

Rupture Cured Without Operation

No Hospital or Doctors' Bills; No loss of Time from Work, and Not a Single Penny to Pay if You Don't Get Better.

No longer any need to drag through life in the clutches of rupture.

No operation, no big expense to stand in your way. And not a single cent's worth of risk. Think of that!—you who have spent dollar after dollar without finding a thing that has done any good. You who have been afraid that some day you'd have to risk the dangers of operation—you who dread the surgeon's knife because you know it results in permanent weakness or death about as often as in recovery.

In the last 24 years more ruptured people have been cured without operation than by all the operations ever performed.

Cured without being in bed a single day—without losing a single hour from work.

Cured by the wonder-working Cluthe Truss (Cluthe Automatic Massager)—something so remarkably beneficial that in 99 cases out of every 100 relief is immediate, and in most cases cure begins at once. For this is far more than a truss—far more than merely a device for holding the rupture in place.

Try it at Our Risk

We have so much faith in the Cluthe Truss that we are willing to let you prove, by trying it at our risk, just what it will do for you.

If it fails to hold your rupture securely in place, when working and at all other times—if it doesn't do you a world of good—then it won't cost you a single cent. All guaranteed in writing.

Cure Takes Place While You Work

A Cluthe Truss—right from the first day—will put an end to all danger of your rupture coming out.

Trusses Like These Are a Crime.

And, in addition—while you go on working, remember—it soon overcomes the weakness which is the real cause of rupture. Does it by massaging the weak ruptured parts—All entirely automatically. And this stimulating massage strengthens just as exercise strengthens a weak arm—in most cases soon makes the ruptured parts so strong that no sign of the rupture is left. That is how the Cluthe Truss has cured some of the worst cases of rupture on record—cured many of them after everything else, including operation, had proven utterly useless.

Free Book Tells All About It.

So that you can judge for yourself, we want to send you—free—our cloth-bound book of advice.

It sums up all we have learned in 40 years of day-after-day experience. It deals with rupture in all its forms and stages; explains the dangers of operations; puts you on guard against throwing money away.

And it tells all about the Cluthe Truss—how little it costs—how it ends all expense—how it is water-proof—how it has no springs, band, belt or elastic around your waist, no leg straps, nothing to pinch, chafe, squeeze or bind. And how you can try a Cluthe Truss entirely at OUR risk.

Write for the book to-day—don't put it off—this book may be the means of adding many years to your life and of restoring you to full strength and usefulness.

Simply say in a letter or postal: "Send me your book." In writing us, please give our box number.

Box 109—CLUTHE INSTITUTE
125 East 23rd St. New York City

The minute it takes to write for this book may free you from suffering for the rest of your life.

KEEP THE SORT OF SHEEP THE MARKET WANTS

Why put expensive feed into a coarse, heavy lamb and get stocked for overweight, when half the feed will finish a Southdown and top the market? A few choice young rams still to select.

Bradford or Beeton Sta. J. A. CERSWELL, Bond Head, Ont.

QUESTIONS AND ANSWERS. Miscellaneous.

VENDOR AND PURCHASER.

A bought a farm from B, and, after the deal was all closed, B took off the farm wire that he intended putting up before the sale.

1. Was it lawful for B to remove the wire, nothing being said about the wire at the time of sale?

2. Could A compel B to pay for the wire, or bring it back?

J. M.

Ontario.

Ans.—1. Yes.

2. No.

SALES OF HAY AND FARM.

A has a farm to sell which has a lot of hay upon it. B goes to him seeking to buy, and wants two weeks to give his answer. In the meantime, A agrees to sell the hay as it is to C, who harvests it, presses it, and draws it away for a certain price. At the end of two weeks, B goes to A to close the bargain. Both A and B go to C to see if he will give up said hay, but C wants a price for doing so. A agrees with B to give him the farm free of encumbrance. A will not give the price of hay to C, neither will B.

1. Can C enter on the farm when B has bought it, and claim the hay from B upon paying the price agreed with A if B forbids him to do so?

