At the afternoon session of the annual meeting of the New Brunswick division of the Canadian Red Cross Society yesterday in the Red Cross depot, the president, R. T. Hayes, gave the opening address. He spoke especially of the benefits for the public health nursing programme and of the money expended for the care of soldiers in hospital. He explained that the provincial branch could not hope for any revenue from the membership drive. He said the New Brunswick branch had received a report, telling of the comforts and amusements provided for the soldiers in hospital. The expenses for the year had been \$8,644.44 and an average of eighty-six patients had been cared for each month.

Mrs. Harold Lawrence testified to the self-sacrificing work of the hospital workers. Supplies were required for relief also as soon as made and the committee had been busy almost every week cutting out material and making garments. Supplies were very low and she would like to send work to any one who would sew.

C. B. Allan reported that a new constitution had been drafted for the provincial division and this was referred to the executive for action.

For the committee on supplies, Miss Jarvis told of New Brunswick having received its share of the equipment for a public health nursing and had raised \$908 in its campaign. Great Advances Made. Hon. Dr. Roberts was the first speaker and, as Minister of Health, he congratulated the society on the enthusiasm displayed at the annual meeting. He drew a stirring contrast between the conditions in the province in 1917, before a health ministry was established, and present conditions, and showed how the department and the province had been greatly indebted to the Red Cross Society. The general death rate in those years had been reduced from 184 to 113, and now statistics were 139 and 113, and now statistics were 139 and 113, and now statistics were 139 and 113.

control was organized, laboratory work was established, and the inspection of schools carried out, serum deposits opened, public health nurses were at work and travelling clinics were organized.

Through the Red Cross the first training school for public health nurses had been established and the five nurses trained had done a work of incalculable good, the society had given funds to supplement the federal grant so that the fight against V. D. might be carried on. The society had maintained two more. The society had maintained two more. The society had maintained two more.

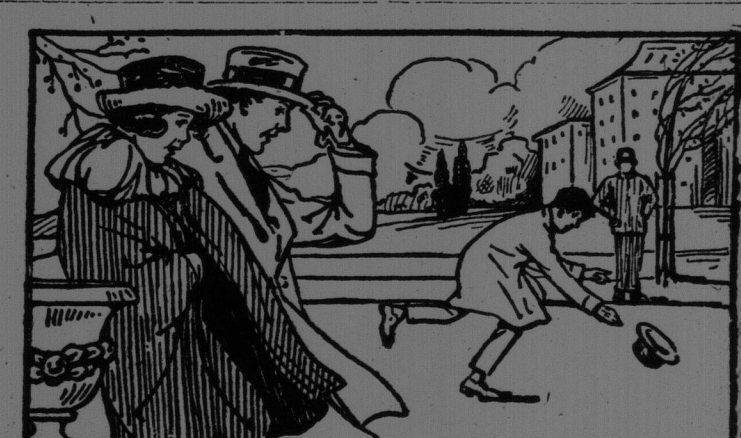

Dr. H. A. Farris spoke appreciatively of the work done by the soldiers in the County Hospital and of the \$3,000 received which had enabled the dispensary to keep another nurse. He gave some interesting facts about tuberculosis. He asked the influence and support of the Red Cross in seeing that the families of all soldiers with tuberculosis were cared for.

Miss Harriet T. McKeljohn, director of public health nursing, gave her report. She told of the placing of nurses at Campbellton, Chatham, St. Stephen, Milltown, Riley Brook, Entouche, McAdam and Minto and of the travelling clinics operating at Buctouche, Riley's Brook and Minto. The statistics for the year were as follows:—Home visits, 10,152; bedside visits, 3,810; supervisory visits to school children, 113; child welfare visits in the homes, 2,119. She spoke of the possibilities of the health centre as a training place for nurses and warmly thanked the Red Cross for their aid. MAY BE TOTAL WRECK. Word has been received here that the British three-masted schooner Don Parsons was driven ashore yesterday in the blinding snow and wind storm on Little Cranberry Island, off Mount Desert. It is feared that she will be a total wreck. According to a dispatch she was trying to make harbor for shelter when she ran into the storm.

The schooner was said to be breaking up fast. She was on her way from New York to St. John in command of Captain Card, of Summerville, N.S. She was consigned to Nagle and Wigmore.

"When the stormy winds do blow" So goes the old sea song, and it would be good advice to add

DRINK Baker's Cocoa

It is warming and sustaining, for it has genuine food value, and may be safely indulged in any hour of the day for it is stimulating only in the sense that pure food is stimulating.

It is delicious too.
