Established 1854 TORONTO, ONT.

The Makers' Corner Butter and Cheese Mak'rs are indepartment, to ask questions on matters relating to cheese making and to suggest subjects for discus-sion.

Leccescocococococococo Suggestions for Improvement

Frank Herns, Chief Dairy Instructor for W. Ontario

for W. Onfario

A warm spell in summer sees a percentage of over-ripe and tainted milk
arriving at some of the factories. A
few of our makers, fearing competition from other sources, are in a position from other sources, are in a position from ther sources, are in a position from the source, are in a position from the source, are in a position from the source in with the best milk and for milk goes
in with the best milk and for che see.
When undesirable cheese is made from
such milk it is sometimes hurried on
to the home market with uncertain to the home market with uncertain results. The patrons should more fully realize that when milk is de-livered in a condition unfit for making fine cheese their own business is affected.

meeted.
We have many patrons who take good care of the milk, but there is still the "Don't care patron" who excuses his abort comings by saying, "My milk pased anyway. Why should I worry." atron should consider it his duty to deliver well-cooled milk during the warm weather, and the makers should assist he instructors so far as

ahould assist the instructors so far as possible to get such milk, by rejecting all undesirable milk at the weigh

Wherever clean, cool milk is delivered as a practice the greatest progress is being made.

Some of the late fall cheese should

receive more attention in curing. A more uniform temperature of about 60 degrees should be maintained.

Use the Instructors

If the creamery men will make out list of the patrons who send lowtesting or poor cream and arrange for the instructor to visit these patrons,

testing or poor cream and arrange for the instructor to visit these patrons, many undesirable conditions may be changed. A letter might be drafted by the Department to cover these special cases. This would take any una off the creamery measurery men gather and in some cases once a week. I see lack proper equipment for cool-ing the cream at the creamery. Competition has evidently forced some creameries that ship cream to allow their patrons to ship at any time, in fact some cane romain at the express office overnight even in the young some cane romain at the syress office overnight even in they demanded that the cream be shipped on the first train is the morning. Cannot these conditions be remedied to the advantage of all con-cerned?

cerned?

More attention should be paid to some factorymen to the tidiness of the factory and the outside appearance and surroundings. If the patrons are to point with pride to the factory as an attractive community institution.

Extract from Annual Report.

Mistaken Friendship

Have dual purpose cattle a place in the dairy districts of Ontario? The men who man the cheese factories and cree of the property of the control of the cont

papers:
"Minnesota will be known as the
Shorthorn section of the United
States and will have the finest dual

purpose estile in the sountry, said F. R. Crane, agrie-itural expert of the Great Norther: railway, according to the daily papers, when last week he shipped out to 50 farmers of Minnesota and North Dakota the 50 bulls with which James J. Hill is bulls with which James J. Hill is bleasing the dairy farmers of the North-West, and which are to be the foundation stock for the great Hill: Shaw dual-purpose breed, so far existing only in theory, but a theory that has cost cur farmers thousands and thousands of dollars. We wonder if our big railroad king, strong believer as he is in the dual purpose idea, for one minute would entertain the idea of lotting his big freight engines pull his fast passenger trains?"

Agricultural Students Discuss the Rural Problem

(Continued from page 6) ercise chasing a tennis ball, and it will have more influence in keeping her on the farm.

The report of the resolutions com-

The report of the resolutions committee was read by Mr. McLaren. One resolution in particular is natticularly worthy of note.

"It is the opinion of this conference that the taxation of farm industry in the form of legalized monopolies, high rates of interest, and inflated city land values, are detrimen-tal to that industry and the country as a whole. That a lowering of the tariff on farm implements and taxation of land values engage the im-mediate-attention of the governments of Canada, and that practicable sys-

of Canada, and that practicable sys-tems of farm credits, and of general cooperation form part of the program of adult education in rural districts." Bocial Factors of Country Life. The closing session of the confer-ence was held in Massey Hall, "The Social Factors of Country Life," be-ing the subject under discussion. Mr. R. B. Himman believes the rural pro-blem to be local. He alaced under blem to be local. He placed under comparison two neighborhoods with which he was well acquainted, having the same kind of soil, served with rural mail delivery, telephone, etc. In No. 1 on eight successive farms are six distinct religious sects. They are discontented, there is no social are discontented, there is no social life, and they resent any attempts on the part of anyone to bring them to-gether, or better their condition. Neighborhood No. 2 is in a ferment of pleasure all the time. Sleighing parties, the literary society, skating, and various forms of winter sports oc-cupy their attention in the colder sea-sons of the year. A competitive risk cupy their attention in the colder sea-sons of the year. A cooperative risk is run by the young folks. In the summer the boys have a foot-ball team, which has never known defeat. The young folks are happy, content-ed, and have no thought of forsaking the farm.

While no satisfactory solution of

the rural problem was advanced, the conference cannot help but be productive of much good. It has placed before the student body, young men and women alike, the fact that there is a rural problem, and a problem of appalling magnitude. The hope of the future lies in bringing our students to see that their place is on the farm, and that they owe it to their country

CREAM WANTED Guelph Creamery Co., Guelph, Ont.

FOR SALE

BOX SU, PARM AND DAIRY

References: Molson's Bank, Belleville International Harvester Cream Separators PICTURE to yourself the difference in labor between setting milk in any of the old-time ways and skimming it with an IHC cream separator. What a job it is to wash the pans or crocks. How many handlings they need. What a lot of

time it takes to fill them and set them away, to protect them from dirt, to do the actual skimming, to dispose of the cold skim milk, to purify the crocks or pans.

Now note the difference. With an I HC separator the milk is skimmed while still warm from the cows,

the separator is washed in a few minutes and everything

Ine separator is wasned in a few minutes and everything is ready for the next milking. You want the separator that will help you meet and save you most. Take time enough to buy a cream separator. The more carefully you go about it, the more comparisons you make, the more clearly you will see that one of the international Harbert See that I H G local spent. Get extalogues from him or write to
