SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS

The sole head of a family, or any male over 18 years old, who is at the commencement of the present year, and has since continued to be a British subject or a subject of an allied or neutral country, may apply to the Registrar of available Dominion Land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at Dominion Land Agency or Sub-Agency for District. Entry by proxy may be made on certain conditions. Duties—Six months residence upon and cultivation of land in each of three years.

In certain districts a homesteader may secure an adjoining quarter-section as pre-emption. Price \$300 per acre. Duties—Six months residence upon and cultivation of land in each of three years after obtaining homesteaded patent. If he cannot secure a pre-emption, he may take a purchase in certain districts. Price \$300 per acre. Must reside six months in each of three years, cultivate 60 acres and erect a house worth \$300.00. Holders of entries may count time of employment as farm labourers in Canada during 1917. Residence duties under certain conditions.

When Dominion Lands are advertised or posted for entry, returned soldiers who have served overseas and been honorably discharged receive one day priority in applying for entry. Local Agent's Office (not Sub-Agency) and Design papers must be presented to Agent.

Deputy Minister of the Interior N.B.—Duplicate publication of this advertisement will not be said to.

ADMIRAL SIMS AN OUTSPOKEN OFFICER

A Man Of Ideas Who Has Little Patience With Red Tape LIKENED TO BEATTY Took a Large Part In Up-building of the U. S. Navy

(From the New York Sun)

"How under the sun did Sim's win his detail? How could a man of his high expect favor from the department? The popular queries that have been heard frequently since Vice-Admiral William Snowden Sims was chosen to command the American naval forces in Europe—Sims the out-spoken; Sims the aggressive advocate of many reforms in our fighting fleet; Sims, the man who talked much and often; right out in meetings; Yes, the very Sims who was officially reprimanded about six years ago when he declared that America might be counted upon to give every man, every dollar and every drop of blood in supporting the British empire if that realm were ever menaced by an external foe.

A veritable revolution was made in the head of a family, or any male over 18 years old, who is at the commencement of the present year, and has since continued to be a British subject or a subject of an allied or neutral country, may apply to the Registrar of available Dominion Land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at Dominion Land Agency or Sub-Agency for District. Entry by proxy may be made on certain conditions. Duties—Six months residence upon and cultivation of land in each of three years.

Up to 1909 we were at least equal to them. Then came the slump immediately after that, and the fault was with navy officers; they made a fundamental mistake. That mistake can be readily understood by a simple illustration: "If you had a company of a hundred men that you were to teach to shoot with rifles so that they could fire volleys that would go accurately to the mark, you would take each line of men individually out to a target, and say, 'Now, there, fire away,' and you would drill him until he could hit the mark."

"The competition would be gone out of it; there would be no personal interest and you could get any good out of it at all. Now exactly what we did up to 1909 was to train the crew of a ship, the gunpointers and gun crews, the same way you would train a company of soldiers, one at a time.

"We let every gunpointer know and every man who loaded the gun, and everybody else knew that we were going to fire the guns individually, one at a time, on a range so short that they did not aim properly, we would find it out, and if they made a good record we would give them a reward, and if not we would give them a black eye. Those are the two things that tend strongly toward efficiency—rewards and punishments—the bouquet and the black eye, and they get busy. That is what we used to do, and we made very remarkable shooting records under that system."

"Finally, about 1909, the people who cannot think, or do not think, and who are not a certain amount of criticism of target practice metous in the navy—conceived that we were wasting many hundreds of thousands of dollars a year in firing at short ranges when we ought to be learning to hit the enemy at long range; and I give you my word, they abolished the sort range practice, and that happened which will be ways happen with ordinary, everyday human nature, namely, the efficiency in shooting began to go down.

In 1912 I pointed out exactly what had happened that the target practice was an utter and absolute wreck.

"Up to 1909 we had a book which was written in my office by my assistants and which contained all the information we had about gunnery and all the practical details and directions. It was the bible of the gunnery officer; it was given to every

or bureau is the official adviser of the secretary of the navy by law as to whether that criticism is just or not, and you simply could not get by it. "Criticism after criticism came in and you can imagine what the man who was responsible would say. He had designed the appliance criticized and naturally he believed in it.

"As soon as we found out that we could not shoot that criticism was sent, and I reported the defects of the open turrets, etc. to the department. I was a young officer out in China, a young lieutenant, young in grade though not in years. It was in 1900 and 1901.

"I was young and innocent at that time and I supposed of course, that when such things were brought to the department's attention like that they would jump at the chance to rectify them; but it was not until some time afterward that I found not only that there was nothing being done but that there was nobody in the navy department who had heard about these reports; and I wrote a great many of them from China, and I deliberately used rather unofficial language, because I wanted to get something loose, but I saw later that it was an entire mistake.