2. Who can C claim damages from, A or B?

3. And cannot B make any disposition of the land he wishes after he has settled for it, as regards plowing up hay land?

Ontario.

Ans.—1. We think so.

2. If prevented from taking the hay, we think that C's claim of damages would be properly against A, the party with whom he made his contract.

3. He probably can. Assuming that C has a valid contract with A for the hay, the latter ought to make settlement with C, or he may have serious trouble with both B and C.

SHEEP DIPPING, ETC.

1. Which way is the best or simplest way for dipping sheep?

2. Is there any other remedy than tobacco water; if so, give recipe?

3. What age should ewe lambs be when first bred?

4. What would be the cause of lambs having sore eyes, some being almost blind from the time they were dropped until three weeks ago?

5. About what price would I have to pay for good Shropshire ewes?

A SUBSCRIBER.

Ans.—1. If the lambs are dipped a week or two after the ewes are shorn, and a solution of one of the proprietary dips is poured on all the flock in the late fall or early in winter, there will be no need for dipping the ewes at any time for destruction of ticks or lice. But if scab exists in any of the flock, all should be dipped at least twice in a strong solution. For dipping the lambs, a wooden tank of matched plank, or lined with one of galvanized iron, six feet long, two feet six inches high, sixteen inches wide at the bottom, and two feet at the top, answers the purpose very well. A slatted draining board at one end of tank should be provided, on which the lambs are placed when the solution is squeezed out of the wool and run back into the tank. The water, after dipping the lambs, may be used on the shorn ewes, and rubbed on the hands. In the case of a scab dip, the lambs may be dipped a second time.

2. One of the advertised dips, Zenolene, is the simplest, and probably the most effective, and cheap as any, and it does not require the addition of water, according to the directions.

3. A ewe should not be bred until she is at least 18 months old.

4. I have not heard of any other remedy for sore eyes, but I have seen a few cases of it, and it is not a very serious disease, and can be cured by the use of a few drops of a solution of boric acid in water.

5. Prices of good Shropshire ewes vary, and depend on the quality of the flock, and the reputation of the breeder.

Bog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

Fleming's Spavin Cure (Liquid) is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be imitated. Easy to use, only a little required, and your money back if it ever fails.

Fleming's Vest-Pocket Veterinary Adviser

describes and illustrates all kinds of blemishes and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

FLEMING BROS., Chemists

Church St., Toronto, Ontario

DR. WILLIAMS' Fly & Insect Destroyer

MANUFACTURED BY BAKER & BOUCK

Have you money to invest? How would you like to make 10% on your investment? You can do it.

We have it for you, the word of one of the largest breeders of thoroughbred cattle in Canada, that for every dollar's worth of DR. WILLIAMS' FLY & INSECT DESTROYER he uses he gets in direct returns \$10. This speaks for his statement.

ATTENTION, STOCKMEN!

If thieves broke into your bank and stole your hard-earned deposits, you could not punish them severely enough, but flies and lice on your cattle and poultry do the same thing, yet few raise their voices in protest or their hands to restrain them, though they are fully aware that DR. WILLIAMS' FLY & INSECT DESTROYER will render their stock and poultry as safe from these pests as the bank. Try it, and be convinced.

Jesse, the Missouri Chief, the most wonderful cow in the world, valued at \$2,000, producing 17,000 lbs. of milk in 6 months and 520 lbs. butter, was subjected to the annoyance of flies for one day, and the quantity of milk was reduced by 18 lbs. from the day previous. Calculate what that means for the season, and add the result to your bank account, and see what DR. WILLIAMS' FLY & INSECT DESTROYER can do for you.

If your local dealer does not carry it, see that he orders it at once.

Order from: J. A. BROWNLEE, 385-7 Talbot St., London, Ont. J. A. JOHNSON & CO., 171 King St. East, Toronto, Ont. JOHN FOWELL, Travelling Representative, Woodstock, Ont. R. BARKER, 38 River Ave., Winnipeg, Man., or directly from the manufacturers.

BAKER & BOUCK, Morrisburg, Ont.
