

WHY EXPERIMENT?

Food scientists claim that the leavener is largely responsible for the flavor, texture and wholesomeness of your home baking. That on no other one ingredient does so much depend. It is important, therefore, to use a baking powder that you know possesses the necessary leavening qualities.

Often he returned home late—so late that when wife asked the time he'd murmur: "O, about 12, dear!" or "Just after midnight, pet!" But one evening, or rather morning, she said, instead of the usual request: "John, dear, I wish you'd stop that clock, its ticking worries me." The hapless, unsuspecting man did so. Next morning wife asked artlessly: "What time did you come home last night, John?" "About midnight," he replied glibly. "John," she said coldly, "look at the clock!" The hands of the timepiece pointed to 2:15!

ATLANTIC FLIGHT!

Wonderful example of the value of OXO.

Captain Sir J. ALCOCK writes—

"You will be interested to learn that 'OXO' was a great help to us during our Trans-Atlantic Flight; it sustained us wonderfully during our 16 hours journey. We had found out what a good thing it is when flying in France, and so decided to carry it with us on this occasion, and we can assure you that 'hot OXO' is most acceptable under such cold and arduous conditions. OXO was the only article of its kind which we carried."

COAL MINE STRIKE CONDEMNED BY TAFT

Says Congress Has Full Power to Act Against "Such a Cruel Conspiracy."

Former President William H. Taft, speaking on last Thursday night at Malden, Mass., at a rally in the interests of Governor Coolidge, declared that the bituminous coal miners in calling a strike were "engaged in an unlawful conspiracy" and that congress had full power "to condemn such a cruel conspiracy as an offense."

"In an ordinary strike," he said, "incidental annoyance to the public which is negligible, does not render the strike illegal. But when enormous combinations of workmen deliberately enter upon a country-wide plan to take the country by the throat and compel the country to force the employers in that particular field of industry to yield to the demands of the men they are engaged in an unlawful conspiracy. The sacredness of their individual right to labor on such terms as they chose and to leave their employment when they will, does not protect nor justify them in such conspiracy."

"That is the kind of a conspiracy the bituminous coal miners propose to begin on the first day of November. The extent of the suffering that they plan to impose upon the public cannot be measured. The suffering will be entailed on those who are so poor that they cannot buy their coal in advance. It will fall upon the poor wage-earners whose employer will have to shut down for lack of coal. Congress has full power, if it has not already done so, in the interstate commerce law, to condemn such a cruel conspiracy as an offense."

"The locomotive firemen are threatening demand. Congress may condemn this as an unlawful conspiracy, too." Mr. Taft asserted that "Bolshevism had taken strong hold in many of our congested centres and is the backing of a good many of the strikes."

"The radical agitators," he continued, "encourage lawlessness, stimulate resistance to lawful authority and the abuse of the power of organization. The question whether the government of a state shall temporize with organized lawlessness and yield to it by humiliating compromise thus becomes at this time of the greatest importance."

enacting a similar strike. If they enter upon this plan, it will constitute a conspiracy to starve the people of the United States into some kind of action to compel the authorities to pay the wages. He commended Governor Coolidge for his course in the Boston police strike and urged his re-election "in approval of the course he took in maintaining the authority and sovereignty of this commonwealth against some of her sons who had forgotten their duty and deserted her in the hour of peril."

A GENERATION OF PROHIBITION

Dr. W. T. Grenfell, of the Labrador mission, speaking on prohibition at the time the referendum was taken in Ontario said:

"If we can see prohibition through one generation, we shall find that the next generation will not want alcohol. As for interfering with the liberty of our

SPRUCE TREE 573 YEARS OLD

In making a survey of the spruce forests where the airplane cutting was carried on during the war in the Grays Harbor spruce district, a tree 573 years old was found, says the American Forestry Magazine. The tree was felled in clearing to make the military camps safe after a limb had fallen and menaced the roof of the officers' quarters. The tree is close to the Olympic Highway, eleven miles north of Humpstals. The stump was 11.6 feet from the ground level. The tree was two inches in diameter when Columbus discovered America.

fellows, we are not 'wild asses living in the desert,' we are social beings who have to limit our liberty so-called for the benefit of higher issues than the pleasure of catering to our palates. What an immense advantage will have been gained if the British Empire can go forward to meet the new era without the handicap that England especially has had to carry through the centuries from the grip of the hydra-headed monster of intemperance. Write me down as a prohibitionist from the soles of my boots to the crown of my hat."

Are the citizens of St. John, the commercial centre of the Province, going to back these men up with their subscriptions and win the gun or will they allow some other community to take the honor from them?
