

Your Children's Strength Needs Tending in the Summer

Their appetite often needs coaxing. Nothing pleases them better than a cup of Bovril, or a Bovril Sandwich—and it will give them a relish for other food.

BOVRIL

CONTAINS ALL THE GOODNESS OF PRIME BEEF

Corn Pain Ended In a Jiffy

Just cover the corn with a little Blue-jay plaster. It is done in a second. The pain ends instantly. Then that little drop of B & B wax begins to loosen the corn. In two days it comes out.

Not a bit of soreness—not the least inconvenience. You simply forget the corn. It sounds good to be true. Yet five million corns every year are removed in this simple, harmless way.

Corns are utterly needless. It is not necessary to be folly. To pare them and nurse them. Blue-jay plaster removes them with Blue-jay. Do it now.

A in the picture is the soft B & B wax. It loosens the corn. B protects the corn, stopping the pain. C waxes around the toe. It has a row of five comfortable. D is rubber adhesive to fasten the plaster.

Blue-jay Corn Plasters 15c and 25c per package

Also Blue-jay Dressing. All Druggists Sell. *Greatest Theme.*

WHAT WORRIES THIS MAN?

Had this man used Parian Sage when heald and the bald spot is getting ready to find his hair growing thin and falling out he could have prevented baldness but he didn't. Men take a warning. Don't wait until the hair roots are dead before you try to revive them but start right now by giving your hair and scalp a daily tonic.

Baldness is unknown where Parian Sage is used. It is guaranteed to grow hair if the hair root is not already destroyed, to eradicate dandruff, stop itching scalp and falling hair, and makes the hair grow thick and abundantly.

If your hair thins out on the top of the head and guaranteed in Parianville by Allan's Fairville Drug Co.

Coolness and Comfort for a Summer Day

Don't make a fire in the kitchen. A hot kitchen means a hot house and a hot temper. It doesn't promote domestic happiness nor does it encourage sweetness of disposition. Here's freedom from kitchen worry and work: Have a deep dish for each member of the family; place in each dish two

SHREDDED WHEAT BISCUIT

(whole or crushed) and cover with berries of any kind—raspberries, blackberries, huckleberries or other fresh fruit, then pour over them milk, adding a little cream and sugar to suit the taste.

You will find it deliciously appetizing and nourishing, supplying all the strength needed for work or play. Shredded Wheat is ready-cooked and ready-to-serve. It is the whole wheat steam-cooked, shredded and baked—nothing added, nothing taken away. A food for the Summer days when the stomach is tired of heavy meats and soggy pastries.

Grand Duke Nicholas Bids Fair to Win Million Dollar Bequest of Eccentric Count—Life of Maria Pia One Succession of Tragedies

(Copyright, 1911, by the Brentwood Company.)

It is Grandduke Nicholas Michaelovitch of Russia who will undoubtedly win the prize of \$1,000,000 to be awarded by the Imperial Academy of Sciences, fourteen years hence, for the most meritorious history of the reign of Alexander I. General Count Alexis Arakotcheff, who died in 1854 left a most extraordinary will, and it is under the terms of this will that the grandduke is destined to receive the award above mentioned.

The count was the most faithful and brutal agent of the tyranny of Emperor Paul, from 1796 to 1800. He was the terror of the army, by reason of the savage punishments which he visited the smallest offence, or the most trifling incursion, but succeeded in securing his removal from about the person of the Czar Paul, and it was shortly afterwards that the latter was murdered. The passionate sorrow which he experienced at the death of his emperor, led to his being banished to Siberia, along with other condemns and particular adherents of the murdered monarch. But some years later, when Alexander I began to feel remorse regarding the circumstances of his father's death, and under which he had been brought to the throne, he recalled Arakotcheff and made him one of his imperial advisers. Indeed, during the last ten years of Alexander's reign, Arakotcheff may be said to have been the incarnation of the reaction which characterized that epoch; an epoch which procured the Holy Alliance against the United States, and which called into existence the Monroe Doctrine.

