WEEKLY REVIEW.

WEDNESDAY, February 8.

PRODUCE.

market showed a decidedly unfavourtace in the latter part of last week, when verything seemed to be neglected and nearly il tending downwards, under the influence of SEEDS-New clover, fit for shipment, has sold to a small extent at \$5.25 for cars; on all other sorts buyers and sellers are apart, with nothing or are generally continued to increase slowly, nd stood on Monday as follows: - Flour, heat, 75,251 bush; oats, *nil*; barley, 59,255 ceas, 72,065; and rye, 12,493 bush; against on he same date last yeer-Flour, 16,190 bbls; fall wheat, 169,258 bush; spring wheat 171,276; jata, 166; barley, 155,251 peas, 64,109; and rye, 2,786 ushels. Outside advices show English quote-tors down on spring wheat 171,276; jata, information of the states day at \$10 bill, 500 bills; fall wheat \$25,000 continued to; increase slowly, and stood on Monday as follows: - Flour, hear of the states, has pretailed. Street re-ceipts small and prices from both ing doing in car-lots, prices of which may be regarded as nominal. Street receipts have been wanted, as a former prices is sheep's carcasses have been date last yeer-Flour, 16,190 bbls; fall wheat day and on club 3d. Markets during the theast fac, and on club 3d. Markets during the theat throw day bar bush way been recovering some the states, and on club 3d. Markets during the theat throw day bar bush way been recovering some the states, and on club 3d. Markets during the theat throw day have been recovering some much as this. The fact is that four customers acem to have disappeared, orders for wheat to have been diverted to markets selling lower than we are, barley to have been unsettled and waiting for something to turn up, and buyers and sellers apart on peas. Stocks have generally continued to increase slowly, and stood on Monday as follows :- Flour, 18,300 bbls.; fall wheat, 97,835 bush.; spring wheat, 75,431 bush.; oats, nil; barley, 459,295 peas, 72,065; and rye, 12,498 bush; sgainst on the same date last year—Flour, 16,190 bbls; fall wheat, 169,258 bush; spring wheat, 171,276; bata, ,168 ; barley, 155,921 ; peas, 46,109 ; and rye, 2,776 wheat 2d., and on club 3d. Markets during the last three days have been recovering some-what, which recovery is probably due to the fact that a continental demand has set in. The tendency during the whole of last week, notwith-standing the short supplies in the week preceding, was downwards in consequence of the large quantities of foreign wheat expected to arrive shortly. Provincial markets were equally dull with those at the great seaports, which fact is sited as evidence that millers expect a decline. Supplies during last week were on the increase ; imports amounted to 290,000 to 295,000 grs. of wheat, and 190,000 to 195,000 bbls. of flour, and me deliveries to 122,236 qrs., making a total supply equal to 519,111 to 526,928 grs. of wheat, egainst an average weekly consumption of 454,000 guarters. The quantity of wheat and flour in transit last week has not been telegraphed ; that on the 27th ult, amounted to 2,575,000 qrs., against 2,368,000 qrs. on the 13th ult, and 2,162,000 qrs. on the corresponding date in 1880. It will be seen from the above that deliveries of homegrown whest have again been very small; and it is now generally thought that this could not have continued to be the case for the last two growths had the yield been as large as it was esti-mated it should be observed, forwayer, that notwithstanding these small home deliveries and decreased exports for this side the total supply of the United Kingdom from the opening of the harvest-year to January 15th was equal to 9,777. 500 quarters. This supply in the above period of the quarters. This supply in the above period of twenty weeks was equal to 483,000 quarters per week, or considerably above the average con-munition; and only 240,000 quarters below the sup-ply in the corresponding part of the previous year. Continental advices are meagre this week. In France provincial markets were almost destitute of grain; millers were said to have no great re-provide ware up in 24 markets; form The grain ; miners were said to make in grain ; miners were said to make in 24 markets; firm in 21, and unchanged in 31. Flour was dearer in consequence of difficulty of transport. Imports were small, being only three-fourths of those of the preceding week. Marseilles was quiet; the stock in the dooks on the 15th uit. was 175,000 quarters. German markets were generally depressed. In Hamburg at latest advices there had occurred severe frost and heavy snowfalls. The Elbe from that city up the river was covered by firm the covered assign to for foreverse. while seawards navigation for steamers was to open by ice-breakers. The demand for all criptions of grain continued limited, but as the were not heavy, prices remained un-ared. Best yallow Holstein and Mecklenburg pats were held at 69. to 52a. 6d, per 604 ib. the November report, continued, and the very general opinion was expressed that the yield of wheat promised to be nearly equal to that of the past season. The straw was somewhat aborter, but the ear well headed, and looking vary healthy, and the average was probably somewhat about that of the preceding crop. In the States much weakness and depression were general during the latter part of last week. At New York there were made large deliveries on the February options which were too heavy to carry, and this, coupled with the unfavourable European advices, gave buyers a marked advan-tage, and in spot red and futures a decline of 15 to 20, per bushel was submitted to, and even at this concession few shippers evinced any inclina-tion to do business. Most shippers' limits were reduced daily after Tuesday, and there was very little legitimate export enquiry heard. The feeling understand that some round lots of inferior have changed hands at 11c. Bors-There has been scarcely any offered all week, and any to be had have been readily taken at 25c. for limed, which price would have been paid today. Street receipts also very small, and for 30 to 40c, has been paid for really fresh. It must be understood, however, that the mild weather cannot fail to be followed by increased supplies, and these by an immediate fall in prices; our quotations are not for next Satur day. little legitimate export enquiry heard.
