**HOLSTEINS FOR SALE**  
 All age, at half their value; the producing kind.  
**JAS. MOTHERAL, Box 99, DRUMBO, ONT.**

**THE AYRSHIRE COW**  
 There was one other point he would like to say a word about. They were in possession of a great agricultural asset in the Ayrshire cow. (Applause.) She was a great asset, because unless they had her to work with in those upland districts it was difficult to see how the land would be worked at all. It had kept farming alive in that district of Scotland. The Ayrshire cow was capable of doing a great deal more in the future. All over the world there was a growing demand for dairy cattle, and among these the Ayrshire was second to none in the production of a quantity of good milk. There was the Jersey cow for butter and the Holstein for quantity, but people wished quality in milk, and it was hardly possible to breed the latter to produce that. For foreign countries there was at present, and there would be in the future, a great demand for dairy cows. That was a demand that Scotland should be ready to meet. (Applause.) It was characteristic of the British farmer, and that he had made this country the stud farm of the world. He was perfectly sure that there was a market in front of the breed compared with which the present so-called breed would be as nothing. (Applause.) Extract from an address delivered before the Ayrshire Dairy Farmers' Association, Scotland, by Mr. C. M. Douglas, of Auchlochran, Scotland.

**STANDARDS FOR REGISTRATION OF AYRSHIRES IN RECORD OF PERFORMANCE**  
**BULLS**—Admitted after having four daughters in the Record of Performance, each from a different dam.  
**COWS**—Admitted after fulfilling the following requirements of production and breeding as supervised by the Live Stock Branch of the Department of Agriculture.  
 All cows admitted must equal or exceed both the records specified below:

	Lbs.	Butter	Lbs.
Two-year-old class	5,500	198	
Three-year-old class	5,500	234	
Four-year-old class	5,500	270	
Mature class	5,500	305	

The per cent. of butter fat should be determined by the method of Agriculture.  
**YEARS MILK RECORD**—If the test he commenced the day the animal is two years old or previous to that day, she must produce within 365 consecutive days from the date, 5,500 pounds of milk. For each day the animal is over two years old at the beginning of her year's test the amount of milk she will be required to produce in the year will be determined by adding 2 1/2 lbs. to each such day to the 5,500 pounds required when the two-year-old class. This ratio is applicable until the animal is five years old, when the required amount of milk has reached 5,500 lbs., which will be the minimum amount of milk required of all cows five years old and over.

**YEARS BUTTER FAT RECORD**—If test be commenced the day the animal is two years old or previous to that day, she must produce within 365 consecutive days from that date 198 pounds of butter fat. For each day the animal is over two years old at the beginning of her year's test, the amount of butter fat she will be required to produce in one year will be determined by adding 1 (one tenth) of a pound for each such day to the 198 pounds required when in the two-year-old class. This ratio is applicable until the animal is five years old at the required amount will have reached 306 pounds, which will be the minimum amount of butter fat required of all cows five years old and over.

Every cow accepted for registration of performance must drop a calf within 15 months after the commencement of the test. In the four-year-old class and the mature class, no cow will be accepted for registration of performance if her lactation of her previous lactation period was more than 15 months before the commencement of her test.  
 All applications for the test must be mailed to W. F. Stephen, Huntingdon, Quebec, Secretary of the Canadian Ayrshire Breeders' Association.

**RAILWAY RATES TO GUELPH**—From all stations in Ontario, Kingston, Sharbot Lake, Renfrew and west, but not west of Azoida, the railways have granted the rate of single fare for return tickets to the Guelph Winter Fair. These tickets will be on sale each day from Saturday morning, December 3rd until Friday night, December 9th. They are good for the return journey any day up to and including December 12th, 1910.

**Get the light draft "Bissell"**

Don't make your horses wear out their energy dragging one of those common hard-running land rollers. Hitch them to the light draft "Bissell." The "Bissell" runs easier than other land rollers, because it has large 3/4 inch roller bearings instead of the usual 1/2 inch diameter, and because the bearings are encased in solid, one-piece malleable cages. Whereas ordinary cages are of pieces riveted together. Our solid cages keep the bearings straight in line, where as riveted cages soon twist out of shape and allow the bearings to grind, causing heavy drag. And because the heavy 3/4 inch solid steel axle revolves with the drums, the "Bissell" is so nearly frictionless that oiling is scarcely ever necessary. The "Bissell" is a staunchly built, the only roller with December 9th. They are good for the return journey any day up to and including December 12th, 1910.

field, and you'll quickly decide to buy the "Bissell." Send to Dept. R, for booklet containing full description of the 6, 8, 9, 12 foot lengths. We also make a GLASS SHEET ATTACHMENT for use with the "Bissell."  
 And don't believe any roller is the "Bissell" unless the "Bissell" is stamped on it. We tell you that for your protection.

**T. E. Bissell Co., Ltd. ELORA, ONT.**
