WINTER DAIRY HINTS

Cleanliness and Succulent and
Concentrated Feed Essential.

Grass is the Natural Feed of Cattle
—Make Winter Feed as Much
Like It as Possible.—A Ration for
Laying Hens Which Has Brought
Results at the O. A. College.

(Contributed by Ontario Department of
Agriculture, Toronto.)

THE whole question of winter
care of dairy cattle may be
summed up in one word—
comfort. In order to obtain
this, the cattle require a comfortable,
clean, well-ventilated, well-lighted
stable. The stalls, where animals are
tied, should be of proper width and
length to accommodate them without
discomfort; and also be so con-
structed as to keep them clean with-
out too much labor on the part of
the person in charge. Plenty of bed-
ding is needed, and an absorbent
such as cut straw, shavings or saw-
dust, to take up the liquids which
cause so much dirt and discomfort
to both animals and attendants. A
cement gutter behind the animals
having the required amount of ab-
sorbing material placed in it daily,
after cleaning the stable, is the best
plan of keeping stable and cattle
clean. If there be some shavings,
sawdust or fine straw scattered along
the passage behind the cows, it as-
sists in cleanliness and lessens labor.

Feeding.
The natural feed of cows is grass.
The feeder of cows never goes far
astray if the winter ration is made,
so far as possible, similar to that of
grass. This is got by using silage and
roots, mixed with the dry, bulky
fodders, like straw and clover hay.
The mixing may be done by the feed-
er, if he has time to do so; or it
may be done by the cow before and
after eating. The cow carries a won-
derful mixing apparatus in her stom-
ach, and so far as this part of feed-
ing is concerned, she can do the
necessary work of mixing feeds. Mix-
ing before feed is given to the cow,
often adds to its palatability and
hence usually pays.

In addition to the succulent and
dry bulky feeds mentioned, a cer-
tain amount of concentrated feed in the
form of meals, such as ground oats,
oats and barley, wheat bran, oil-cake,
or cottonseed meal. Standard Dairy
Feed fills the bill excellently in this
regard.

Watering Cows.
Next in importance to feed, comes
water for milking cows. When cows
are producing large quantities of
milk they must have large quanti-
ties of water. This may be supplied
in the stable, or in a trough outside.
In fine weather, animals are better
for being watered outside in the
fresh air daily, and they can be con-
veniently watered at that time. In
very cold or stormy weather, they
should be watered inside.
Comfort, cleanliness, succulent
feed, along with a reasonable amount
of concentrates, and plenty of water
and fresh, pure air, are the main
things required by animals giving
milk in winter.—Prof. H. H. Dean,
O. A. College, Guelph.

Feeding Laying Hens in Winter.
In order to lay well a hen requires
a surplus of food above body main-
tenance. That is a hen must be in
good flesh, not thin. A good laying
hen is seldom very fat. The yolk of
an egg contains considerable fat. The
white is mostly muscle forming food
and the shell largely lime. There
must be a supply of these over and
above what is required to daily main-
tain the body.
In summer a hen eats tender grass
or green shoots, some whole grain,
generally some ground grains, usually
worms or insects, picks up some
gravel or old plaster, and in doing
so takes exercise. If she has to
hunt all day for these, at times she
does not lay very well because she is
working hard getting something to eat.

We are feeding now, at the O. A.
College a grain mixture of about the
following: Seven parts of cracked
corn, two parts of barley, two parts
of good oats, one part buckwheat,
and three parts of feed wheat. This
is fed in deep litter night and morn-
ing, the hens going to bed with a
full crop.
During cold weather it is advisable
to feed a mixture of nearly half corn
or buckwheat. A hen will do a little
better on such feed. A mixture of
two or three kinds of grain gives
variety.

At noon, cooked waste house
scraps, such as potatoes, cabbage or
other vegetable trimming, together
with the table scraps, make a good
foundation for a wet mash. These
scraps are best fed in a crumbly
state. Dry them off with whatever
chop you may have. A mixture of
shorts, barley meal, and oat chop in
equal parts, is very good. We use
a dry mash which is fed in hoppers.
This is in front of the birds at all
times. We are using Government
Standard Hog feed. We have used
in previous years, very successfully,
rolled or crushed oats.
These ground grains should con-
tain fifteen to twenty per cent of
high grade tankage or beef scrap.
Where milk is given as drink no
meat scrap would be necessary.
Be sure to supply green chop, suc-
culent feeds, such as waste cabbage,
roots, clover leaves, or sprouted oats.
There is an art to feeding. When
feeding the whole grain night and
morning watch the bird scratch. If
they are very active feed liberally;
if somewhat indifferent ease off in
the amount for a feed or so. Keep
the litter clean and dry.—Prof.
W. B. Graham, O. A. College, Guelph.