The accession of Nicholas I. brought with it the downfall of Arakotcheff. For although we are accustomed to look upon Nicholas I. as the type of the autocrat, yet compared to his elder brother Alexander I. during the last decade of the latter's reign, where he survived for about eight years longer, living a life of the most profound piety and seclusion and died with his eyes fixed to the last upon the portrait of Alexander I., whom he hoped to rejoin in Heaven. Whatever else may be said about the man, and of the extraordinary component of hardness and religious fanaticism, there was something almost pathetic in his love for Emperor Alexander, which he carried beyond the grave. For when his will was opened, it was found that a sum of \$50,000 had been set aside under its terms, to accumulate at compound interest in the Imperial Bank, until 1823.

Despite the efforts of Queen Marguerite, who was first upon the scene when Queen Pia was seized so unexpectedly with that sudden illness to which she succumbed at the Castle of Stupingy, only ten days after her arrival in Paris, it is believed that she died in the arms of the Duke of Orleans, who was with her at the time of her death.

The Evening Chit-Chat

By BUTH CAMERON

"BUT if we go over on the boat what will we do about the carriage we ordered to call for us?"—First girl.
"We don't do anything. Just let him come up. We'll be gone before he gets here."—Second girl.
"But he'll charge us just the same."—Third girl.
"How can he if we are gone?"—Second girl.
"Of course he can't. And he always sends a little boy up and those little boys might just as well be riding around as loafing in the stable."—Third girl.
"That is a conversation among three young girls which I overheard the other day."
"Yes, actually. Of course I haven't it word for word, but that is the substance."
"No, they were not ignorant, conscienceless creatures of whom you might expect anything at all."
"On the contrary, they were well-read, refined girls, college-educated and presumably in the habit of doing what they thought was right."
"And yet only the decision not to go in the boat after all prevented them from cheerily carrying out the plan outlined in that conversation."
"Just an extraordinary how often you will find similar examples of a complete lack of a sense of business honor among well-read and intelligent women!"
"The shopkeeper says that the nicest of her patrons seems to think nothing of cancelling an appointment so late that it is impossible for her to sell her time elsewhere."
"Dressmakers tell me that they very often lose a day's work in this way."

Now Grandduke Nicholas Michaelovitch, who has already won many laurels in Russia, and especially in France, as an historian, and as a writer upon all sorts of remarkable discoveries that he has made in the archives of the imperial house of Romanoff, and of the Russian government, is now busily engaged in writing a remarkable work covering the reign of Alexander I., and inasmuch as he has at his disposal sources of information which are open to no other historian, and is moreover equipped by his past writings and researches in a manner superior to that of any other student of history, may safely be taken for granted that no one will be able to excel in value the great work upon which he is now engaged.

He is a very tall, striking-looking man, who

liberal in his ideas that he is known as "The Red Grand Duke," and was a warm friend of the author Tolstoi, who owed indeed to his influence at St. Petersburg with both the late and the present emperor, the immunity which he enjoyed from persecution by the government authorities. He is, through his father, a grandson of Emperor Nicholas I., an uncle of the Crown Prince of Germany, who is very fond of him, and a brother of that Grandduke Alexander Michaelovitch who has translated all Admiral Mahan's works into Russian, and has distributed them free of cost among his fellow officers of the Russian navy.

He is the president of the Imperial Geographical Society, and of the Imperial Historical Society of Russia; member of the Academies of Sciences, and of other honors, including that of foreign member of the Institute of France, and of the French Academy of Sciences. In one of his recent works, a compilation of the letters addressed by the consort of Alexander I. to her mother in Germany, he managed to effectually set at rest the familiar legend, according to which that monarch survived his alleged death in 1825 for nearly forty years, as a monk, or rather hermit, near Ikatnik, in Siberia.

Queen Pia's life was one long succession of tragedies. Several of her children died in their early youth, under circumstances so suspicious, as to lead to popular rumor to the effect that they had been poisoned by foes of the dynasty. Her two sons, Don Carlos and Don Alfonso, Duke of Oporto, she herself saved from drowning. She lived to see one of her brothers, Amadeus, lose the crown of Spain, and another brother, King Humbert, fall by the hand of an assassin at Monza. Then came the shocking murder of her eldest son Don Carlos, and of her eldest grandson, the Crown Prince, and finally her other grandson King Manuel's loss of his throne, and her own expulsion and exile from Portugal, which had been her home for nearly half a century.
