James Lesslie, who in his day was closely identified with the early history of Toronto, with its papers, with the stirring events of '37, and who was in intimate relations with Wm, Lyon Mackenzie, died at his residence in Eglinton on Sunday, in

was because some of the reformers thought in efficient or untrustworthy? English prisons are placed under government in it was not sufficiently partizan that spection, but the inspectors confine them-encouragment was given by the leaders of selves to a report to the home office, and In 1844 the paper went into opposition against the Baldwin-Lafontaine government, and continued its opposition for some years longer when it for some years longer when it was merged into the Globe. Mr. Lesslie for years published an almanac which had an immense circulation throughout the country. He was one of

much good, but charges against officers and men alike of petty theit, drunkenness, filthiness and such a lack of discipline as to make the regiment resemble more a howling mob at a midnight orgy than a corps of well-drilled soldiers on active service, can never be allowed to pass without notice. The honor of our citizen soldiery demands immediate inquiry, and no matter what the result, party exigency must not be allowed to stand in the way of its being strict and impartial. Before they left for the scene of trouble the bearing of the men of the \$65th was such as to make us doubt the wisdom of despatching them to the front instead of the rifles, the fusiliers or the Highlanders, but once under arms it is a grave scandal that they should not have

poraries some much needed informatio bout the country Riel, after all, will not have lived in vain.

What with Northwest troubles and Anglo-Russian complications, the mahd; has been completely out of court. For all that, however, he is ctill living, and in pite of fights with his rival, and divisions among his followers, it is reported intends to give the British considerable trouble before they march into Khartoum. In fact he is understood to have declared that ne would speedily put to the sword the remnant that will be left after suffering the tortures of an Egyptian summer. When the campaign reopens it is expected that the Soudanese will unite against their common foe-the English-and will prove as obstinate as if Abu Klea and Shebacass Wells had never been fought. In other words, Lord Wolseley has all his last rear's fighting to do over again.

We think the city council might have dealt more liberally in the appropriation for Island improvements than they have done, The Island now produces a very consider able revenue, and not only this, but an additional sum ought to be set apart for use for its improvement. We trust the council will yet see their way to doing more for this, our most popular resort.

Sunlit Rooms.

No article of furniture should be put in a room that will not stand sunlight, for the preparations to suppress it. As in the scannot be to find the right men and that if right men have all parts of our dwellings cannot be too constitute the great of tacle. The rate on the ben chosen it has been in deference to highly estimated. Indeed, perfect health not been chosen it has been in deference to the certain of some of the remote garrisons, such as hat of Edmon on, is as great a mystery as that of Kassa'a. The hard weather is favoring the decont at dhaffbreeds, who are evidently ver, numerous and well organized.

Although, as we have stated, the territories must suffer from such far fetched comparisons, yet there is something extremely laughable in Edmonton being likened to Kassa'a. If the rebellion only succeeds in giving our English contemporary and that the season of the paramount over those founded on the far for the idea that strong political claims must be paramount over those founded on the more common sense and prosaic grounds of the should never be excluded except when so bright as to be uncomfort.

is a misfortune; for people are deluded with the idea that these things only can be good or useful which cost measy. But remember that pure water, fresh air and susiit homes, kept free from dampness, will secure you from many heavy bills of the doctors and give you health and vigor which no money can procure. It is a well established fact that the people who live much in the sun are usually stronger and more healthy than those whose occupations deprive them of sunlight. And certainly there is nothing strange in the result, since the same law applies with equal force to nearly every animate thing in nature. It is quite easy to arrange an isolated dwelling so that every room may be flooded with sunlight sometime in the day, and it is possible that many town houses could be so built as to admit more light than they now receive.

Catarrh—A New Treatment.

Perhaps the mostextraordinary success that has been achieved in modern science has been attained by the Dixon reatment for catarrh. Out of 2000 patients treated during the past six months, fully ninety per cent, have been cured of this stubbor, malady. This is none the less starting when it is remembered that, not five persent, of the patients presenting themselves to the regular practitioner are benefitted, while the patient medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most generation are most strength of the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this accentplished, the catarrh is practical y cured, and the permanency is unquestioned, as tures effected by him four years ago are cures still. No one else has ever attempted to cure catarrh inthis manner, and no other treatment has ever cured ratarrh. The application of the remedy is simple and car be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the m jority of cases being cured at one treatment. Sufferers should correspond with Messrs. A. H Dixon & Son, 306 King street west, Toronto, Canada, and enclose stamp for their treatise on catarrh.—Montreal Star. 16

ufactured by Rainer & Co., Guelph, Ont The undersigned respectfully announce that on the 8th day of April, 183, Joseph F. Rainer diusolved partnership with Frank Sweetnam and John Hazelton, as piano manufacturers, and that said Joseph F. Rainer, with his son, will continue to manufacture the original of ossessale Pianos, of which the said Joseph F. Rainer is the sole inventor.

Since the above dissolution, Mr. Rainer, sw. has greatly improved the small Cross-scale Piano by adding one string more to each note throughout the middle, making three strings to each note instead of two, thus giving the Piano by the strings of the string to each note instead of two, thus giving the Piano third more power of tone throughout the middle. There will be fifty-three notes from the treble down that will have three strings instead of twenty-four hotes from the treble down that will have three strings instead of twenty-four hotes from the treble down as formerly. The undersigned will give to wholesale and retail customers the benefit of this improvement by letting them have these Pianos for the same price as the ones formerly made with two strings.

These Pianos have now been before the public for 23 years, and have always ranked among the very bees, and are celebrated for quality of tone, great power and durability of action, prompt elastic touch, fine finish and elegant style of case, centionized with every known improvement. The most complete and unbroken list on record, embracing a period of 30 years, and made up of 28 first prizes, medals and diplomas, received at the principal exhibitions in Canada—Montreal, Kingston, Toronto, Hamilton and London. At the Centennial Exhibition in Philadelphia, in 1876, we secured a medal and diplome for our plano. The great favor with which the creas-scale planos have been received for so long a period, and the reputation they bear, has induced others to imitate them. We therefore caution intending purchasers and dealers wishing to obtain the original cross-scale piano to see that the name of "Rainer & Co." is each instrument.
