JERUSALEM'S PUBLIC OVENS. One Cave-like Vaults Running Be-low Street Level.

In the country of the country of the public baker of the public ovens. These are to be found in almost every street. They are cave-like vaults, running down below the street level. At the back of each vault is the oven, with a sort of well before its open door. In the well stands the baker, with a long paddle in his hand, upon which he puts in and takes out the loaves. The oven floor is marked out in blocks, so that the baking of each family is put on a separate block. The loaves, which are about an inch thick, are of the size of a tea plate and have a hole in the centre. The baker makes them from the dough, baker them, and returns them hot from the oven to the customer. He receives two cents for each half dozen loaves, or he may instead take a toil of one loaf for each dozen. Before starting the baking he greases the floor of the oven with olive oil.

NEW PARAGRAPHS.

Electric carpets are the latest in-ention for the heating of rooms, the oat for one room being estimated at helfpenny an hour.

It is interesting to note the progress that is being made by the Grand Trunk Pacific Ry, and for the information of the public we publish the following particulars regarding this great Transcontinen tal Ry. The lines at present in operation are as follows:

Fort William Northwest via Winnipeg, Saskatoon, Edmonton and Edson to Fitzhugh—1472

Prince Rupert to Copper River -100 miles.

Canora via Yorkton and Mel ville to Regina—151 miles.
Tofield! Alta. to Mirror—70

There is also a total mileage of about 900 on other sections of the Eastern Division which is in partial operation by constructian trains. The tollowing lines are under construction:

Fitzhugh, Alta., to Copper River, E C.—618 miles Regina, Sask. via Mocse Jaw

northwest-93 miles. Regina, Sask. to International boundary-90 miles. Young to Prince All ert, Sask .-

Oban to Battleford, Sask .- 80 ag'in!

Mirror, Alta. to Calgary-124 Diggar, Sask. southwest-50

Alberta Coal Branch-60 miles.

# \$3,600 in Cash Prizes for Farmers

WHEN you enter the Canada Coment Prize
Contest, your dealer will assist you.
Consult him in reference to conditions
of the contest. Refer all questions of doubt to
him to decide. Confer with him when his experience and advice and his knewledge of our
plan would seem helpful.

Don't hesitate about doing this. We have
requested him to assist to the best of his ability
any farmer in his locality competing in this contest—whether it's a matter involving the application of cement, or hew to go about winning one
of the prizes offered in this contest. Do you
realize that you have as good a chance as the
next man to win one of these prizes? There are
four for each Province, as follows:

PRIZE "A"—3100.00 to be given to the farmer in each
Province who will use during 1911, the greatest number of
DANADA" Cement of PRIZE "A"—100.00 to be
given to the farmer in each Province who in 1911 assistance in each Province who farmer in each Province who is 1911 to the
farmer in each Province who farmer to each greatest number of
DANADA" Cement of the greatest number of
DANADA Cement of the greatest number

showing the best of any particular kind of work done on his farm during 1911 with "CANTADA" Cament. PRIZE "D"—3100.00 to be given to the farmer in each Prevaince who submits the best and most complete description of hew any particular place of work shown by accompanying photograph, was done.

Contest will close on November 15th, 1911, and as soon as possible thereafter, prizes will be awarded.

Be sure and get a copy of our Centest Circular, tailing all about the centest. Ask your dealer for one or use the attached coupen, if you find it more convenient.

In writing un mention whether you have received y copy of "What the Farmer Can De With Concrete," previously-likestrated, 160-page heats, which delle you have to build with Temeson, so that you can do much of the work yourself. It's a mighty handy and useful beet, and should save you many a deller. Farmers who have received it, any a deller.

Canada and Great Britain.

Mr. Richard Grigg, His Majesty's Trade Commissioner to the Dominicon of Canada, has some interesting things to say about the development of commercial relations of the Domininon and the Mother Country.

The promotion of closer trade between Canada and Great Britain depends solely on the efforts of the Dritish producer. It is obvious that a certain responsibility rests also upon the merchants and the community at large in the Dominion. If British trade with Canada is to increase until it occupies the position which a true conception of Imperial interests seems to demand, it is necessary that from the Canadian side every opportunity should be afforded which equitable legislation and a sympathetic public opinion can offer. It is therefore incorrect to speak as it the problem before us were one which the unaided efforts of the British trader could scive. It must be remembered, especially in Canada where there is a tendency to complain of the conservative methods of the British producer, that at the present time very strenuous efforts are being made in financial and industrial circles in the United States to control and indeed to dominate, not only the trace, but the whole commercial life of the Dominion. If these efforts are to be combated it cannot be done merely by arousing the British merchant to greater efforts, but it must depend to some extent on the amount of co-operation afforded him by the importers and consumers of the Doninion.

