Messrs. Miriam and Mabel Gould all constitute an attraction that will be hard to resist and ought to draw a big crowd. There will be refreshments, music, and ladies will provide tea. Victoria Square for Saturday afternoon and evening.

NEWMARKET.

News Notes From Town and Country.

NEWMARKET, June 16.—(Special.)—A meeting of the hook and ladder company will be held at the firehall on Wednesday evening next.

North York is not very far behind the Niagara district when fine large luscious strawberries can be brought to maturity by June 2, and that is what William Tansley of the 5th concession of East Gwillimbury has done.

The Brown boys of the Methodist Sunday School will hold a strawberry festival on the handsome grounds of R. F. Schmidt, on Monday evening, June 20. The Aurora band will furnish the music and the proceeds will go toward raising funds for the new gymnasium in the Methodist Church.

The agricultural excursion to Penetang on Tuesday next promises to be well-attended.

Diethyl-Deputy Sommerville of Toronto will make an official inspection of the local A.O.U.W. during the week. Farmers report the fall wheat heading on nicely, but the straw is short.

W. E. J. Edwards, B.S.A., the new teacher for the agricultural department of the high school, is now fairly installed in his new duties, and from the vim and go shown bids fair to make it a great success.

The sporting edition of The Toronto Sunday World can be obtained at the store of Mr. McKay, Newmarket, every Saturday evening. Those who desire to procure a copy will do so to leave their order with Mr. McKay, 50 to 52 Adelaide-st. As this week's course ends delivery. As this week's course ends delivery.

PICKERING MEDICAL, SURGICAL AND X-RAY INSTITUTE.

PICKERING, ONTARIO.

R. BLAIN, FOWLE, M.R., M.D., C.M. Pickering, Ontario.

Specialist in Rectal Diseases, Prostatic Diseases of Men, Diseases of Women, Cancer of the Uterus, X-Ray examination. Diseases of eye, ear, nose, throat and lungs. Fitting glasses and all acute and chronic diseases.

Office Hours, 12 to 3 and 7 to 9.

BANDS CAN PLAY SUNDAY

IS MAGISTRATE'S RULING

Bandmasters Acquitted in Court—Crown Attorney Took Responsibility for Prosecution.

Bands may play on Sunday at Scarborough Beach and at the island just as the Salvation Army band may play in the streets or orchestras in churches, for the bandmen are not laborers, artificers or any other kind of folk, who may not follow their ordinary callings upon the Sabbath. These men are artists and therefore thousands of people who show that they want to hear Sunday music in the open air because they go and hear it are not to be deprived of this pleasure by those who do not think it is good for them.

This was decided in police court yesterday morning by Magistrate Kingsford, who tried the bandmasters of the organizations playing at the resorts named. He heard the evidence of city bandmasters, who swore they were not laborers or workmen. H. H. Dewar, K.C., for the defence, asked whether the magistrate was to assume the responsibility.

Will Enforce Law.

"I think the rule of 'just and general application' is agreed to, and I agree entirely with Mr. Dewar and being a bit of a musician myself, I think I can do so with some authority," said his worship. "But I wish the newspapers to be quite fair in the matter so far as the authorities are concerned. They are there to enforce the law when they believe there is an infringement. The case is dismissed."

Several ministers were in court during the hearing of the case, and left without comment.

The crown authorities have drawn a distinction between the local regimental bands that give Sunday concerts and the two other bands which were before the court yesterday morning.

"Up to the present time they have been breaking the law," says the staff inspector, when asked whether the local bands could give Sunday concerts.

"It is only a question of interpretation of the law," said Crown Attorney Corley. "So far the local bands have not broken the Lord's Day because they are not following their daily vocation."

NO "CONSCIENCE CLAUSE"

Everyone Must Be Vaccinated, Says Montreal Ordinance.

MONTREAL, June 16.—The Anti-Vaccination Society of Montreal has been awakened into activity by the recent vaccination legislation passed by the city council. The ordinance provides for the compulsory vaccination of all children under 16 years of age. There is no "conscience clause" and the only exemption is by a doctor's certificate testifying as to physical inability to undergo the operation.

The society will send literature throughout the city and provide for the delivery of lectures. Several doctors are with them in their fight.

The society will send literature throughout the city and provide for the delivery of lectures. Several doctors are with them in their fight.

Change shifts in the shafts are worked. Two air drills prepare the rock for blasting, and will be used to sink the two shafts to the 100-foot level and cross-cut the 700 feet of the ridge that lies between the two holes.

