

FWC/ETC

Ottawa, April 11, 1947.

1-832

Failure right engine No. 356370
Douglas DC-3 - GP-GUA

5008-C21-1

AIR MAIL

District Inspector, Air Regulations,
402 Elsey Henry Building,
Edmonton, Alberta.

Attention: Resident Inspector, A.I.D.

1. Reference is made to your letter dated March 12th, 1947, and to co-related reports on the failure of the subject engine.
2. For record purposes we should be glad to receive a further report after the Canadian Pratt & Whitney representative has concluded his investigation into the cause of failure.
3. It is desired to call attention to the omission in all correspondence and reports of the engine model involved. There are many models of DC-3 aircraft in the series and also alternate models of engines. The serial number of an engine only is not sufficient for our records.

JS

(J. L. Smith)
Acting Chief Aeronautical Engineer
