

A Curious Physiological Case.

A curious freak in physiology has just happened in Georgia which some profess to see pointing to a recent crime. A young unmarried woman recently gave birth to a child which had but one eye, the other having the shape, color, and appearance of a deadly bullet wound. The child lived but a few moments and the mother soon after died in convulsions. About two months before her cousin, Mrs. Rose, an invalid with whom she lived, was shot in the head by a bullet and killed. The young woman declared that she was awakened by the report of a pistol and saw a burglar disappearing through the window. But the burglar not being well established Mr. Rose and his unmarried cousin were arrested. There was no direct proof of their crime, nor even of their intimacy, but the remarkable developments since do, in the opinion of many, point to a tragedy which so deeply affected the young woman's mind that it betrayed itself in her infant's mutilated countenance.

Purely Vegetable.

First the bud, then the blossom, then the perfect fruit. These are the several stages of some of the most important ingredients composing the painless and sure corn cure—Putnam's Painless Corn Extractor. The juices of plants greatly concentrated and purified, gums and balsams in harmonious union, all combined, give the grand results. Putnam's Extractor makes no sore spot, does not lay a man up for a week, but goes on quietly doing its work until a perfect cure results. Beware of acid substitutes.

Catarrah—A New Treatment.

Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon Treatment of catarrah (out of 2,000 patients treated during the past year 99.99 per cent. have been cured of this stubborn malady. This is not the less startling when it is remembered that not five per cent. of the patients presenting themselves to the regular practitioners are benefited while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this accomplished the catarrah is practically cured, and the permanency is unquestioned, as cures effected by him four years ago are cures still. No one else has ever attempted to cure catarrah in this manner, and no other treatment has ever cured catarrah. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Messrs. A. H. DIXON & SON, 305 King-street West, Toronto, Canada, and enclose stamp for their treatise on catarrah.—Montreal Star