"RUNNING THE HOUSE."

If 40 in every 100 among American housewives still supply their families with home-made bread, it is one of the most encouraging facts in reach of optimism. It is not less encouraging because this estimate comes from the Missouri Master Bakers, who insist that modern housewives do not know how to bake. They claim that home-made bread is superior to the bad temper which the public shows in dealing with some master bakers.

In this connection, as in others, there is such a trading of words as to swell the number of loafers resulting from the process.

Every hundred bakers know how to make good bread, and do make it. At its best, however, there is no fancy or education in the art of baking who bakes the best bread possible does not learn to manage a family unless he learns it in some other way.

The housewife who bakes the best home-made bread, is learning to manage her own family. She is getting a complete, all-round education in "running the house." Usually she learns to do it in her own way, so as to convince everybody in the house that her way is the best. Then they rise up and call her blessed—in at least the third and fourth generation after her.—St. Louis Post-Despatch.

DEAL WITH A BIG "IF"

Island Smelter May or May Not Be Formed Into New Promotion.

Another market movement in Island Smelter was started yesterday. Sir Donald Mann is negotiating for the company's patent, but there is a big "if" before the deal is completed.

Practically all the stock, except a little block of Treasury loaned, a few weeks ago, is tied up in transfer, and so much confidence should be placed in quotations. No bid could be obtained for the pooled stock when offered on Wednesday, and rumors that the shares will have a valuation of \$2 a share in the formation of a new \$10,000,000 company will be heavily discounted by those who have participated in the length of time in stock market operations.

Too Much.

"If you're in London for the coronation be sure and put your shoes on the day before last night, and you'll get a free shine."

The speaker was Simeon Ford, New York's famous humorist. He continued:

"You always put your shoes on. A shine costs you nothing, but you don't know the time last summer did not know this. New York put up at a good London hotel, and I was in a room with a knock at my door."

"You haven't put your boots outside, sir," said a voice.

"No, you bet I haven't," said Bill. "They're under my pillow, and there you see, I know a bit too much for the likes of you. Good-night!"

No Comment.

A faker passed through a small town selling pumps, which he claimed would force water without any pipe. A native bought one and sweated at the handle, but no water appeared. He asked for an explanation.

"Why," said the faker, as he drove on, "the sucker is at the wrong end of the pump."—Metropolitan Magazine.

INTELLIGENT MINING

AT PRESTON EAST DOME

New Quartz Deposits Discovered in Surface Work—Diamond Drilling at 400 Feet.

PORCUPINE CITY, June 12.—(From Our Man Up North.)—With both air and diamond drills puncturing the rock at the Preston East Dome, to determine results at a greater depth, work at the beginning of the second week in June stood as follows:

Shaft No. 1 on same ridge in prospect, down 100 feet; cross-cut to be run at the 100-foot level towards the south-west the strike in the ridge in the shaft No. 2 on the same ridge 700 feet to the southwest, down 50 feet; cross-cut to be run towards the north-west when the 100-foot level is reached.

Aggregating total of 1000 feet, the depth of the main ridge, with values satisfactory to the management.

The board of directors of the company will visit the property the last of this week to inspect the work done, and decide on plans for future mining.

With this much accomplished, in addition to building the entire plant since the beginning of the spring months, Manager Stewart Thorne figures that the summer's work is well started.

15 New Quartz Deposits.

All rock buildings have been completed, the games for the two Nissen stamps which will not be put up for two months yet, as there will be no need for stamps till the veins have been cross-cut.

At the close of the surface prospecting which ended last week, 15 new quartz veins were discovered on the main ridge and the 150 feet. It is more than probable that the core drill work will be the means used to prospect the two north claims adjoining the Dome Mines property.

The intention now is to drive down the two shafts. Not until the 100-foot level has been reached will cross-cutting be started. Stations will be cut and the shafts will be run down to the 700 feet of the ridge that lies between the two holes.

No. 1 shaft is down on one of the north claims, and will be run north to south, with a slight drift to the west of north, and the showings still hold in the shaft.

No. 2 shaft is down in the porphyry. Between No. 1 and No. 2 shafts there are 15 deposits cutting thru from north to south thru the ridge.

The cross-cut from Nos. 1 to 2 shafts is designed to put a slight drift to the west of north, and the showings still hold in the shaft.

Change shifts in the shafts are worked. Two air drills prepare the rock for blasting, and will be used to sink the two shafts to the 100-foot level and cross-cut the 700 feet of the ridge that lies between the two holes.
