GUARD AGAINST TROUBLE IN DOWNING ST.

There was Some Fear Today of Demonstration by Communists.

London, Nov. 22.—An alleged Communist plot to provoke revolutionary trouble in London today in connection with an anti-demonstration by the unemployed is the feature of this morning's newspapers, some of which suggest official support for their statement, to be dangerous Communists working in co-operation with Moscow.

The organizers of the alleged plot are said by several papers, which claim suggest official support for their statement, to be dangerous Communists working in co-operation with Moscow.

Their plan is said to be the exploitation of the large gathering of unemployed who marched from the provinces to London last week to call attention to their condition and to ask the premier to receive a deputation.

Bonar Law declined to receive spokesmen of the unemployed but promised that their cause would be heard by the ministers of labor, and health. The demonstrators being known to possess a list of names of the unemployed.

Rumors, supported by the police, to the effect that organizers of the unemployed were determined to force an entrance to Downing street from Whitehall today and if the interview was still refused to start a fight, many of the demonstrators being known to possess a list of names of the unemployed.

It is deemed probable, however, that the hard suggestions made by some newspapers as to what may happen today will not be fulfilled, inasmuch as three labor counsellors after an interview with Bonar Law last night, agreed to advise the leaders of the unemployed to accept a conference with Mr. Montagu Durrant, Minister of Labor, and abandon any plans for an attempt to force an entrance to Downing street.

The Daily Herald says that this deputation was accepted and that a deputation will see the Minister of Labor this afternoon.

A peace order was issued last night forbidding any demonstration within certain areas around the House of Parliament. This district is always under proscription for such a purpose while the parliament is sitting.

AGAINST DRY LAW WINTER'S GRIP ON NORTH ONTARIO

Washington, Nov. 22.—Statistics issued today by the Census Bureau showing increases in the number of prisoners in United States state and federal institutions since the "wet" year, 1917, reveal that the Eighteenth Amendment and the Volstead Act have not been deterrents to crime, so W. H. Stoyton, founder and head of the association against the prohibition amendment, declared today.

Information gathered by his association, he added, "proved conclusively that the crime increase noted in the government report is attributable to the drastic prohibition legislation through demonstrated fact that the largest percentage of increases are directly due to arrests and sentences for causes arising from the use of intoxicants, with the main increase occurring in the so-called prohibition period of 1920 to 1922."

Convictions under the federal prohibition laws, Mr. Stoyton declared, "are known to be not only widespread but to be increasing at a progressively alarming rate."

The statistics, he said, answer "both the stock argument of the Anti-Saloon League" that prohibition would "empty the jails" and its later challenge of the "significance of the figures adduced by out association" in 1921, comparing crime data for that and the previous years.
