

This Book Has Saved Thousands of Dollars For Other Canadians May I Send YOU a Copy FREE

ALL I ask is that you send me your name and address so that I may place a copy of this book in your hands. I believe you will be greatly interested in the facts it contains about roof-cost and roof-value. It is not over-enthusiastic, nor extravagantly worded. It does not promise "anything to get you to buy my roofing." I have purposely been very careful to confine myself to stating plain facts in their logical order. I leave it to your own good judgment to decide what kind of roof you want after reading my book. My object is to give you reliable, complete information so you can decide for your own best interests. You can believe what this book tells you just as you can believe what any Pedlar advertisement tells you. I am personally answerable for every statement it makes—as much so as if I were giving sworn evidence in court. That's why it is important you should send for this book of mine—because it contains "the whole truth and nothing but the truth" about the roofing question.

Illustrated from Photos of Modern Farm Buildings, and Full of Hints of Great Practical Value to YOU

YOU have everything to gain and nothing to lose by getting trustworthy information about roofing materials. There's no satisfaction in saying "I wish I'd known" when you face a loss. And you cannot know all you should know about the cost and value of different kinds of roofing material until you know all the facts you learn by reading my "Roofing Right" book.

Don't Wait Until You Need a New Roof—Get It Now

THERE'S no better time to get this information than RIGHT NOW. While you think of it, just clip out the coupon on this page, write your name and address on it, put it in an envelope and mail to my address nearest you. Or simply send me a postal card, mentioning this paper. Say you want my "Roofing Right" book, and a copy will be sent you immediately. You get a lot of valuable information, just by asking for it. You get many facts you should know about all kinds of roofs, particularly about a roof that is

A Good Roof For a Hundred Years Guaranteed in Writing for Twenty-Five

It may seem hard to believe. Yet that is exactly what you are to expect of an Oshawa-shingled roof. For Oshawa Steel Shingles, made of tough, heavy steel, thoroughly galvanized, make a roof that will not need replacing or repair in a century from the time it is first put on. My book tells why you can be sure of this. Also tells about my Guarantee, in proper legal form, to replace at our own cost any Oshawa-shingled roof within twenty-five years from the day it is put on. Do you know of any other roofing which is guaranteed in writing for any period? I don't.

SURELY you are interested in a roof that is so fire-proof that fire insurance companies quote much lower rates on buildings it protects. A roof that is positively lightning-proof, wet-proof, leak-proof, rot-proof, wind-proof. A roof that makes your house or barn warmer in winter, cooler in summer. A roof that needn't be painted, nor patched, nor tinkered with to keep right. The only roof that is GUARANTEED to be a perfectly satisfactory roof in every respect for twenty-five years.

Just Write Your Name and Address Here—Then

(Clip out this coupon and put it in an envelope addressed to our place nearest you. (See addresses below). A copy of "Roofing Right" will then be sent you immediately.

No. 16

Now don't say you "Haven't time to bother with it." I'm trying to save you "bother"—and expense. I make it easy for you to get reliable information you ought to have—maybe save you many dollars of roofing expense. Just be curious—critical if you feel like it. But don't fail to send for my book. Do it now, before you forget it.

IN the immense Pedlar factories at Oshawa, Ontario, we make various building materials in sheet steel, of great value to anyone who is going to build or repair a house or barn. Beautiful Pedlar Art Steel Ceilings and Side-walls, for instance, take the place of unsightly, unsanitary, short-lived plaster. Also Pedlar Steel Siding for outside walls—that make a frame house or barn look as if it were built of stone or fancy cement blocks or brick. Actually cheaper by 20%. Fire-proof, too. Ask for full particulars and learn how you can make your money build a better building by "Pedlarizing." My large, finely illustrated book showing some of the 2,000 designs mailed free.

When Writing Advertisers, Please Mention "The Farmer's Advocate."

QUESTIONS AND ANSWERS. Miscellaneous.

EXEMPTION OF WOOD-LOTS.

On page 2042 of "The Farmer's Advocate" of December 22, 1910, re Wood-lot, H. R. McMillan states that a person owning 100 acres of land, 10 acres of which is fenced as a wood-lot, is entitled to exemption of taxes for the 10 acres, providing the Council pass a by-law taking advantage of the Statute of 1906. Is that what the Act means? Some members of our council construe the Act to mean 1 acre of the 10.

Ontario. J. McL.
Ans.—We have repeatedly explained that the Woodland Exemption Act, as originally passed, contained a verbal error, which left the Act open to the interpretation your councillors state, but the error being observed, an amendment was made at the next session of the Legislature which authorizes a council to pass a by-law exempting from taxation an area of woodland not exceeding ten per cent. of the area of the farm, and not exceeding 25 acres of exempted woodland under a single ownership. The by-law should be passed in every township.

SCHOOL FINANCES.

In the locality in which I reside, the Protestant School Board are always complaining of being short of funds when anything has to be paid, i. e., teacher's salary, repairs, etc. Now, I learn, upon inquiry, that there is some five or six hundred dollars of school taxes in arrears in the district, and which could be had if they went about it in the right way. It is the same School Board, year in and year out, and they do not seem to do their duty as they ought. Now, as a common ratepayer, what would be the best method to pursue in this case, as I do not feel inclined to let this matter lie as it is at present, and feel that it is only fair and just to everyone that these arrears should be collected and used to defray current expenses. How long should taxes run before they are prescribed? Quebec.

Ans.—We think you ought to institute an agitation for the desirable change in the membership of the Board; but as for a summary method for bringing about the collection of these arrears of school rates, it would be well to consult a local lawyer. It is not likely that the taxes would become legally uncollectable by lapse of time.

WORMS—LUXATION OF PATELLA

1. Six-year-old horse has worms; they are about six inches long. What should I give to rid him of them?

2. Spring colt, while out for exercise, seems to have strained his hind leg. He is swollen a little at the stifle. There seems to be no lameness. When he walks, you can hear a click at the hock. He can trot or walk, but it seems to catch him if turned short. What shall I do to strengthen this limb? His other leg is slightly swollen, as he seems to put more weight on it. Have been feeding him a quart of oats and a handful of bran three times a day. Shall I take the oats off him till I get him all right? ONTARIO.

Ans.—1. Try half-pint raw linseed oil and one ounce (or four tablespoonfuls) of spirits of turpentine, given as a drench. If this is not effective, take one and a half ounces each of sulphate of copper and sulphate of iron; pulverize, mix, and make into twelve powders. Give a powder morning and evening in food till all are taken, then follow up with a purgative ball of eight drams aloes.

2. This is, apparently, luxation of patella (or stifle), in which case the clicking sound is not in the hock, but at the stifle. Get a blister made of two drams each of biniodide of mercury and cantharides, mixed with two ounces of vaseline. Tie head so colt cannot bite the parts. Clip the hair off the front and inside of the stifle. Rub well with the blister once daily for two days; on the third apply sweet oil. Turn in a box stall now and oil every day. Keep colt loose in box stall when stabled, and there will be less liability to disarticulation. If necessary, repeat the blistering. Is not necessary to reduce feed to any great extent.