After clouds comes sunshine.
After despondency comes joy.
After sickness comes health.
After weakness comes strength.

In the spring when you're "all
in"—fagged out—blood thin, if
you will turn to Nature's remedy,
a tonic made from wild roots and
barks, which has stood fifty years
as the best spring tonic—you will
find strength regained. No need
to tell you it's Dr. Pierce's Golden
Medical Discovery, put up in tablet
or liquid form, and sold by every
druggist in the land. After a hard
winter—shut up indoors, your blood
needs a temperance tonic, a tissue-
builder and blood-maker such as this
"Medical Discovery" of Dr. Pierce's.

STANFORD, ONT.—"I can highly recommend
Dr. Pierce's Golden Medical Discovery and
Pleasant Pellets. I have used these remedies
twenty-five years in my family. Had a very bad
case of neuritis and 'Golden Medical Discovery'
completely cured me in a very short time. I
have given it to all my family, also to my grand
children. I had a grand-child last summer that
we thought could not live. We gave him the
'Discovery' and he is strong and healthy as any
child could be. I am a great believer in Dr. Pierce's
Medicines and would not be without
them."—Mrs. A. DOWLING, 58 Railway Ave.

New York, April 11.—Sydney Drew
actor on the stage and/or the moving
picture screen, died Wednesday at his
home here.

LOUISE KELLY, the Perfect Model in the Title Role of John Cort's
Musical Comedy "Flo Flo" at the Grand Opera House one Saturday
April 12th.

PENSION FIGURES

Ottawa, April 11.—In the Commons
Hon. N. W. Rowell stated that the
number of former private soldiers
drawing pensions was 33,371, with an
annual payment of \$4,851,730; and 2,400
former private soldiers had been
awarded gratuity amounting to
\$109,750.

MINERS NOW ON 8-HOUR DAY

"Eight-hour day in the mining in-
dustry of British Columbia is working
out with apparent success," said Hon.
Wm. Sloan, Minister of Mines, who
arrived at Toronto, yesterday from the
coast.

WON'T SPIN U. S. COTTON

Manchester, Eng. April 11.—It has
been decided that all spinning and
doubling factories engaged in working
on America's cotton in Yorkshire,
Cheshire, and Derbyshire shall stop
their spindles producing American
single yarns.

Another whilst drive and dance
was held by the Sons of England in
their hall last night and was largely
attended with friends from Merriton
and St. Catharines. Luncheon
was served and the party dispersed
to their homes about midnight.

Private Arthur Lawless who has
been in active service overseas for
some little time, returned home last
night. At present he is a guest at the
home of Mr. and Mrs. William Munro
Welland Street.

STORE OF SATISFACTION

Help Him to Help Himself

We owe the returned soldier every effort we can make towards securing steady employment for him.

Do not try to throw the burden entirely on employers. They have a grave responsibility, but only insofar as every man, woman and child gives willing help can Canada ensure a fair day's pay for a good day's work for all her men.

How can YOU help? By investing in War-Savings Stamps.

How will THAT help? Canada must secure foreign purchasers for the products of her forests, farms, and factories. Many nations are anxious to buy our goods, but can only do so if Canada grants credit to them.

Lend your money to Canada, so that Canada may re-lend to those who must buy on credit. The money is being raised by the sale of War-Savings Stamps, so that when you invest in a War-Savings Stamp you provide a day's pay for some returned soldier.

A War-Savings Certificate with 10 W.S.S. affixed will be redeemed by the Dominion of Canada on January 1st, 1924, for \$50.00, for at that date the W.S.S. are worth \$5.00 each.

War-Savings Stamps cost \$4.02 in March; \$4.03 in April; \$4.04 in May, and they may be purchased at any place displaying the Beaver-Triangle sign.
