

CONTENTS

	PAGE
Introductory.....	1
The clayworking industry.....	2
Railways and fuel supply.....	3
Future of the clay industry.....	5
General geology of the area.....	5
Cretaceous.....	6
Pierre shale.....	6
Fox Hills sand.....	7
Tertiary.....	7
Eocene Fort Union formation.....	8
Estevan beds.....	9
Whitemud beds.....	9
Ravenscrag beds.....	10
Oligocene.....	11
Cypress Hills beds.....	11
Quaternary.....	12
Pleistocene formation.....	12
Recent formation.....	13
General technology.....	14
Classification of Saskatchewan clays.....	14
Methods of manufacturing.....	16
Mining.....	17
Preparation.....	17
Tempering.....	18
Moulding.....	18
Drying.....	19
Burning.....	19
Control of temperature.....	21
Seeger cones.....	22
Veritas firing system.....	23
Thermo-electric pyrometers.....	23
Methods of overcoming scumming and drying defects.....	24
Records of tests.....	26
Clays of the Cypress Hills district.....	27
" " " Swift Current ".....	44
" " " Wood Mountain ".....	46
" " " Big Muddy valley.....	53
" " " Lake-of-the-Rivers district.....	57
" " " Dirt Hills district.....	66
" " " Estevan-Weyburn district.....	72
" " " northeastern part of the area.....	80
" " " northwestern part of the area.....	85
