This picture has a strong patriotic appeal to those who are allied against the common foe. It is a big story dramatically as well. The scenes are set in a mythical Latin-American land in which the American representative battles against all sorts of treachery and cowardice. Finally the blue-jackets put the whole thing right but not before excitement runs to a high pitch.

A PLAN TO MOBILIZE ARMY OF HARVESTERS

Will Start at Work in Southern Wheat Fields and Work North to Canada—In Aid of the West

Washington, May 8.—Although Canada has been much less in the public eye than either Great Britain or France during the present international conferences here, the Canadian representative, Sir George E. Foster, has been one of the busiest men in the capital. He returns to Ottawa on Saturday morning and his place will be taken by Sir Thomas White. Strictly speaking, the Canadian commissioner is on a party with Mr. Balfour, the other members of the British commission being considered, in a strictly diplomatic sense, merely in the service.

There have been a multitude of matters upon which the officials in the service of the United States have availed themselves of Canada's war experience. Food, transportation and labor were the main subjects. For instance, too wide a spread between the prices of the same commodities on opposite sides of the boundary will be avoided as much as possible and there has been discussion on how best to prevent this.

In discussion of the labor question the plan is to mobilize harvesters for work in all of the most southern wheat areas of the United States, and to move them northward in such numbers as may be required to keep pace with the harvest season. In this way a supply of labor would be assured for the Canadian fields during the short harvest season.

An understanding has been arrived at with regard to patrol work of the high seas adjoining the coast lines and the details of censorship have been developed. Of the financial understanding between the two countries, presumably arrived at as the result of the earliest conferences, no information is available except that Canada will be given very favorable treatment.

MEATLESS DAYS ABOLISHED

London, May 8.—Great Britain's "meatless day" is to be abolished because it augments the demand on breadstuffs and other substitutes, which are less plentiful than meat. This was announced today by Lord Devonport, the food controller, in the house of lords. He declared that a diminution in the consumption of breadstuffs was of vital moment, and a main factor in the situation, but he added:

"Provided that the call for a reduction is responded to, and the efforts of the subordinates are not successful beyond reasonable likelihood, we shall get through with a fairly sufficient balance at the time the new harvest becomes available."

Regarding the necessity of securing equality of supply among all classes of the people, Lord Devonport said: "In view of the increase of submarine activity, and being determined to take no risks of shortage we thought it expedient that preliminary steps should be taken for a system of rationing our people, to be set up at the earliest moment, so that it would be brought into force then if required."

Braves Release Davis

Boston, May 6.—George (No-Hit) Davis got an unconditional release from the Boston National League Club today. Davis earned his title in 1914, when the Braves made his sensational and successful drive for the National and world's championships, by shutting out Philadelphia without a hit. He was then a student in the Harvard law school, and had broken the university's strength test records. Manager Stallings also announced that Larry Chappelle, outfielder, had been transferred to the Columbus Club of the American Association.

The Pirates Bold

When Wagner led them to the fight in those brave days of old, The Pirates were a far from crew, Ferocious, stern and bold. But since he's quit the Corsair life And laid his war club by, Their rivals shorten up the name, And call the Pirates Pie.
