**DE LAVAL CREAM SEPARATORS**

**Save Much Time and Labor in Summer**

BESIDES greatly increasing the quantity and improving the quality of cream and butter, DE LAVAL cream separators save much valuable time and labor.

This great saving of time and labor counts for more in summer than at any other season, and often alone saves the cost of a separator, aside from all its other advantages.

As compared with any kind of gravity setting, the saving of man's time and labor and usually woman's drudgery with a DE LAVAL is a big item in its favor.

As compared with other separators, the DE LAVAL saves much time and labor by its greater capacity, easier running, easier handling, easier cleaning and freedom from need of adjustment or repair.

These are merely some of the advantages which make a DE LAVAL cream separator the best of all summer farm investments, as every DE LAVAL agent will be glad to explain and demonstrate to anyone at all interested.

See the nearest DE LAVAL agent at once, or if you do not know him, write us direct for any desired information.

**The Extra Weight in a KELSEY Saves Coal Bills**

You can buy a Kelsey Warm Air Generator for less than any good steam or hot water heating system.

But a Kelsey costs more than an ordinary warm air furnace because it weighs more.

This extra weight is built into a Kelsey to give it more heat-radiating surface.

It has 61 square feet of radiating surface for one square foot of fire-grate surface.

A Kelsey heats larger volumes of air than an ordinary furnace, and does it with less coal.

Because a Kelsey consumes

about one-third less coal than an ordinary furnace it is more economical to operate.

A house heated with a Kelsey is worth more to live in and will rent or sell for more money.

The cost of a Kelsey is small when the saving in coal bills and repairs is considered.

This economical heating system is fully described in our booklet, "Achievements in Modern Heating and Ventilation." Send for it. 5