### Prestige and Irishmen.

A well known Railroad president, in his study of all classes of men who are under him, entertains a great admiration for the Irish foreman of a gang of laborers who went to any lengths to show his men that he was the real boss. One morning this forenan found that his gang had put a hand car on the track without his orders.

"Who put that han car-r-r on the hrack?" he asked.
"We did, sor," one of the men answered respectfully.
"Well," he said shortly, "take it off

The laborers did so with some dif-

ficulty.
"Now," said the foreman, "put in on ag'in!"

There are Monuments in all sorts of cut-of-the-way places, but one that is really unique is that erected in a river. It stands in the Parramatta Kiver, New South Wales, a stream known the world over for the rowing events that have taken place upon it. This monument, which is in memory, o. the world-famed rower, Searle, is also urique from the fact that it has been used as the winning-post of the races for the world's championship, and is still used as such for local world.

The Emperor Gorges Himself. The "Hoei Pao" says that an American doctor recently visited the palace at Peking to examine the baby palace at Peking to examine the baby Emperor, who, it was found, had gorged himself with a meal of swallows' nests (a sort of glutinous material), and thus provoked a raging thirst. The indisposition yielded easily to the doctor's treatment. The Emperor sleeps in a gigantic bed, big enough for six people! he rises at six, at once has a meal of rice-gruel or rice, and then goes to pay his respects to the Dowager Lung-yu.

# Rung himself to Death.

Rung himself to Death.

Extraordinary circumstances attended the suicide of a church sexton at the Hungarian village of Koros-Bajany recently. The inhabitants were alarmed by the violent ringing of their church bell, and thought a fire must have broken out. As, however, none could be seen, some of them went to the belfry to discover the reason, and there found the body of the sexton dangling from the bell-rope, with which he had hanged himself.

The Finance Committee of the Diet of Oldenburg has determined to tax bachelors and spinsters. All such having reached the age of thirty will be liable, if in receipt of an income of £210 per annum, to a 10 per cent. It.X. The new tax will fall almost exclusively upon men.

# Canada's Post Office.

A Devonshire lady once sent to her son a pair of trousers by book post, which is, of course, cheaper than par-

which is, of course, cheaper than parcel post.

The postal officials wrote to her:
"Clothes cannot be sent by 5cok post.
If you look in the 'Post Office Guide,'
you will see under what conditions
atticles may be sert by book post."

After a few days the lady replied:
"I have looked in the 'Post Office
Guide' and find that articles which
are open at both ends may be sent
by book post. And if treusers are
not open at both ends I should like to
know what is "

New Invention to Test Runners as They Run Around the Track.

They Run Around the Track.

A novel invention in the chape of an apparatus for automatically taking measurements of the work of track athletes at all points in a race has just been installed on the running track in the Robinson gymnasium, Kansas University.

The machine, which is the first of its kind, and the invention of Dr. Naismith, director of physical culture, consists of small bamboo sticks, located along the track so as to divide the course into quarters.

The sticks project over the track and are touched by the breast of the runner as he passes. The bamboos are connected to a make-and-break electrical machine, which transmits the touch of the runner to a kymograph, which holds a lampblacked paper on which marks are mach. A clock is used in connection with the kymograph for purposes of timing.

## THE FIRST MENU CARD.

Thirteen years ago, on a New York park bench, Thomas Corrigan told Patrick Goff about unclaimed property in the Bronx that belonged to a cousin, Henry Goff, who had been drowned leaving no 'smediate heirs. On the strength of the tip, Goff got possession of property worth \$250,-000. Corrigan is now suing for \$10,-000, which he says Goff promised him. Goff says he never promised any such thing, but gave Corrigan \$50.

# REAL GOLD BRICKS.

Kiln Erected on Ancient Gold Mine in India.

Gold bricks, real ones, may be the means of restoring the ancient frame of Golconda, near Hyderabad, in southern India, once known all the world over for its gold mines, but now a decayed city. The natural pits from which many centuries ago the precious metal was extracted have in course of time filled up with water. A contractor recently obtained permission to make bricks near the place and ten kilns were erected. The first finished bricks aroused curiosity by their yellowish tint, and analysis proved that they contained gold dust. On the basis of the yield of the sample bricks, the ten kilns will aggrogate in weight about 12,857 pounds of gold worth over \$50,000.000. The site of the find belongs to the Nizam, or native ruler. or native ruler.