"I therefore wrote a letter to the president of the United States in 1906 over the head of the commander in chief of the China station and over the head of the navy department, it was the rankest possible kind of insubordination; but according to my idea, when a situation like that arises where you know that you are absolutely right and where there is nothing doing complete military subordination becomes cowardice. I conceived it to be my duty to take the chance.

Detailed to Teach Navy

"Now, I do not claim any credit for what resulted, but we immediately bounded into the air with our shooting, because I brought home the ideas that were originated by that wonderful man Vice-Admiral Sir Percy Scott, and since that time we have gone along quite well in target practice.

"The target practice in the navy from the time we took Scott's system until about 1909 was very satisfactory indeed, as far as our information went. The Englishman is said to be much more conservative than the American. When I got the information concerning his new methods from Capt. Scott, for that was his rank when in China, and brought it home, President Roosevelt pushed it along and we went ahead of the British navy in shooting, because the British navy admiralty was not willing to accept Scott's ideas at that time.

"Up to 1909 we were at least equal to them. Then came the slump immediately after that, and the fault was with navy officers; they made a fundamental mistake. That mistake can be readily understood by a simple illustration: "If you had a company of a hundred men that you were to teach to shoot with rifles so that they could fire volleys that would go accurately to the mark, you would take each line of men individually out to a target, and say, 'Now, there, fire away,' and you would drill him until he could hit the mark."

"The competition would be gone out of it; there would be no personal interest and you could get any good out of it at all. Now exactly what we did up to 1909 was to train the crew of a ship, the gunpointers and gun crews, the same way you would train a company of soldiers, one at a time.

"We let every gunpointer know and every man who loaded the gun, and everybody else knew that we were going to fire the guns individually, one at a time, on a range so short that they did not aim properly, we would find it out, and if they made a good record we would give them a reward, and if not we would give them a black eye. Those are the two things that tend strongly toward efficiency—rewards and punishments—the bouquet and the black eye, and they get busy. That is what we used to do, and we made very remarkable shooting records under that system."

"Finally, about 1909, the people who cannot think, or do not think, and who are not a certain amount of criticism of target practice metous in the navy—conceived that we were wasting many hundreds of thousands of dollars a year in firing at short ranges when we ought to be learning to hit the enemy at long range; and I give you my word, they abolished the sort range practice, and that happened which will be ways happen with ordinary, everyday human nature, namely, the efficiency in shooting began to go down.

THE GENTLEMEN'S VALET

CLEANING, PRESSING, DYEING AND REPAIRING, LADIES' WORK A SPECIALTY

Good called for and delivered on the shortest notice. G. H. W. Beck, 132 Market St.

By Courier Lensed Wire

London, Monday Aug. 6.—Official announcement was made at the Admiralty to-night that Admiral Sir Cecil Burreym, first lord of the admiralty, will be replaced by Vice-Admiral Sir Ross Wemyss, Alan Garrett and son, hitherto vice-chairman of the wheat commission, succeed Sir Eric Campbell as first lord of the admiralty.

There is no implication of any act against Admiral Sir Cecil Burreym, whose services as Admiral's second in command of the fleet, and whose appointment to the admiralty was announced as a precautionary measure, and it is declared change ought to have been complete as to give the country a more energetic and more offensive spirit.

Another change in the admiralty is the removal of Sir William Ham Greene from the permanent secretaryship in the ministry of munitions under Winston Churchill. Sir William's departure from the admiralty is regarded as considerable importance, as the permanent secretary, which has held since 1911, always been largely responsible for the continuity of admiralty policy. It is this continuity which is regarded as a dangerous factor in that it is initiative and adaptability to needs.

Something happened as soon as Sims took up his new duties and the men of the flotilla promptly realized that he was attacking the problem of the destroyers just as he had grappled with the intricacies of gunnery, and everybody felt that the old days were being revived.

"The competition would be gone out of it; there would be no personal interest and you could get any good out of it at all. Now exactly what we did up to 1909 was to train the crew of a ship, the gunpointers and gun crews, the same way you would train a company of soldiers, one at a time.

"We let every gunpointer know and every man who loaded the gun, and everybody else knew that we were going to fire the guns individually, one at a time, on a range so short that they did not aim properly, we would find it out, and if they made a good record we would give them a reward, and if not we would give them a black eye. Those are the two things that tend strongly toward efficiency—rewards and punishments—the bouquet and the black eye, and they get busy.
