

The Gurney-Oxford is prompt

No matter what comes or goes—meals we must have.

The preparation of meals comes round three times a day.

Every housewife wants to know that she can depend on her stove absolutely; she wants to know that there is no element of chance or likelihood of mishap in her cooking arrangements; that meals will be ready promptly on time.

The Gurney Economizer is an assurance against accident and mishap in cooking. It is a simple device and found only on the Gurney-Oxford. One lever controls everything. The fire can be slowed down for hours and revived in a few minutes. An arrangement of flues makes the Gurney-Oxford Oven always uniformly heated—the Gurney-Oxford Oven is never to blame! It will make a good cook a better cook; it does more than its share towards making every meal a success and a pleasure.

THE FARMERS' POWER PLANT BOLINDERS SEMI-DIESEL CRUDE OIL ENGINE

This handy little tool will save you hundreds of dollars. Not alone in replacing labour but in upkeep and running cost as compared with Gasoline engines. A 12 H.-P. Gasoline Engine costs you 30 cents to operate per hour. Our Crude Oil Engine only costs 6 cents per hour. Our engines are designed and built to stand hard work. They will outlive three or four gasoline engines. There is absolutely no risk from fire or explosion as it uses non-inflammable crude-oil.

If visiting the Exhibition see our stand
in Machinery Hall and make inquiries.
