Harry Mills early this week of the erosion along the shores of Pelee Point, no licenses will be issued by the department of mines for sandsucking operations after the close of the present season. Whether the existing licenses will be canceled has not been decided, but Hon. Mr. Mills intimated tonight that the department could hardly deal harshly with the firms now operating in view of the circumstances. It is likely that they will be allowed to finish out the season.

Reports to the department show that as a result of the cessation of operations around Pelee Island, following the passing of the beach protection act two sessions ago, the beaches are beginning to build up again. new and untried remedy which might be dangerous to your darling's health.

# Do Your Bit to Prevent Bush Fires

OUR co-operation—the co-operation of all the citizens of Ontario—is the biggest need in Ontario Forestry to-day.

History shows that impoverishment and national decline follows from the destruction of a country's forests. Most of the area of this Province is non-agricultural, suited Nature only for growing trees. This land remains yours but

the Government sells the trees. Every summer in Ontario an average area of 425,000 acres of forest land is burnt over, equal to a strip 130 miles long by 5 miles wide. This yearly desolation at the hands of her own people is gradually northern part of the Province into a rocky desert. On thousands of acres, even the soil has been destroyed by fire!

## Save Ontario's Forests They're Yours

The average yearly number of forest fires in Ontario about 1,275. The vigilance of the Fire Rangers keep two-thirds of Ontario's forest fires down to an average size of less than five acres. But the others are big enough to raise the total average to 350 acres.

Forest fires in Ontario are derorest ares in Ontario are de-stroying provincial assets of tim-ber and pulp wood upon which the Province relies to help pay her share of Canada's War Debt. Forest fires destroy fish and game, degrees the regularity of stream decrease the regularity of stream flow, cause spring floods, land erosion and the crippling of water powers; turn revenue-producing areas into rock deserts.

Out of every 100 fires in Ontario's forests only three are caused by lightning, while ninety or more are due to man's carelessness. One thousand men scattered over 100,000,000 acres, have little chance of preventing fires. All they can hope to do is to see the smoke in time to check them and put them out before they spread beyond control.

The problem of adequate protection of Ontario's Forests from fire is almost entirely a moral one fire is almost entirely a moral one involving the whole public of Ontario. The vast majority of forest fires are caused by human carelessness due to lack of civic responsibility. The tendency is to leave all the responsibility to the Government for protecting the forests from fire. The Government cannot protect the forests ment cannot protect the forests ment cannot protect the forests belonging to the people of Ontario unless the people of Ontario co-operate. Forestry needs your patriotism, your public spirit, your regard for the general wel-fare of Canada.
