

# NEW YORK EXCHANGE.

## MARKET LIFELESS—STOCKS FEATURELESS.

New York, April 25.

Market for Americans in London is dull and somewhat lower. Interest seems to be centred in the Mining Shares, the fortnightly settlement of which begins to-day. Possibly some disturbance may take place on account of the maturing of several large options of Anaconda. It is said that some of the operators have been caught heavily short.

St. Paul earnings, 3rd week April, increased \$76,607, and are largest of any 3rd week in April in the history of the Co. However, speculation for the time being in St. Paul appears to be dead and the regularity with which this road has broken the record, week after week, has made the speculators indifferent as to the showing made.

Further pending additional reports in regard to the condition of crops, it is not likely that any great speculative movement will take place in Grangers.

Considerable surprise was expressed yesterday at the price at which the Burlington 3½ when issued were selling, when the refunding scheme was first published the value of the rights was estimated at from 5½ to 5¾, the estimate being based on the supposition that the bonds would not be worth more than 97 yesterday they were 102 Bid. A partial explanation of the high price is the passage of new legislation in Albany, extending the class of bonds in which Savings Banks may invest. This class comprised the new B. Q. 3½.

There is now no doubt that the Monon has been bought by Vanderbilts. There is a suspicion that they bought or are about to buy the C. H. & D and that these two systems will ultimately be consolidated with Big Four.

It is reported in the Street that Governor Flower for time being is not bullish; certainly his brokers are comparatively inactive, the only stock in which they have dealt being Brooklyn Rapid Transit and they only buy this when it declines to near 130. Yesterday's advance in Sugar was variously described to manipulation by Mr. Keene and also to the story of an agreement with the opposition Company.

Money is likely to continue easy, but for time being outside speculation is dead, the market is influenced mainly by transactions of the professionals.

The March statement of the central road of N J I the first reflection of the improvement which has gradually been taking place in the anthracite coal industry since the beginning of the year. Part of the increase in the net was secured through a curtailment of the handsome increase over both 1893 and 1897. The Companys earnings both gross and net since Jan. first are now well in advance of the two preceding years.

It is unofficially reported that a similar decided improvement has taken place in the earnings of Delaware and Hudson and the same may be inferred with regard to D L.
