A BT Litter Carrier and a BT Feed Carrier

should be in your stable:—

1st Because they will save you more hard and disagreeable work than any other machine you can invest your money in.

2nd Because they are the best machines made for handling Litter and Feed.

Let us tell you what they will do and why they are better. We also build Cow Stanchions, Steel Stalls, Hay Carriers, Forks and Slings.

BT stands for Best

CORN IS A DOUBLE CROP FOR THE MAN WITH THE RIGHT MACHINES

THE grain—that is, the ears—represent only about 60 per cent of the feeding value of your corn crop.

The other 40 per cent—almost half of the feeding value—is in the plant.

If you leave the stalks standing beyond the time that the corn has reached its maturity, the feeding value of the fodder dwindles to almost nothing. The wind and weather leave little more than woody fiber.

Then you get only the ears as your return on the crop. You make corn a single crop.

To make corn a double crop—to get your full 100 per cent feeding value—handle the crop so that the fodder will be about equal to timothy hay for feeding.

USE I. H. C. CORN MACHINES

You cannot harvest the corn rapidly enough by hand to conserve the nourishing elements of the fodder. To hire enough help to do this would eat up the profit. Go over the field when the ears begin to glaze, with a Deering, McCormick, Milwaukee or Osborne corn binder One man and a team is all that is needed. The harvester will cut and bind the corn as fast as the team can walk, and dump the bundles in piles ready for shocking.

Then put the crop through the husker and shredder. A Deering, McCormick or Plano husker and shredder will husk the ears, cut the staiks, leaves and husks into fine shreds, giving you a roughage rich in protein, starch and sugar and one that the stock will relish.

That's the 100 per cent way of handling the corn crop—that is how thousands of farmers have doubled up on returns from their corn land.

Start this season to get *your 100* per cent. To invest in two machines that will save the 40 per cent feeding value every year will certainly appeal to you when you get to figuring.
