NEW YORK, Aug. 4.-Admiral Togo left New York late this afternoon for Washington. His departure had a feature quite as unusual as his midnight arrival and welcome in New York bay last night, for he left the city in the cab of a big electric engine drawing a heavy train for the capital city.

Altho the luxurious private car Olivette, the government had provided for the distinguished guest while in this country was attached to the train, the naval here elected to sit by the en-gineer's side and watch him operate 49,000 horsepower motor.

"I am intensely interested in your pre-eminence in electric engineering and railroading," the admiral said thru his interpreter, "and I wish to avail myself of this opportunity to closely observe both. Therefore, I will ride with the engineer."

The admiral rode in the cab to the limit of the electric zone at Harrison, N.J., and there entered his car. He asked many questions of the engineer cerning the electric equipment. In , it was remarked that he displayed more interest in this incident of his visit than in anything previously. During his fourteen hours' stay in the city, Admiral Togo had many conflicting experiences, but there was not the least change in his almost blank

conditions are the cause of much misery and unhappiness is fully known to ese who suffer from them and the need of curing them is as vital as is relief from d'seases with higher sounding names. We commend the foltowing statement to any one suffering from weak, thin blood, or shattered perves. Mrs. Mae Macabe, Gleichen, Alta., says: "A few years ago I became down, not seriously ill, but just thred and weak all the time. I consulted our family doctor, who gave me tonic after tonic with no effect. I gradbally got weaker and weaker until I could not do my work. Then I went to another doctor, who pronounced my case one of decline, and recommended a warmer climate with complete rest this I could not afford and I began to Ty and fret, until I became a complete nervous wreck. One day while visiting a neighbor an old gentleman was taking Dr. Williams' Pink Pills for partial paralysis recommended them to me. I sent out and got three boxes, but without much faith that they would help me, but before nent and I continued taking the Pills antly growing stronger, until I had taken seven or eight boxes, when was committely cured. I could do my work as easily as ever I had done in e. and the doctor told me that he could scarcely believe the change 'n me. as he had not had the least hope that I would be strong again. Wrought a Lasting Cure.

Dr. Williams' Pink Pills have made so many remarkable cures in serious cases that people are liable to overlook their value as a tonic for the blood and nerves in debility and general run-down conditions. That such conditions are the cause of much mishatching the eggs by means of an in-cubator and close aftention must be paid to avoid a total loss, practically, for the shells of the eggs are so tough that the young ostrich is unable to free itself and help must come at the right time from without. It generally takes about nine weeks to hatch in the in; cubator. Another peculiarity of a baby ostrich is that it will not eat when alone, and at the Stellingen farm there is a large-sized ordinary duck of com-mon breed which acts as foster-mother to all the young birds when first hatched. Observation shows that the duck appreciates its duties and takes kindly to them and that the result is satisfac-
