

If it can become a proximate cause of usefulness to any sick one whom it had helped to induce to resort to a remedy which more often than almost any other, shall prove successful.

L. J. PAPINEAU.

Montreal, April 19, 1850.

I, the Mayor of the City of Montreal, in Canada, certify and attest, as being within my own knowledge, the facts hereafter mentioned:—

1. The physicians who have given certificates attesting forth the virtues of the Plantagenet Waters are well known to me, as enjoying a large practice, and occupying a distinguished rank among the members of the Profession.

2. On my own behalf, I may say that I have used the Plantagenet Water, and know by experience its beneficial effects during the intense summer heats. I have often preferred this natural fluid to the Soda Waters and refreshing Syrus commonly used in hot climates.

I think myself fortunate in being able to add my disinterested testimony to that of the Physicians of this city, and confidently recommend to the public the use of the Plantagenet Mineral Waters. In doing so, I believe that I fulfil a duty imposed on all good citizens, that of assisting in the maintenance of the public health.

E. L. FABRE, Mayor.

**PLANTAGENET WATER.**

The following opinion of the beneficial effects of the above water, is from the last No. of the British American Medical and Physical Journal, edited by Dr. Hall. The Doctor recommends the employment of this water to the special attention of the Profession, both in Canada and the United States. Nothing further is required to ensure their general use by all classes of our citizens.—

Remedial nostras, or matters possessing to be such, and depending for their employment upon the extensiveness of the circulation of laudatory advertisements and the amount of money consequently paid by their proprietors for these, here at no time, since we undertook the management of a journal intended solely for the advancement of medical science, found favor in our eyes. Nor shall they. We have always adhered to the old maxim, "sic satura crepidum." We have always thought, and are daily convinced, that the truthfulness and correctness of our opinion, that all the world was never intended to practice the medical art, inasmuch as all men—ye and all women too—are enabled to make themselves masters of the science of medicine; and it must be admitted, without a caveat, that without a foundation there can be no superstructure. Not that we would dare to question the qualifications of all to become, perhaps even, scientific practitioners of the Healing Art—far from it; but seeing that different gifts have been assigned to different individuals, from the foundation of our world, and that one class is necessarily dependent upon another for its comfort and support—the rich and poor, the educated and illiterate, the professor of science and the simple mechanic—so we hold, that the public should be directed, under God, to the maintenance and preservation of health, by men who have given, and continue to give, the best energies of their mind to this particular study. It is under impressions of this kind that we direct the attention of our professional brethren to the advertisement of Mr. Larocque on the cover. We have, in common with our medical friends in this city, taken occasion, from time to time, to prescribe, in fitting cases, the Plantagenet Water, derived from a spring on that gentleman's property in the Ottawa District. Commendatory certificates from medical men, perfectly well known to us, have been published in the daily newspapers of this city; our own has appeared among the number. But we now hesitate not to recommend the employment of this water to the special attention of the Profession both in Canada and the United States. Mr. Hunt's analysis, as to its constant virtues, furnished at once the key to its applicability and usefulness. We are informed that the proprietor has made arrangements for supplying, during the forthcoming season, the Plantagenet Water throughout our own Province and the United States, by the establishment of necessary depots and the appointment of proper agents.

AGENTS FOR BYTOWN.—Richard Stebbins, Esqr., Sussex Street, Lower Bytown; Edward McGillivray Esq., Wellington St, Upper Bytown.

**PLANTAGENET WATER.**

MONTREAL, May 1, 1850.

I often recommended the use of the Plantagenet Mineral Waters to my patients, and they usually inform me that its action on the bowels has been satisfactory, and that in many cases it has also had a favourable influence on the general health.

M. McCULLOCH,

Lecturer on midwifery, and the diseases of women and children, University of McGill College.

MONTREAL, April 10, 1850.

Sir,—I have now prescribed this Plantagenet Water for upwards of a year, and I am happy very happy in being able to state to you, that the opinion which I formed of their probable usefulness, based on Mr. Hunt's Analysis, at the time of my commencing to use them, has been fully and satisfactorily verified by subsequent experience. I now recommend them extensively, and I have frequent opportunities of hearing from my patients that their employment has been attended with all the beneficial results for which they were prescribed.

I am Sir, Your obedient servant,  
FRANCIS BADGLEY, M. D.,  
Lecturer on Med. Juris., McGill College.  
To Mr. C. Larocque, Agent.

Sold by A. MANN, No. 4, Place d'Armes.

**PLANTAGENET WATER.**

THE Proprietor of the Plantagenet Springs Water has received the following Testimonials. The efficacy of the Plantagenet Water is now an established fact:—

MONTREAL, March 22, 1850.

Since August, 1848, I have recommended the Plantagenet Waters in a variety of Chronic complaints, and with good effect. It has proved very useful in Dyspepsia, Rheumatism, and Sciatica. Weakly and nervous persons, and those in whom there was an increased action of the bowels and kidneys, took but half a tumbler at a time repeated every hour or two. When possessed of more strength, and there existed a tardy state of the secretions, the water was more copiously partaken of; and in cases of Plethora, where a disposition to congestion predominated, with a tendency to fever, and irritation, it was taken to the extent of several pints a day.

It would be a most happy circumstance if "Mineral Waters," generally, were to supersede and be substituted for, the thousands of vile and pernicious compounds, under the title of Patent Medicines, with which a certain class of the community gorge themselves, to their manifest injury and to the advantage, solely, of the unscrupulous manufacturers.

WOLFRED NELSON, M. D.  
President Col. Phys. & Surgs., C. F.

**PLANTAGENET WATER.**

The following testimonials have been handed to us for publication:—

From the careful and scientific analysis which was made by Mr. Hunt, of the Plantagenet Waters, the enlightened Physician could at once proclaim that it was, in a great variety of diseases, acute and chronic—that he would prescribe their use, with the strongest reliance that he must thereby obtain the most favorable results. Experience soon confirmed the decision. Several of the Physicians of the highest standing and reputation in this city, and whose practice is therefore most extensive, because most successful, have published certificates testifying to the great efficacy of this invaluable medicine, which they have most frequently administered to their patients. Their authority is the one that ought to carry the greatest weight with sick persons, and persuade them.— Though I am a stranger to their learned profession, and have been blessed with such uninterrupted health, that I have not needed calling them to my aid, nor to make use of any remedy for several years, yet I attest, on my personal knowledge and observation, that many persons in my family, as well as in a large circle of friends, relations, and acquaintances, have used these Waters either under direction of their Physicians, or of their own accord, and that, in an infinite number of cases, they drew therefrom their cure, often, relief, at ways; inconvenience, never.

At the desire of the proprietor, with true satisfaction do I give him the present certificate, happy

**NEW GOODS 1850.**

THE SUBSCRIBERS, thankful for the patronage so liberally extended to them, beg to inform their numerous friends in Bytown and the surrounding country, that they have just opened an extensive assortment of DRY GOODS, GROCERIES, HARDWARE, CROCKERY, and GLASSWARE, which will compare with any other Stocks in the town, having been selected with great care in one of the best markets.
