The Herald rightly under ands the party leaders, hot a doubt it, but here is something mors. The orld yesterday morning published a despatch the London bank manager, in jail ought to consent to his permanent release when the motion comes up this week. He was temporfrom Parry Sound, giving a brief account of a reception tendered Mr. Laurier there Saturarily freed on Saturday. At first a little, backing cough, "This nothing lint a cold." They say, "Twill very soon wear off." Ana, the story old! The bacut oheek, the failing strength, Thu griet that cannot have. And life's wan fiame goes out, at length, In a consumptive's grave, at length, a cough, they would use Dr. Flerce's Golden Medical Discovery, when irritation of the lungs is indicated by a cough, it would be an easy matter to avert consump-lion. Be wise in time, day evening. Replying to an address from the Liberal Association, the hon, gentleman stated that Unrestricted Reciprocity is to be the main policy of the Liberal party. In other words, what he has to say to the Reformers of Ontario is from first to last one grand "dis-turbing speech," and the policy he has to hold up to the party is just about as disturbing a policy as the leaders dare propose. We would not claim that Mr. Buchanan must be right and that the Beform leaders He is Proud of Canada, Especially Editor World: The World deserves great credit for publishing its clipping from The Philadelphia Evening Stay on Toronto and its attractions. I should think we, as Torontonmust be wrong. But we fancy that nine business men out of ten will admit that they can not help taking that view of it. The view ians, should feel proud of our city and use every namely-that what the country needs now is, not the disturbance of a revolution in commerhonest endeavor to make it known throughout the world, so that travellers from all lands cial policy, but peace and quietness in which to improve the opportunities that are already within our reach. We desire to put in contrast together the wide counsel to give the country a rest from revolution in commercial policy; and the disturbance and agitation

which are being worked up by the advocates of P. Schprocity at all costs. It should scarcely be at all doubtful which of the two the busitful which of the two the busiman's view must be in favor of.

Divisions at Democrat Headquarters. There need no longer be any doubt of the t that there are serious divisions at the headquarters of the Democrat party over the border. The end of last week there were serious consultations at the headquarters aforesaid, which were participated in by several of the "heavy weights" of the party. It appears equally undeniable that the real cause of trouble is a want of unanimity as to what the party's position on the tariff

question should be. To appearance that was settled at the St. Louis convention, on which casion the freetraders carried nearly everything their own way ; and the protectionist minority was pushed away to the back seats and out of sight. This was owing principally to the fact that theirgreatchampion, Randall, of Pennsylvania, was disabled by ill health; and it has appeared unlikely that he will ever be able to take the field again. At first the free trade leaders seem to have thought that they could continue to carry the party with them; but as the campaign progresses this

does not seem so sure as it once did. Among "Tariff Democrats," who have at least a leaning towards Protection, these are Charles I was prisoner, the tenant of the least a leaning towards Protection, these are named ; Calvin S. Brice, chairman of the National Democratic Election Committee, ex-Senator Barnum, of Connecticut, an "old stayer" at election work, and Senator Gorman of Maryland. Among the extreme Free Traders who are in prominent position are mentioned the renowned Henry Watterson, of Louisville; Horace White, of Chicago, Mor-rison ex-speaker of the House. Chairman Brice became so pronounced that it is said Geveland himself had to be appealed to, with d Maryland. Among the extreme Pre-Traders who are in promonent position.

the world, so that travellers from all lands may be attracted to visit us, when on their fours to this vast continent. "Away," I say, "with imaginary defects of our city and of our country, and get down to the real ones, and have them rectified, so that our hands may be clean as chizens to offer and to welcome strangers who may come to visit us." There is not a city on this continent better blessed by nature than Toronto. Surely we ought to have brains enough to develop its resources and make it one of the most attractive and prosperous cities on this continent. Let us, as Canadians, stand firm and not cry as the lost. "Babes in the Wood" for fear of the bear com-ing, but let us be men and show to the world that we are able to manage our own affairs without the help of outsiders, however much tiesy may intimidate and sneer at our supposed weakness. We have a grand country, let us prove worthy of it, and not lead others to suppose that we are tired of it, and cannot any longer manage our affairs. Let it be understood we appreciate our birthright and intend maintaining it, in its integrity to the glory and honor of our much favored country. *Toronto*, Aug. 20. A Cirtizes. At Kansas City: R. H. A daughter Helen, who was in the second cance, only escaped a similar fate by lying down. The major, son and his companion returned the fire, and the cowards took to their beels and fied to the woods.