A credulous man was the census

A credulous man was the census enumerator.

When Brawney the blacksmith declared he was 60, he believed him, despite the blacksmith's robust appearance, for robust blacksmiths seldom show their age.

When Susan the spinster declared she was 23, he believed her also, despite her crowmarks and greying hairs (for spinsters do not care to show their age, either.

But when Isaac the idiot wrote the figures 120 under the heeding "Father, if living," the Census culmerator rubbed his nose doubtfully and thought this was a little too much.

"You don't mean to say," he ex-

"You don't mean to say," he exclaimed, "that your father is really 120 years old?"
"Ne o' course 'e ain't!" retorted Isaac complacently. "But 'e would 'a' been if livin'."

# Her Habit.

"What do you think the young wife of old Moneybags has developed into? She is always crossing or recrossing the ocean. She certainly keeps the transatiantic line busy."

You know, she was formerly a telephone girl.

# Swat That Fly.

Swat That Fly.

The transmission of disease by the fly is no longer a mere theory, but is a truth that has been scientifically established.

Keep the flies out of your house. Get screens for the doors and the windows. Be on guard all the time. Keep screens over articles of food. Don't let flies get near the pantry, kitchen or diningroom.

Be doubly careful about keeping flies out of the sickroom. They arilikely not only to bring complications of new diseases, but to carry the invalid's disease to many others.

Those who put in their screen promptly will be taking the best precaution against having disease gover introduced into their homes by firm.

There is more health in a bout well screened than in many a doctor's.

About 50 metals have been disc vered in the last 200 years by chen explorers, but uses have been four for only a few of them.

Recent explorations indicate China has coal fields containing fuel than those of all other containing in the world combined.

A new safety received including soap at a case less than fee carrying in

# **OPERATIO**

By taking Lydia E. Pinkham's Vegetable Compound

The following letter from Mrs.
Orville Rock will prove how unwise
it is for women to submit to the
dangers of a surgical operation when
it may be avoided by taking Lydia
E. Pinkham's Vegetable Compound.
She was four weeks in the hospital
and came home suffering worse
than before.

ORVILLE ROCK, R. B. To the Farmand Michigan.

If you are ill do not drag along until an operation is necessary, but at once take Lydia E. Pinkham's Vegetable Compound.

For thirty years it has been the standard remedy for women's ill-a, and has positively restored the health of thousands of women. Why don't you try it?

## No Resemblance.

"Now, Nora," said the departing physician to the Irish girl, who was nursing a bad case of fever, "if the patient sees snakes again, give him a dose of this medicine. I shall be interest."

The hour for his return arrived.
The physician once more visited the
sick patient, and found him raving.
He had been so, said the nurse, for

He had been so, said the nurse, for hours.

"And did you give him the medicine?" inquired the puzzled doctor.

Nora shock her head.

"But didn't I tell you to give it to him if he saw snakes again?" demanded the physician.

"But he didnt say he saw snakes this toime, dochter," replied the rurse, confidently. "He said he saw red-white-and-blue turkeys wid straw hats on!"

# Utilizing Waste as Fuel.

Utilizing Waste as Fuei.

The greatest work which has been carried on by the British in Egypt, since their occupation of that country has been the construction of dams along the Nile for the purpose of providing water for irrigating the Nile Valley. As a result of this work vast areas, previously waste, have been brought under cultivation and the output of the country vastly increased. Another enterprise, of little less importance, is now under way. This is for the purpose of utilizing sudd, a thick tangle of water plants in the Nile bed. This growth has for generations seriously interfered with the navigation of the Nile. It has recently been discovered that it can be utilized as a fuel. The new fuel is known as suddite.

# The New Boarder Again.

The New Boarder Again.

"For ten eyars," said the new boarder at a Montreal boarding-house, "my habits were as regular as clockwork. I rose on the stroke of six; half an hour later I sat down to breakfast; at seven I was at work, dined at twelve, at supper at six, and was in bed at nine-thirty; atte only hearty food, and hadn't a sick day in all that time," "Dear me!" said th edeacon in sympathetic tones, "and what were you in for?" An awful silence ensued.

## **Know an Auto** From Hood to Tires

Expert knowledge of automobile construction is essential to car owners and drivers alide. To the owner it means certainty when judging a car, and a great saving in cost of up-keep. To the driver is means a greater demand for his services, a larger salary, and a permanency of position. To both it means knowing if a car is right, and, when not right, exactly what to do and how to do it.

All this value his hoperledge is set forth in
